## INTEGRATED PRODUCTION AT WORLD STANDARDS

AkDenim is a brand of AkKumas Textile mills operating in denim and non-denim fabric production in Turkey since 2005.

Over the years, as well as leading brands and manufacturers in Turkey, Akdenim became a leading denim and non-denim supplier to many worldwide brands.

Company carries out its integrated facility established on an area of 20.000 m<sup>2</sup> in Uşak Industrial Zone with an experienced team of 250 people and state-of-the-art equipment.

The production capacity is 1.000.000 meters per month.

## WIDE PRODUCT RANGE

Producing wide variety of basic denim fabrics ranging from 4.5 oz/yd<sup>2</sup> to 13.5 oz/yd<sup>2</sup> as well as authentic constructions, polyester, dual fx and sustainable fiber blends such as tencel/lyocell, viscose, linen as well as pre-consumer and post-consumer cotton in rigid & stretch forms. Company is a member of Better Cotton Initiative and has certifications of Oeko-Tex Standard 100, GOTS, GRS, RCS.

**WE AS BRAND AND INDIVIDUALS ARE  
TAKING CARE FOR WATER,  
THE MOST IMPORTANT RESOURCE AND  
THE MOST AT RISK IN THE WORLD.**

## **CORPORATE SUSTAINABILITY PLAN**

Our planet provides us abundant natural resources, but global demands rapidly exceed supply. Obviously, the fashion industry cannot continue to consume the natural resources it uses to manufacture products.

We, as Akdenim brand, we believe that the transition from linear to circular business model is the only solution across the industry. As a global and influential company, we believe we play an important role in protecting aquatic ecosystems and increasing the access of people around us to safe drinking water and sanitation.

With this awareness, our goal has been to replace the raw materials used in production with those that are less harmful to the environment, and to reduce water and energy consumption in production and usage processes. Our factory is now using up to %60 less water, %40 less energy and %80 less Co2 and committed to sustainability in production.
