THE TESEM WORLD

TESEM was founded in 1988 with the goal of being an exceptional structural steel design and detailing company in Turkey. At that time the founders had more than 10 years of experience on large scale construction projects, allowing them to observe the need for a design firm that is also knowledgeable in fabrication and erection. With this observation, TESEM was founded with the philosophy of gathering designers from multiple disciplines together, who also have a firm grasp of fabrication and erection methods.

After 20 years in practice, with a reputation of being the “go to address” for design and detailing of complicated steel structures in Turkey and worldwide, TESEM is far beyond its initial founding goals. TESEM has participated in over 900 structural steel projects in 35 countries. TESEM offers services to its clients for every project, whether small or large, as long as they require our assistance. Our project range varies from stadium and arena roofs to long span bridges, from multi-story parking structures to airport terminal buildings and from cement factories to convention center buildings. Learning from every project and letting our strong dedication for excellence guide our way, TESEM has grown steadily.

Currently, TESEM provides basic structural design, reinforced concrete and structural steel detailing and consultancy services to its clients. The extensive knowledge and experience of TESEM staff in fabrication and erection methods enables us to provide efficient designs, which reflect as time and cost reductions to our customers. We believe consistency in our clientele is a good measure of our success and we are honored by the high ratio of our return customers.

Letter from the Chairman

Greetings,

Since its founding 25 years ago, our focus as TESEM has been the value we create through engineering. This catalogue is designed to provide a comprehensive review of our references reflecting the pride our employees as well as our clients. It also conveys our sense of vision to become a reliable partner in providing simple and strong solutions to complex structural engineering problems globally.

The TESEM corporate culture is characterized by its ability to efficiently adapt to our customers' requirements and the investors' needs. From the Company's start in 1989 to the present day, our tradition of handling the design, detailing and construction as a whole has driven continuous improvement in the procedures and experience of technical manpower of TESEM.

Our services ranging from designing and detailing of concrete skyscrapers to designing and building complex steel and glass buildings, are grounded on the blend of years of experience in 35 countries with the latest technology.

Looking ahead, we are focused on the execution of our controlled growth strategy while continuing to build on the strength of our brand. Furthermore, attracting qualified employees is critical and we take great pride in achieving their satisfaction as well as the satisfaction of our customers.

Schematic Design,
Design, Detailing and Consultancy,
Design and Build

TESEM VALUES

INTEGRITY

We behave ethically and are respectful, open and honest.

WORK QUALITY

Commitment to excellence with no compromise.

SUPERIOR ENGINEERING

We provide the best engineering available to meet client needs.

COMMITMENT

Assist in our clients' success by providing exceptional service and personal relationship.

TECHNICAL IMPROVEMENT

We develop better engineering solutions through continuous learning.

EMPLOYEE LOYALTY

We make every effort to attract and retain excellent, motivated employees, who are the source of our success.

OUR VISION

Our aim is to be the best known engineering company by the top 250 international contractors and leading real estate developers.

OUR MISSION

We will continuously improve our features mentioned below to become the best:

- Training engineers who design with the experience of construction and construct with the knowledge of structural design
- Effectively adopting cutting-edge technology in our design work
- Achieving high performance and efficiency in our work by encouraging exchange of information and experience throughout the organization
- Offering a "one stop" package to our clients by providing a diversity of services
- Measuring our success by 100% repeat client ratio and client satisfaction
- Developing cost-effective solutions to meet unique present and potential future requirements of our clients
- Providing innovative engineered solutions for our clients with an emphasis on quality, cost and time

