

“Special Solutions for You”

Mikromaks Engineering, which was established to help companies create their own corporate identities and follow all their processes, has made its difference more evident among Mikro Software Solution Partners with the ERP solutions it has developed specifically for the sectors. Mikro Software Solution Partnership, which started in the first half of the 2000s, was awarded the "Most Successful Solution Developer of 2004-2005", "The Most Successful Solution Partner of 2007-2008" and "The Most Successful ERP Solution Partner of 2008-2009" by Mikro Yazılım. honoring Mikromaks played the biggest role in finding its corporate identity.

Mikromaks considers Mikro as a platform, creates and develops all its processes in line with this philosophy.

The priority of Mikromaks team is “Unconditional Customer Satisfaction”. Based on this philosophy, our main goal is to develop "working solutions" that live in life and are used in real terms, and to ensure that the products we develop are used with maximum efficiency by their users. Mikromaks facilitates your work thanks to the solutions it finds and offers you the fastest and most practical solutions. Your company will save your employees from the workload and save time. With the solutions it finds, it helps your company reach your target faster.

Mikromaks offers its users all technical infrastructure services with its system and hardware engineers, system analysts and production planning engineers and consultancy services regarding all processes of the enterprises. Mikromaks always prioritizes the needs of its users in the solutions it develops, determines the needs with its own knowledge and experience, and develops solutions that the business can actually use.

“Mikromaks develops solutions for you and offers it only for your use” Mikromaks makes your work easier thanks to the solutions it finds, and offers you the fastest and most practical solutions.
