BR-135 BROILER CAGE

High quality and maximum performance

We know-how!

Güres Technology, as a part of Güres Group, which has the largest full integrated egg production facility of Turkey, established in 2002 with half-century experience. With 20.000 m2 production area and of 8.700 m2 R & D operating area Güres Technology became one of the most reliable companies over 25 countries as one of the leading cage manufacturers of Turkey. We, Güres Technology trust our technological infrastructure, wide product range, experienced R&D team and energetic staff, and we ready to share our technical wealth and experience with our customers.

Easy Access To Feed From The First Day

- Spiral piped and level adjustable, feeder system with automatic sensor
- Low feed loss

Cage With Reinforced Construction

- 2 mm thick cage legs on each 120 cm.
- Secured with steel dowels on each 6 meter. (5 legs 1)
- Ø 60 mm metal shoes are used at the places where the cage legs are pressed on the ground.

Level Adjustment Mechanism Water Drinking System

- On each section 12 pieces made of stainless steel, red broiler nipples
- Antibacterial water reservoirs

Automatic Chicken Removal System

- Automatic transport with PP manure belts
- Faster dispatch with easily removable bottom plastics

Smooth And Fast Installation

- Cage batteries scaled with calibrated digital measuring devices
- On-site inspection, on-time installation with experienced discovery and assembly team

- In dimension 3600 x 1350 mm section of cage. There are 12 plastic bottom drawers on each section.
- All cages have automatic drinking and manure removal systems.
- There are 12 red imported nipples and V type drop holders in each two sections.
- There is a PP manure band extending along the cage, under each cage row and tier.
- Each tier has rollers and scrapers.