Airports

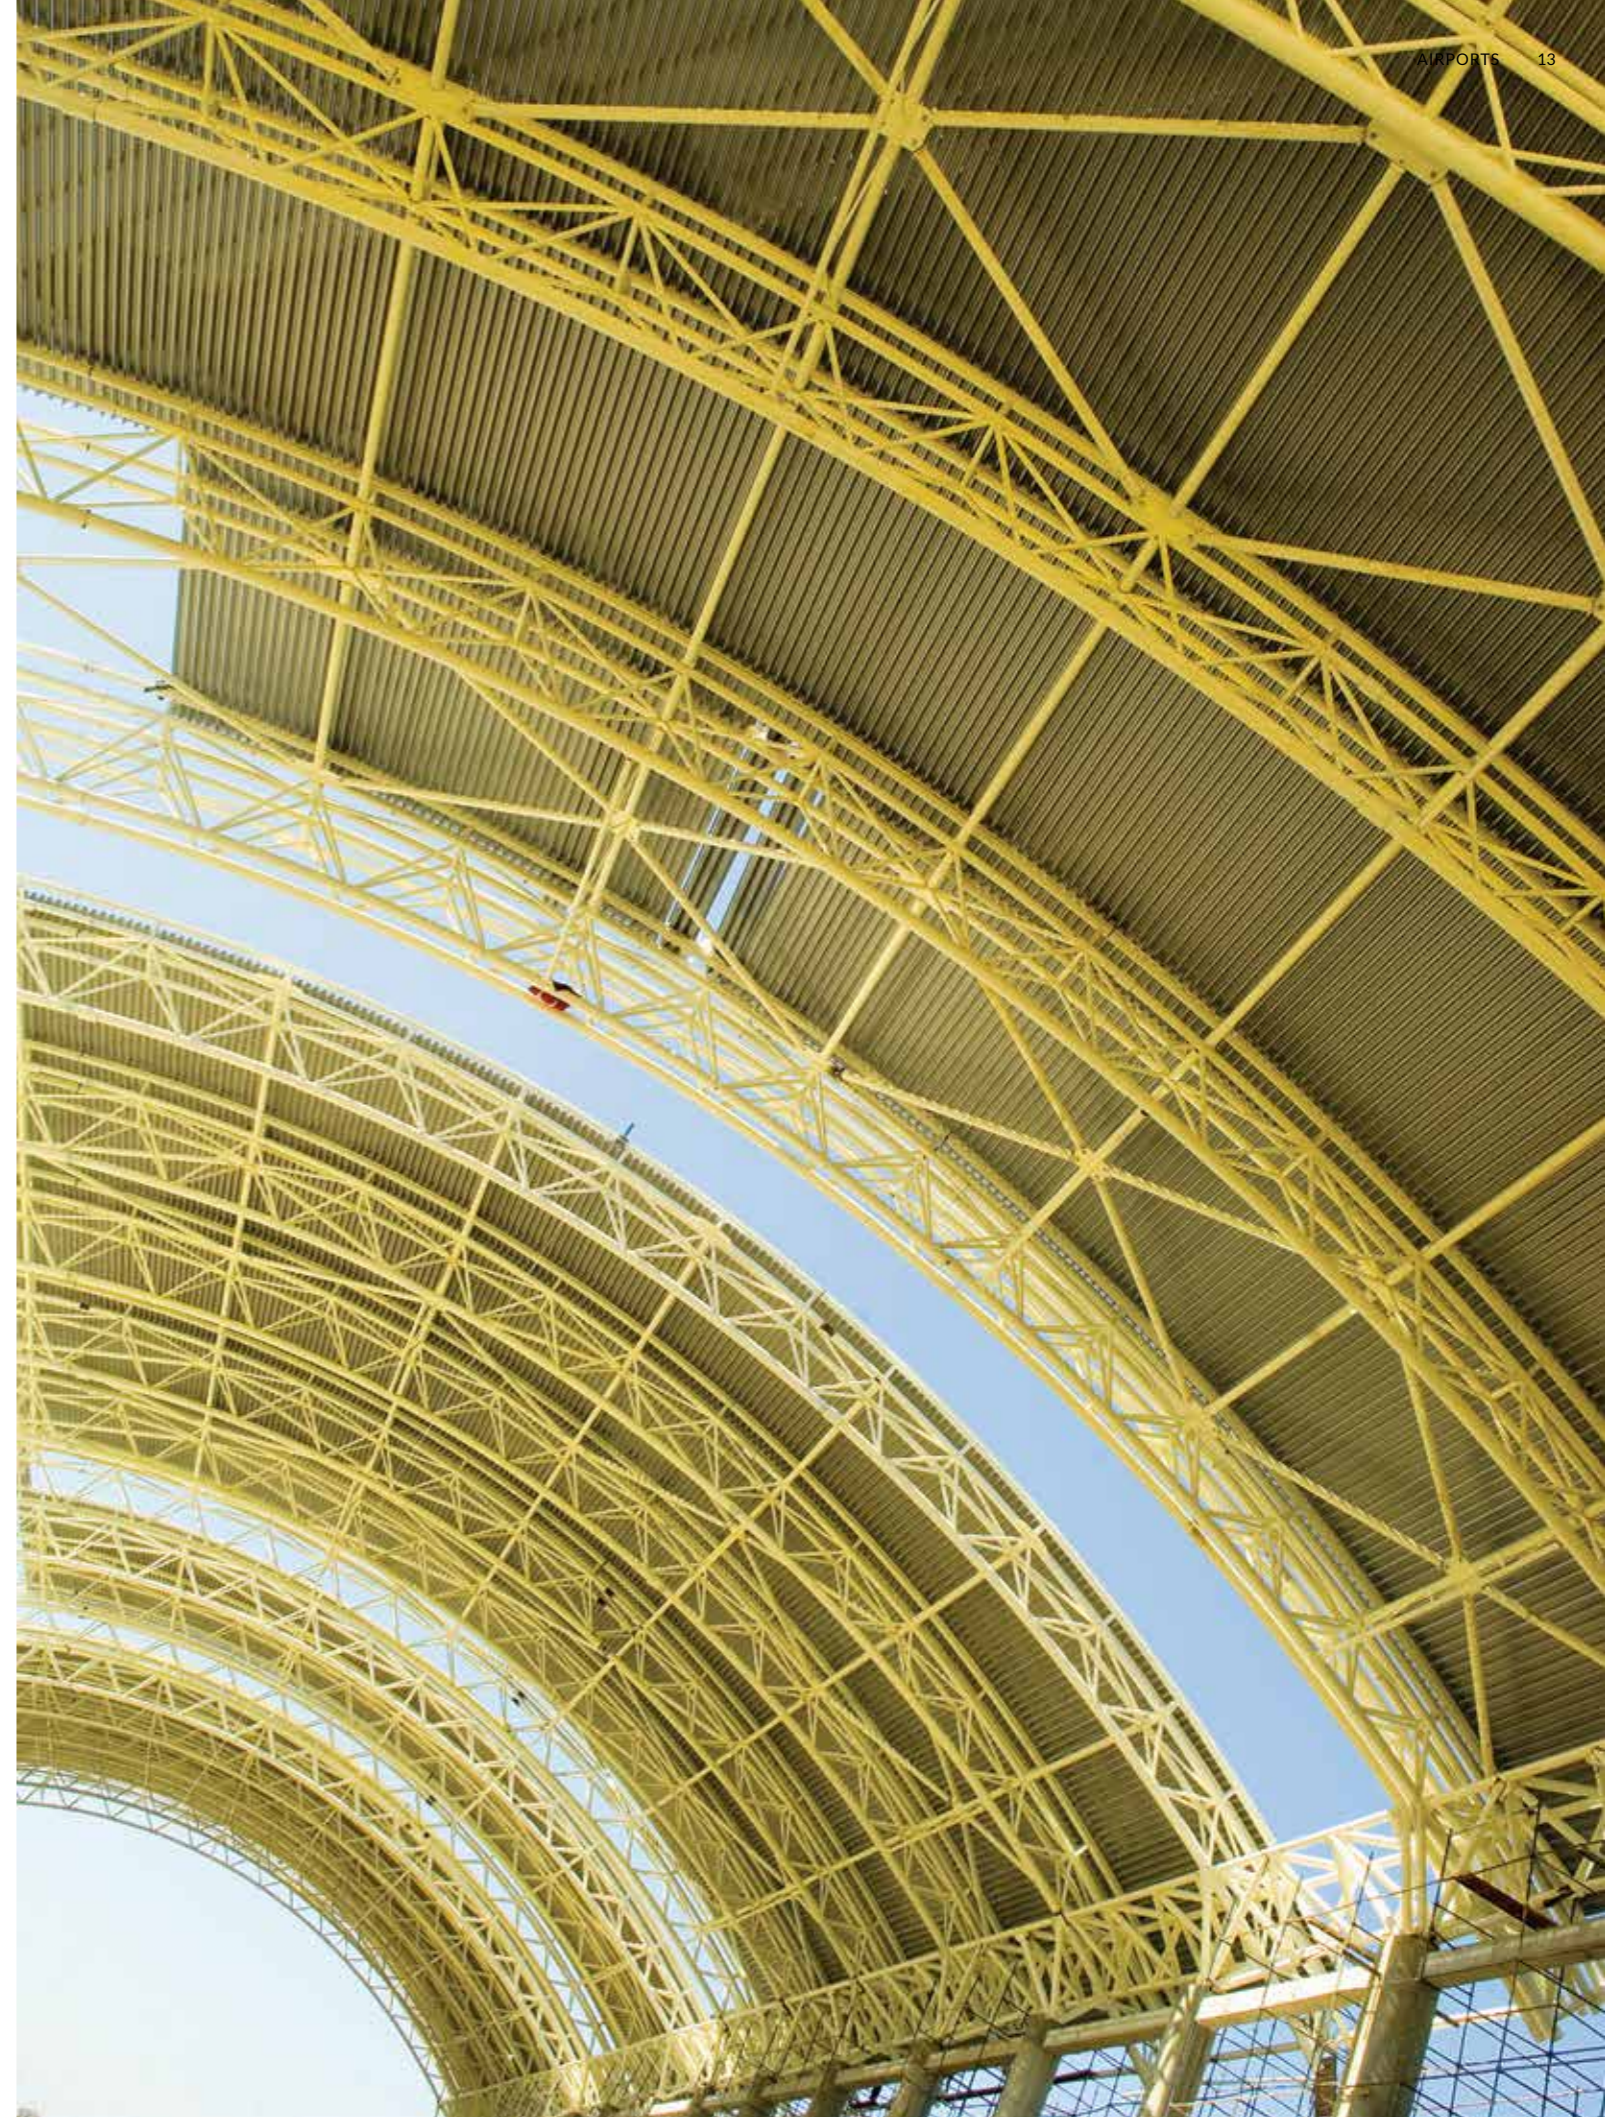

[DESIGN and DETAILING]

**ADNAN MENDERES NEW INTERNATIONAL
TERMINAL BUILDING**

The design and detailing services of Adnan Menderes New Intl. Terminal Building, made of 4600 tons of structural steel, were provided for Ictas.

Total period of construction is record. 13 months from conceptual design to ribbon cutting.

IZMIR / TURKEY

■ ESENBOGA NEW INTERNATIONAL TERMINAL BUILDING [ANKARA - TURKEY]

