

INTRODUCTION

OFM Engineering is an engineering and contracting company, which is active in the civil and military fields. The company was founded based on the knowledge and experience of leading companies in Turkey, which have been active in the engineering and contracting industry since 1948.

FIELD OF ACTIVITIES

DEFENSE / SECURITY

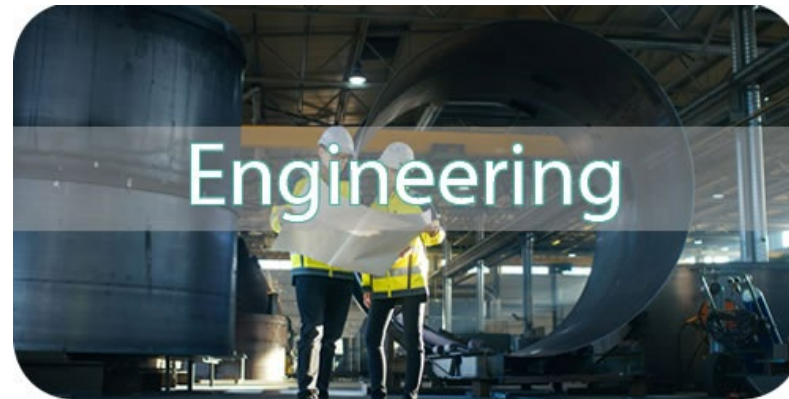

PROTECTIVE ENGINEERING FOR YOUR SAFETY

OFM Engineering offers engineering services and products to mitigate the effects of extraordinary events, accidents and deliberate attacks on people and structures. We particularly focus on solving complicated and difficult problems within Protective Engineering, through R&D and together with design, analysis, production and application capabilities.

SERVICES

- Risk Analysis
- Vulnerability Assessment
- Feasibility Studies

- Planning
- Design
- Detail Engineering
- Specification Development

- EPC Contracting
- Construction Inspection
- Construction Management

DEFENSE / SECURITY

PROTECTIVE ENGINEERING FOR YOUR SAFETY

We offer the services of highly capable staff to government entities and industry for the analysis, design and development of systems and products to protect people, facilities and assets from deliberate attacks and extraordinary events

PRODUCTS

Military Shelters

PADMER®
Blast Resistant Modular Shelter

Ballistic Sliding Gates
Blast Resistant Sliding Doors

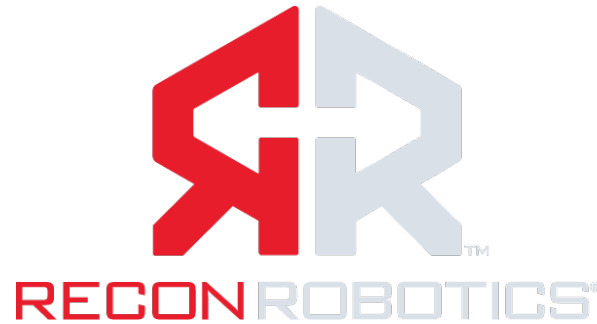

REPRESENTATION

OFM exclusively represents internationally recognized and industry leading companies in Turkey and surrounding countries.

Marine Security
Barriers

Tactical Micro
Robots

SOOSUNG DEFENSE INDUSTRIES LTD.

