Nara▶XR

Effective, sustainable, measurable, accessible education in metaverse

The Problem

- Institutions find it difficult to integrate XR services

- Most XR education products are one-time use-cases.

- Products are visually unsatisfying and interactively shallow.

- Solutions only cover a small part of the Metaverse educational system.

- Companies focus more on the **tech part** and not enough on the **education part**

Nara)XR

Our Solutions

MetaQampus is a distance e-learning platform via using metaverse technology.
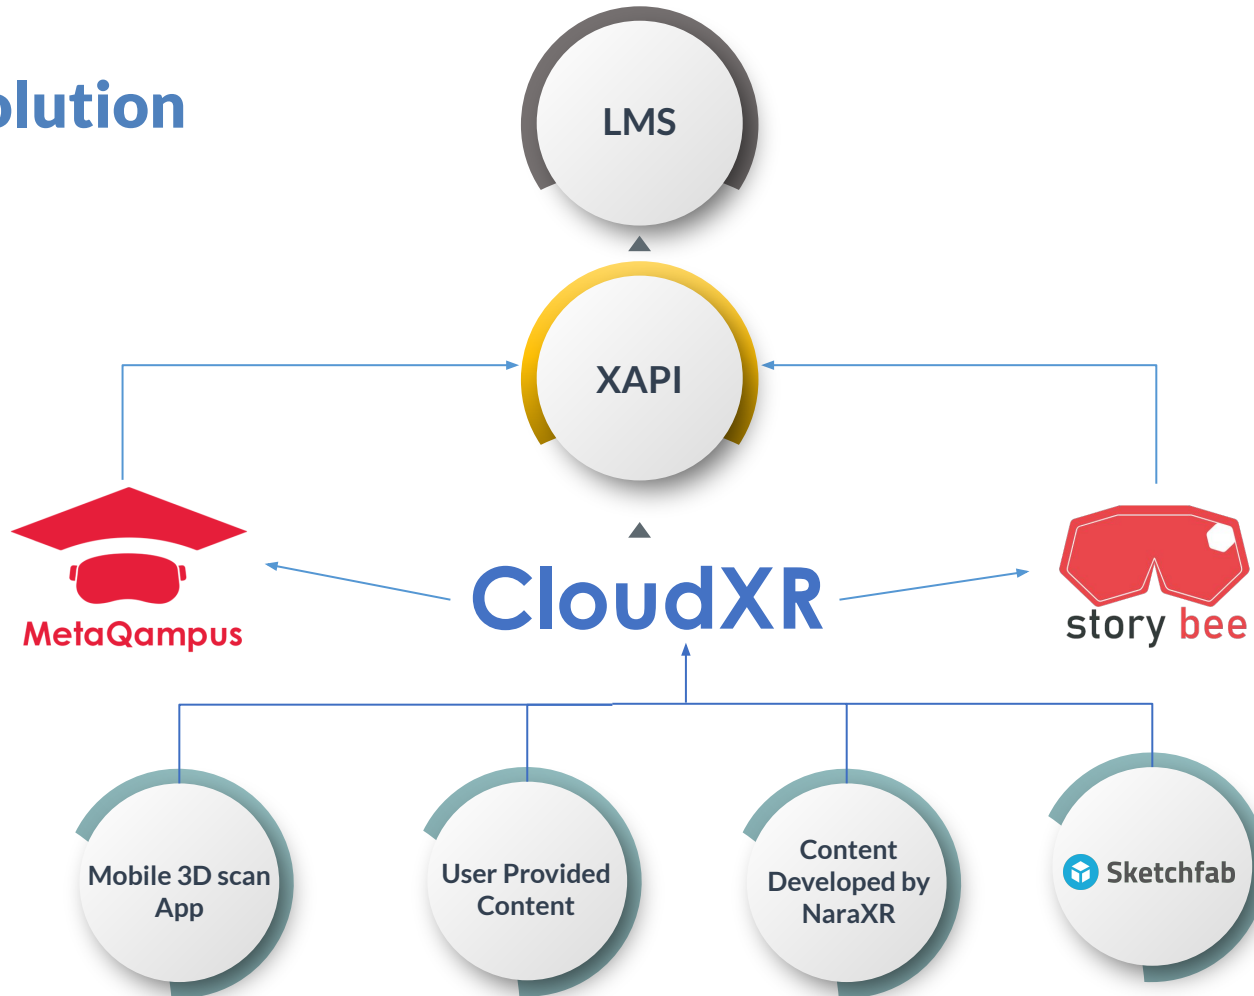

story bee StoryBee is a focused on vocational and skills training interactive and innovative VR learning application for educational institutions.

**CloudXR** CloudXR is cloudbased and AR supported 3D model Library