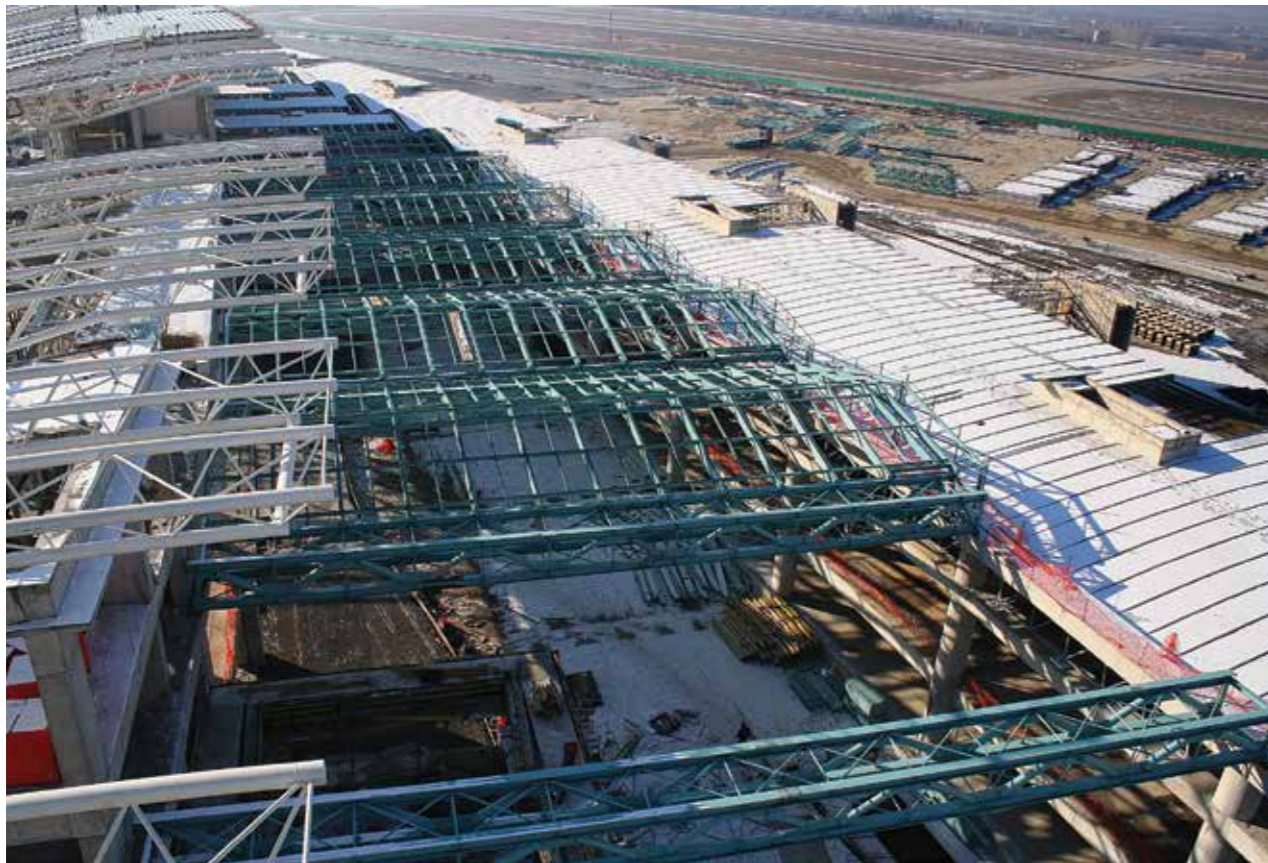

[DESIGN and DETAILING]

**ESENBAGA NEW INTERNATIONAL
TERMINAL BUILDING**

The structural design and detailing services of 10 million pax per year Esenboga New Intl. Terminal Building, made of 6500 tonnes of structural steel, were provided for Tav, Onermak and Nurol Makina.

ANKARA / TURKEY

[DETAILING]

**TRIPOLI AIRPORT NEW INTERNATIONAL
EAST & WEST TERMINAL BUILDING ROOFS**

The structural detailing services of 120000 m², 4500 tonnes (each), Non-Repetitive Roof Structure of Tripoli Airport East & West Terminal Buildings, made of structural steel, were provided for Odebrecht, TAV, CCC.

TRIPOLI / LIBYA

[DESIGN and DETAILING]

AIRCRAFT MAINTENANCE HANGAR

The structural design and detailing services of 160 m, 2900 tonnes Span Maintenance Hangar for Silkway, made of structural steel, were provided for MAPA.

BAKU / AZERBAIJAN

AIRCRAFT MAINTENANCE HANGAR [ISTANBUL - TURKEY]

[DESIGN and DETAILING]

MNG TECHNIC ATATURK HANGARS

The structural design and detailing services of 3 Maintenance Hangars for Boeing 747 and 1 for Boeing 777 for MNG Technic Ataturk Hangars, made of 3000 tonnes of structural steel, were provided for MNG Technic.

ISTANBUL / TURKEY

[DESIGN and DETAILING]

HABOM AIRCRAFT MAINTENANCE HANGARS

The structural design and detailing services of 2 Maintenance Hangars. Each Hangar has 90m x 270m clear area for Narrow and Wide Body Jets. Total 13000 tonnes of structural steel design and detailing were provided for THY Technic in 3 months only.

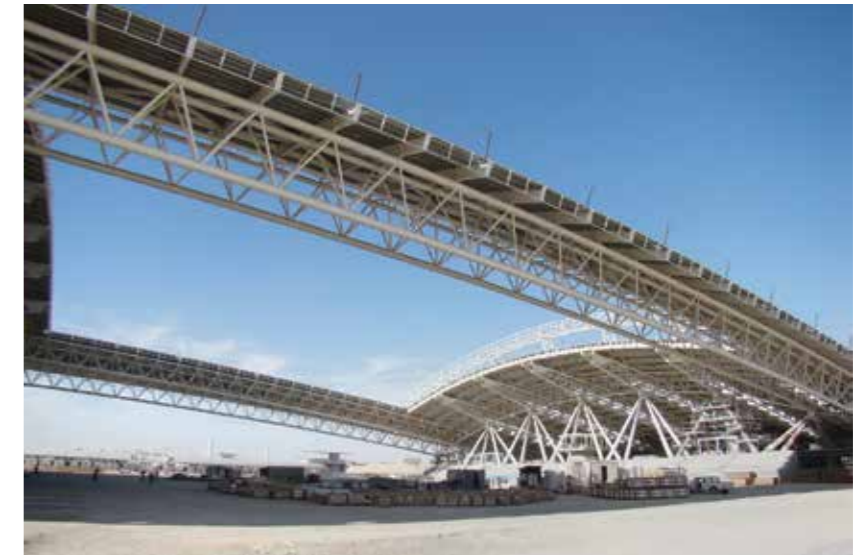

ISTANBUL / TURKEY

LEVENT CANYON PROJECT STONE CLADDING [ISTANBUL - TURKEY]

