SERVICES

- 1 ENGINEERING CONSULTANCY
- 2 TOOL - JIG & FIXTURE DESIGN & PRODUCTION
- 3 CNC LASER CUTTING
- 4 CNC ABKANT BENDING
- 5 PRESS LINE
- 6 TUBE FORMING
- 7 WELDING
- 8 MOUNTING PROCESS

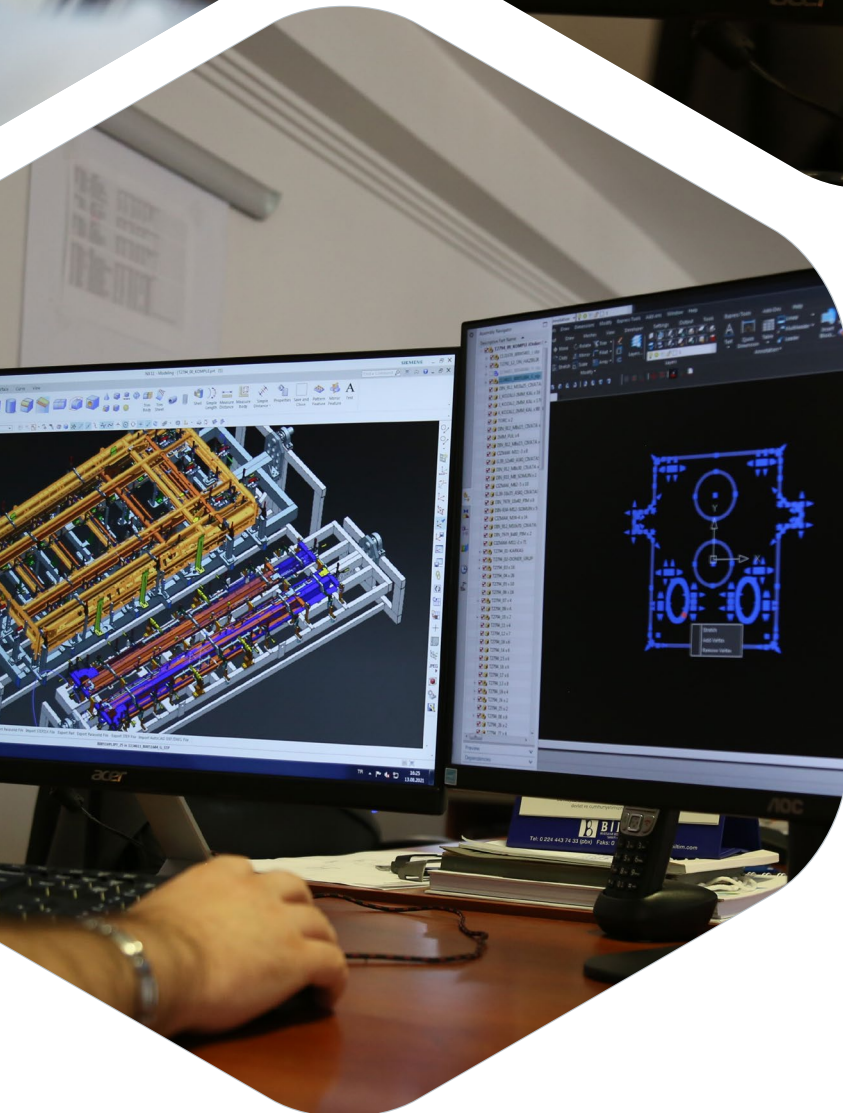

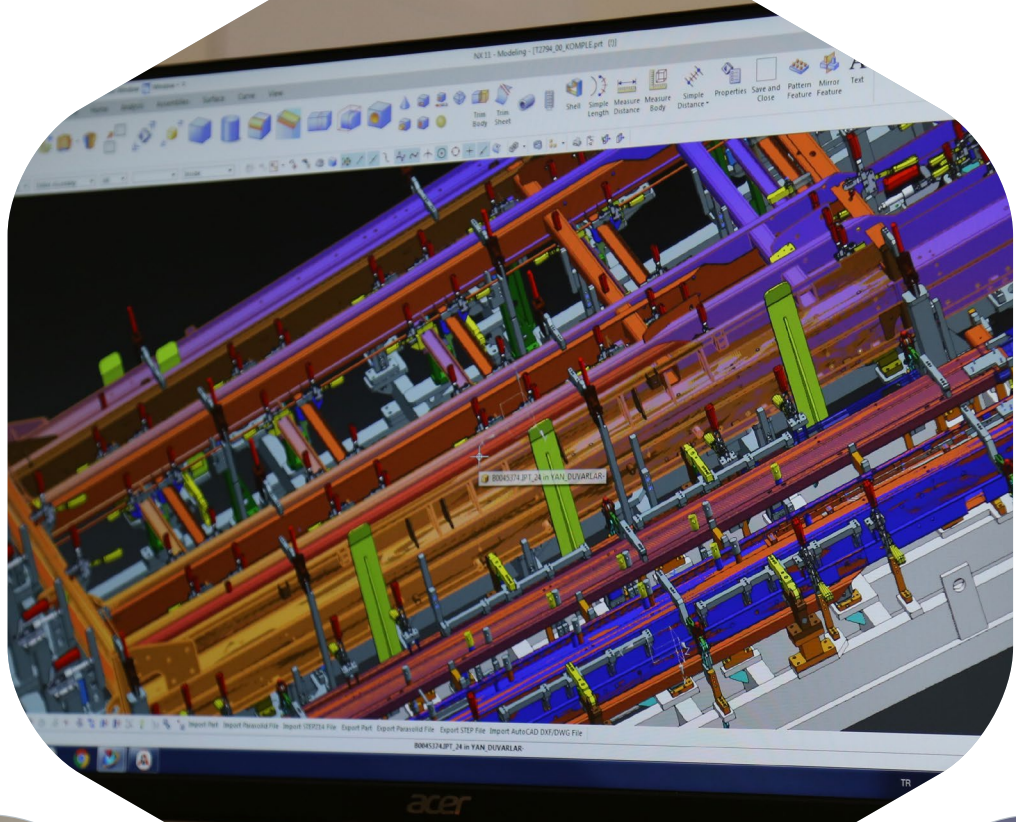

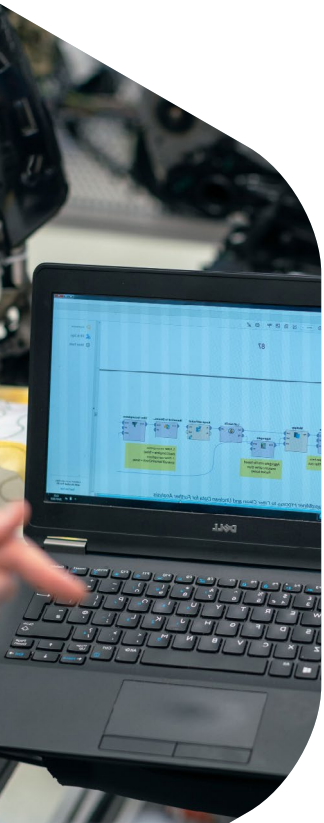

SECTORS

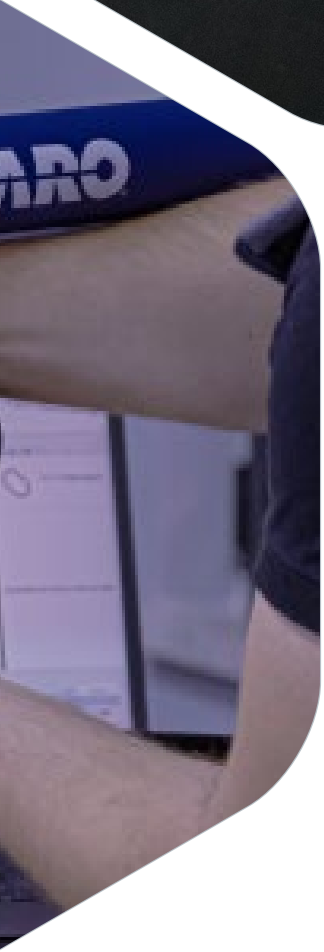

