

Our company produces recycled fiber for rotor yarn manufacturers from textile wastes (clipping, scraps).It provides sales and supply of these productions to the domestic and foreign markets.

It also produces mop yarn and sells it domestically.
and to the overseas market.

In our open end facility, which is also within our structure, we have a daily capacity of 30 tons and we produce rotor yarn between 12-20 numbers and sell them to the domestic and foreign markets.