Buildings & Façade

[DETAILING]

AL SHAQAB ARENA & ACADEMY BUILDINGS

The structural detailing services of Emiri, Endurance, Show Jumping and Dressage Stables, Breeding and Show Center, Equine Exercise Center/Endurance Accommodation, Veterinary Center of Al-Shaqab Arena, made of structural steel, were provided for Nurool Gulf. Maximum truss length is 340 meters.

DOHA / QATAR

[DETAILING]

CONVENTION CENTER

The structural detailing and consultancy services of 16000 t Convention Center Building, made of structural steel, were provided for Tamsan.

DOHA / QATAR

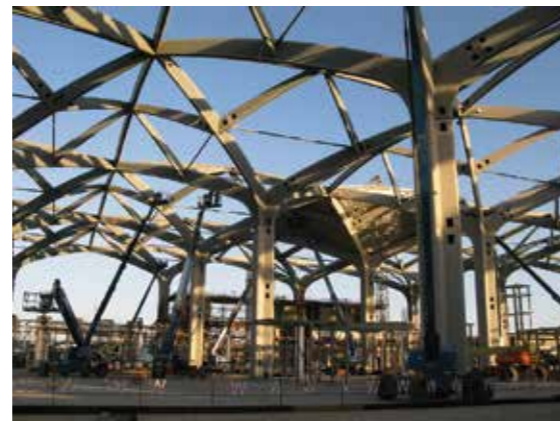

[DESIGN and DETAILING]

HARAMAIN HIGH SPEED RAIL STATION

The structural design and detailing services of SRO Haramain High Speed Rail Medina Station, design and detailing of façades (3000 tonnes) and detailing of roofs (9000 tonnes) made of structural steel, were provided for Yapi Merkezi. BIM data for structural steel was also prepared by TESEM.

MEDINA / SAUDI ARABIA

[DESIGN and BUILD]

BOULEVARD SHOPPING CENTER DOME

The structural design, detailing and erection services of the 30 m High Dome of Boulevard Shopping Center, made of structural steel, were provided for Etsun.

BAKU / AZERBAIJAN

[DETAILING]

SIDRA HOSPITAL SKYLIGHT

The structural detailing and erection consultancy services of 3 skylights in front of Sidra Hospital, made of 2000 tonnes of structural steel, were provided for Nurol Gulf.

DOHA / QATAR

[DESIGN and DETAILING]

SIDRA HOSPITAL LEAF CANOPY

The structural design, detailing and geometry consultancy services of Leaf Shaped Canopy in front of Sidra Hospital, made of structural steel, were provided for Nurol Gulf.

DOHA / QATAR

[DESIGN and BUILD]

NISSA O2 PROJECT STRUCTURAL STEEL AND GLASS WORKS

The construction of double skin façade of 106m high building. Lobby, swimming pool, bridges, canopy of O2 Project were built for Nissa Insaat.

ISTANBUL / TURKEY

[DESIGN and DETAILING]

REINFORCED CONCRETE RESIDENTIAL BUILDING

The structural design and detailing services of an extremely complicated structure, shaped like an inverted pendulum, of Architect Zaha Hadid, made of reinforced concrete, were provided for Ant Yapi.

MOSCOW / RUSSIA

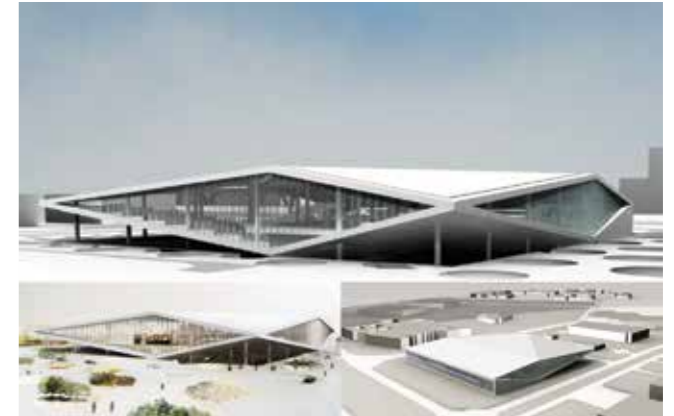

[DESIGN and BUILD]

SWISSOTEL KRASNYE HOLMY

The structural design services of glass cladding of lobby, swimming pool, bridges, canopy etc. of Nissa O2 Project, made of structural steel and glass, were provided for Nissa Insaat.

