Alternatif Ltd. is located at the heart of the Turkish spice market in Izmir and has been supplying quality products since 1996. We understand the importance of providing high quality products to our customers and make sure our products always meet or exceed customer's specifications. With our commitment to quality, we have established strong, lifelong partnerships with all of our clients. Our motto is "Quality is never an accident" for a reason. We work hard to personify this motto and only produce and ship only botanically pure products. Since the inception of our business we have managed to grow our business exponentially with dedication to production quality and customer satisfaction.

We are a Food Safety System Certification (FSSC 22000) certified company. We ensure the quality of our handling, manufacturing, and storage practices by having the FSSC 22000 certification. With our streamlined sterilization process, we offer both steam sterilization and ETO sterilization.

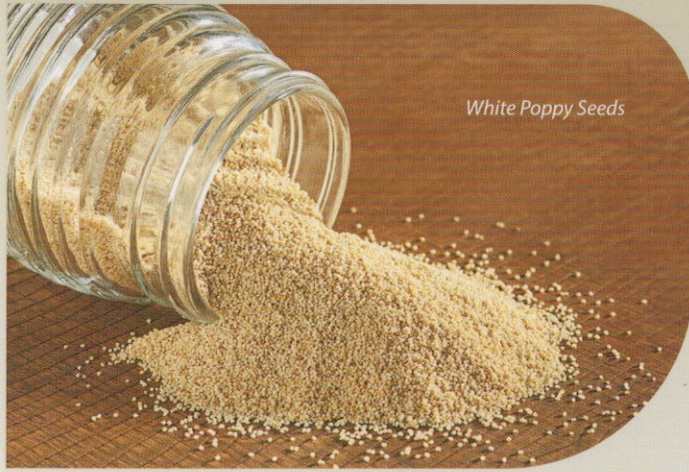

Alternatif Ltd. is a wheat-free, gluten-free, dairy-free, peanut free, tree-nut facility.

Our production is subject to our HACCP program in addition to Good Manufacturing Processes required and enforced by Turkish Government.

Our state of the art oregano processing line is fully air operated and moves the product through the system with air.

We employ gravity separation, air separation, magnetic sifting to remove foreign matters and achieve the highest quality.

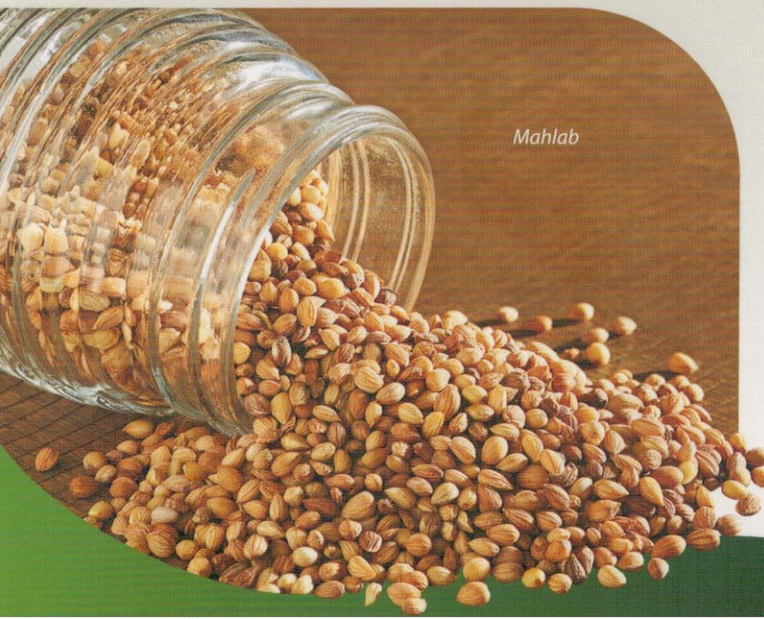

With strong neodymium magnets and metal detectors installed in the production line we make sure that the products we ship are clear from any metal residue.

As we strive to continually improve our manufacturing processes, we have completely renewed our machinery in 2016. Our manufacturing lines consist of state of the art, digitally controlled production equipment that allows us to sustain the quality of the production over time. We have separate processing lines to process each raw materials in our product portfolio. Our production capacity is over 30 tons/day for seeds, 5 tons/day for oregano and over 3 tons/day for leaves. We use a streamlined sterilization process for all of our spices.

Our production line includes a Buhler optical Sortex machine allowing us to provide uncompromising sorting performance for products such as poppy seeds, anise seeds, and cumin seeds. Optically sorted products are at the height of the quality.

We strongly believe that the quality we demand can not be achieved without a meticulous raw material analysis and acceptance policy. We sample every bag of raw material offered to us and only admit raw materials that meet our specifications. Our employees working in the purchasing department have been with us for over 15 years and do their work diligently to make sure the quality of our products are not compromised. We are committed to operate within the international rules and regulations regarding child labor and workers rights. We operate with Turkish Labor Laws and do not engage underage or underpaid workers.

While we perform our production and services, we stay fully committed to environmental protection and sustainability. Both the company and our workforce as a family are dedicated to operate within the national and international mandates for protection of the environment and sustainable agriculture.
