HAKKIMIZDA

2010 yılında kurulan firmamız ISLAK HACİM EKİPMANLARI sektöründe üretim, toptan satış, proje çözümleri ve teknik servis konusunda hizmet vermektedir. Tüm bu hizmetlerin oluşumunda Noksi müşteri memnuniyeti ilkesiyle hareket eden profesyonel bir kuruluştur. NOKSİ bu ilke doğrultusunda hareket eden profesyonel bir kuruluştur.

Yurtiçinde edinmiş olduğu deneyim, gelişim ve kalite sayesinde dünyanın farklı birçok bölgesine üretmiş olduğu ürünleri ihracat etmektedir. İhracat alanında çalışmış olduğumuz bölgeler arasında Avrupa, Doğu Avrupa, Rusya, Ortadoğu, Balkanlar, Türk Cumhuriyetleri ve Kuzey Afrika öncelikli olarak sayılabilir.

Firmamız her özel projeye uygun ISO9001 belgeli marka tescilli üretim ve tasarım yapabilmektedir.

Hizmet verdiğimiz tüm ürün gruplarında garanti süresi ve satış sonrası teknik destek ile danışmanlık hizmetlerini hızlı bir şekilde yerine getirerek, müşteri memnuniyetini önemseyen ilkemize sadık kalmaktayız.

ABOUT US

NOKSI is a leading manufacturer of WASHROOM ACCESSORIES since 2010. NOKSI focuses to give service on design, production, project development and technical support. NOKSI is a professional establishment who has accepted the customer satisfaction as the main principle of the organization.

NOKSI is exporting to different parts of the world with the experience, knowledge and the quality that are gained in the domestic market. The regions that are exported to are: Europe, East Europe, Russia, Middle East, Balkan Countries, CIS Countries, and North Africa.

NOKSI has the expertise to design and develop new products that are suitable to ISO9001 for our esteemed partners.

NOKSI gives technical support and gurantee for the products. NOKSI continues to commit to provide products that meet market needs and environmental concerns.

Paslanmaz Çelik Bakımı

Paslanmaz çelik'in en önemli iki elementi Krom ve Nikel'dir. Paslanmaz çelik parlaklığını kromdan ve paslanmazlık özelliğinden nikelden alır. Paslanmaz çelik, yapı olarak pas tutmaya eğilim gösterdiği durumlar vardır, bu ancak metaller ile uzun süre temas halinde ortaya çıkabilir.

Paslanmaz çelik ürünlerinizi doğru bakım uygulayarak çok daha uzun ömürlü yapabilirsiniz. Ürünlerinizi dikkatli kullanırsanız, paslanmaz çelik kalitesini ve görünümünü devamlı koruyabilirsiniz.

• Paslanmaz Çelik Ürünün Temizlenmesi

Günlük bakım için, sadece temiz suyla veya ıslak bez ile temizlenmesini tavsiye ederiz. Yüzeydeki toz, kurumuş lekeler, yiyecek ve içecek kalıntıları ile benzeri kirlilik yaratan artıkları ıslak bir bez ile temizlenmeli.

Kurumuş yağ lekeleri için bulaşık deterjanı da kullanılabilir. Temizleme işleminden sonra yüzey tamamen kurulanmalıdır. Bulaşık deterjanı çamasır suyu içermemelidir, örn. Cif.

• Kimyasal Maddelerden Dolayı Olusan Lekeler

Ürün güçlü kimyasallar ile temas halinde zarar görür. Yüzey kimyasal maddeler ile uzun süre temas halinde kalırsa, yüzeyde oksitlenmeler oluşabilir ve bu durumdan ötürü paslanma başlayabilir.

Paslanmaz çelik ile temasta bulunulmaması gereken bazı kimyasal ürünler başlıca şunlardır: S-39 solder ux, boya çıkarıcılar, fırça temizleyicileri, metal kazıcılar ve yapıştırıcılar.

Ürünün yukarıda belirtilen herhangi bir kimyasal ile teması halinde, aşağıdaki önlemlere başvurulabilir:

- Etkilenen yüzeyi temiz suyla bolca temizleyiniz;
- Etkilenen yüzeyi kuruyunuz;
- Paslanmaz çelik koruyucuları kullanınız;

Temizleme suyu kireçli ise yüzeyde leke bırakabilir. Bunun için temizleme sırasında sert tanecikli ve lif yapıda olmayan bir bez kullanılmalıdır.

Paslanmaz ürünün yüzeyindeki kalan parmak izleri için de cam yüzeyleri temizlemek için kullanılan sıvı temizleyicilerinden faydalanılabilir.

Maintenance for Stainless Steel Products

Stainless steel is a metal alloy, the most important elements of which are chrome and nickel. Stainless steel gets its lustre from the chrome and its stainless quality from the nickel. Stainless steel may be prone to surface rust, but only as a result of prolonged contact with base metals.

Adhering to the maintenance tips will ensure that you enjoy your product for even longer. If you handle your product with care, it will retain its quality and appearance for much longer.

Cleaning your stainless steel product

For everyday maintenance we advise using clean water or a wet cloth only. The product's surface must be cleaned with a wet cloth for dust, dried stains, and food and beverages residues.

Dish liquid soap may be used to clean the surface from dried grease stains. Afterwards the surface must be fully dried. Please note dish liquid must not contain bleach, such as Cif.

Stains caused by chemical substances

The quality of the product will be damaged if it is exposed to harsh chemicals. If the surface is exposed to harsh chemicals for a long period of time an oxidization process may occur, which will cause the stainless steel to rust.

You are advised to prevent the product from coming into contact with the following chemicals: S-39 solder ux, paint stripping agents, brush cleaners, metal shavings, and adhesives.

Should the product come into contact with one of the above-mentioned chemicals, the following action should be taken:

- Rinse the affected surface immediately using plenty of water;
- Rub the affected surface dry;
- Treat the resulting stains with Inox Care;

If the cleaning water is calcareous, there may be some spots left on the surface. It will be sufficient to use of a non-rigid particulate and brous structure cloth.

If there are finger prints on the stainless steel products surface, liquid window cleaner can be used.