MOSCOW / RUSSIA

[DETAILING and ERECTION CONSULTANCY]

QATAR NATIONAL LIBRARY

The structural detailing and erection consultancy services of Qatar National Library, made of structural steel, were provided for Nurol Gulf.

DOHA / QATAR

[DETAILING]

**LEVENT CANYON PROJECT
STONE CLADDING**

The structural detailing of Levent Canyon Project made of extremely complicated structural steel, were provided for Gülermak.

ISTANBUL / TURKEY

[DETAILING]

LEVENT CANYON PROJECT
STONE CLADDING

The structural detailing of Levent Canyon Project made of extremely complicated structural steel, were provided for Gülermak.

ISTANBUL / TURKEY

[DESIGN and DETAILING]

LEVENT CANYON PROJECT
STONE CLADDING

The architectural and structural design of Levent Canyon Project, made of structural steel, were provided for Mangan.

ISTANBUL / TURKEY

Bridges

[DETAILING]

AL HALFAIA BRIDGE

The structural detailing of 910 m Al-Halfaia Bridge linking Hattana to Halfaia over the Nile River, made of structural steel, were provided for Yapi Merkezi.

SUDAN

[DETAILING]

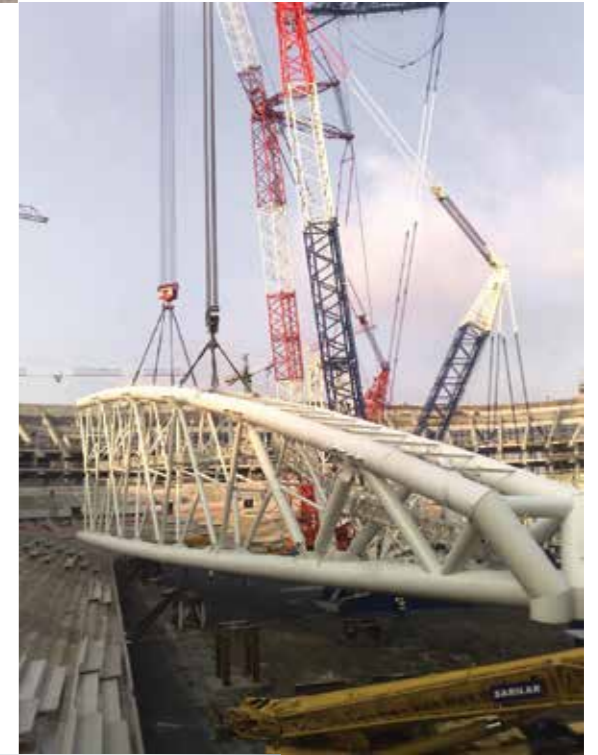

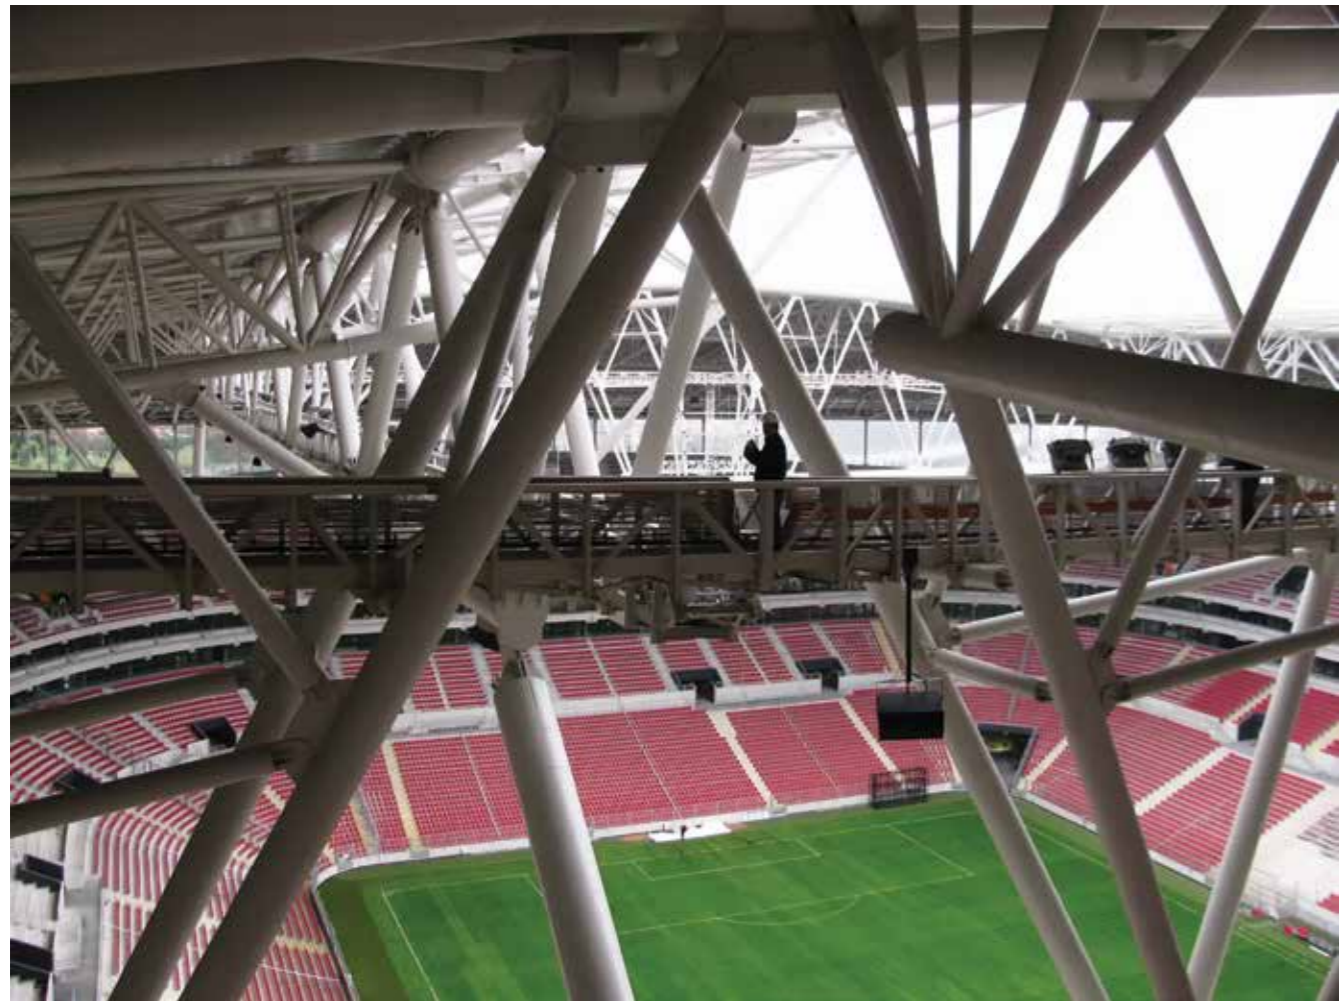

**BLUE NILE EL-MEK NIMIR CABLE STAYED
HIGHWAY BRIDGE**

The structural detailing of Blue Nile El-Mek-Nimir Highway Bridge, made of structural steel, were provided for Onermak.

SUDAN

Sports Facilities

[DESIGN and DETAILING]

SEYRANTEPE STADIUM ROOF

The structural design and detailing services of the Roof of Seyrantepe Stadium, made of structural steel, were provided for Temsan. Maximum truss length is 205 m.

ISTANBUL / TURKEY

[DESIGN, DETAILING and ERECTION CONSULTANCY]

LUSAIL SPORTS CLUB MULTIPURPOSE HALL

The structural design, detailing and erection consultancy services of the 190 m x 290 m Roof of Lusail Multipurpose Hall, made of 3900 tonnes of structural steel, were provided for Nuroi Gulf.

DOHA / QATAR

[DESIGN and DETAILING]

ISTANBUL PARK MAIN GRANDSTAND ROOF

The structural design and detailing services of the Grandstand Roof of Istanbul Park, made of structural steel, were provided for Evren.

ISTANBUL / TURKEY
