OZANTEKS

Nature to Life

Ozanteks as a leading and innovative company in textile industry is aware of its responsibilities for environment. Ozanteks invests on environmental friendly technologies and behaves with the aim of reducing harm to environment.

Ozanteks has started working on reducing carbon dioxide footprint and greenhouse effect in accordance to the goals of which our country has taken place on struggling against global warming and climate change by international climate change regulations.

Ozanteks invests on installing Solar Power Plants on fields and factory roofs. Ozanteks which has solar power plants with a current installed capacity of 21 MW uses its own clean energy to produce textiles.

Ozanteks prevents natural gas consumption of **2.465.223 m³ yearly** by using clean energy produced at solar power plants

As known, another advantage of solar plants is to reduce carbon dioxide emitted to nature. Ozanteks with its own solar plants prevents **15.738 tons of CO₂** emission. In addition, recovery of 1,430,727 trees have been provided by our Solar Power Plants, and therefore, by replanting of 28,000,000 square meters area (an area larger than 8 times Central Park) protection of living beings life and habitat variety has been supported.