Automatic Bore
Cleaners

HEAVY STEEL FABRICATION

Family Owned

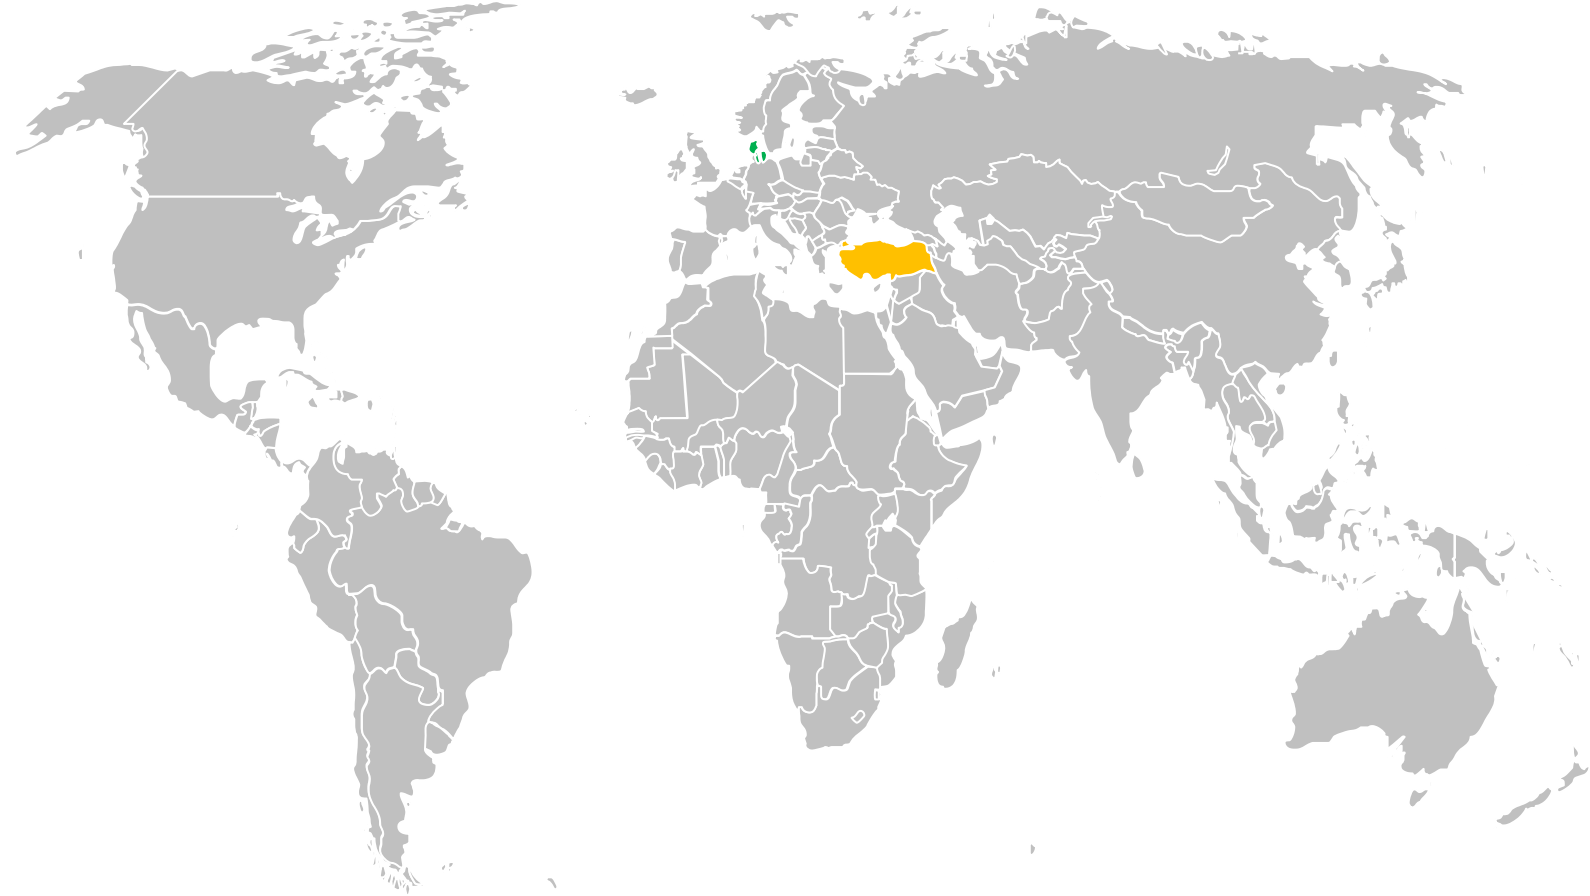

3 Manufacturing Plants

- All located in Ankara / Turkey
- 17.000 m² Closed Area
- 45.000 m² Open Area
- 50 tons lifting capacity
- 10.000 tons annual manufacturing capacity

Certifications

- ISO 9001:2015
- ISO 14001:2015
- OHSAS 18001:2007
- EN1090 EXC3
- ISO 3834-2

Conveniently Located Facilities at the Crossroad of Asia, Europe and Africa

HEAVY STEEL FABRICATION

OFFERED SERVICES

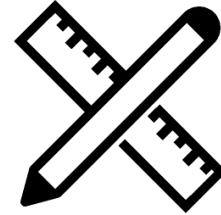

- Project Management
- Design Detailing
- Material Procurement
- Automatic and Manual Sand Blasting
- Plate Processing
- Profile Processing
- Assembly & Marking
- Welding | Gas Metal Welding (GMAW), Electric Arc Welding (SMAW), Sub-merged Arc Welding (SAW)
- Stress Relieving
- Machining | Milling, Boring, Horizontal Turning, Vertical Turning
- Surface Treatment | Hot-dip Galvanizing, Electro-galvanizing, Metallization
- Painting
- Packaging for Land, Sea and Air Freight
- Loading

HEAVY STEEL FABRICATION

WE OFFER

Professionalism

Design-for-manufacturability Service

Budget Friendly Service

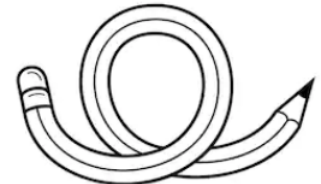

Valuable Ideas

Quick Response

Excellent Timing

Flexibility

HEAVY STEEL FABRICATION

More than 60 years of experience of a family who dedicated herself to engineering and manufacturing, differentiates OFM from other manufacturers.

MANUFACTURING PLANTS

WELDED CONSTRUCTION WORKSHOP 1 – SINCAN / ANKARA

6.000 sqm Closed Area