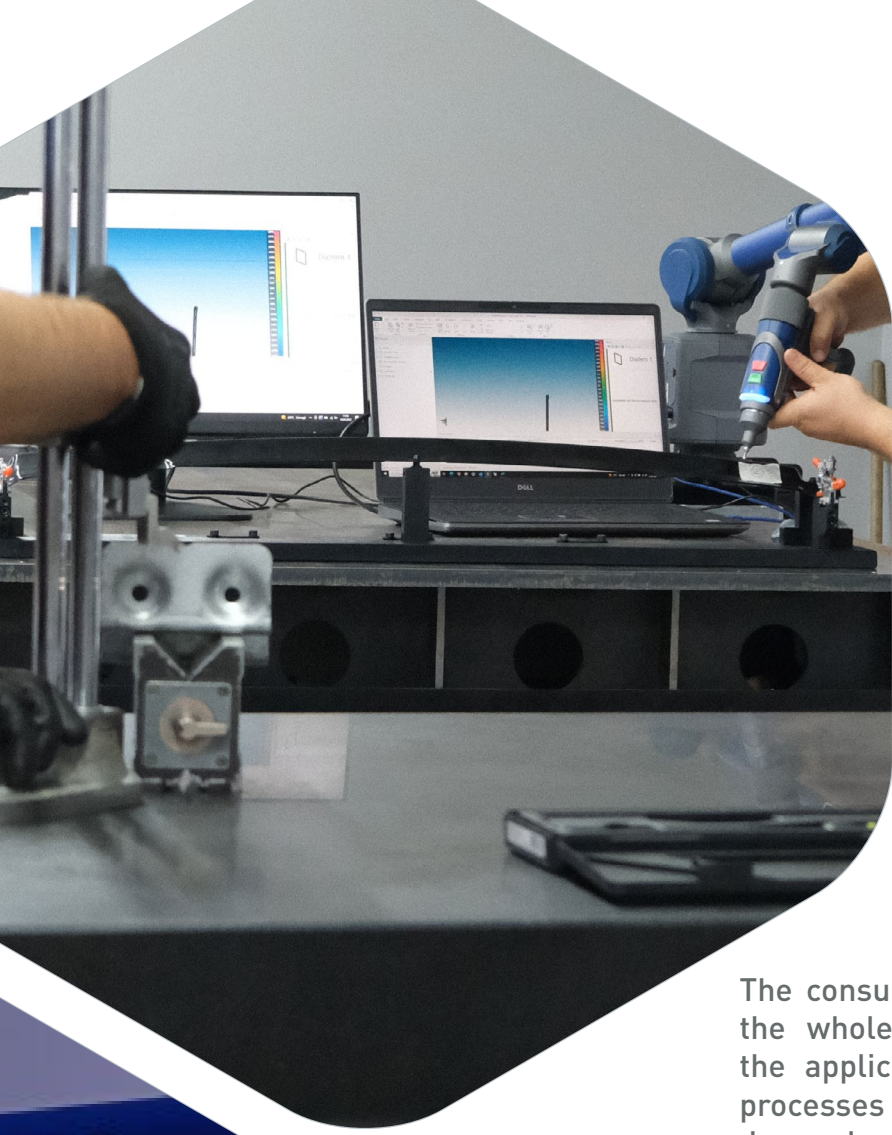

- 1 AUTOMOTIVE
- 2 EDUCATION
- 3 ON-BOARD CAR CARRIER SYSTEMS
- 4 SOLAR ENERGY
- 5 DEFENCE INDUSTRY
- 6 TRAILER INDUSTRY
- 7 STADIUM SEATS

TION

SERVICES

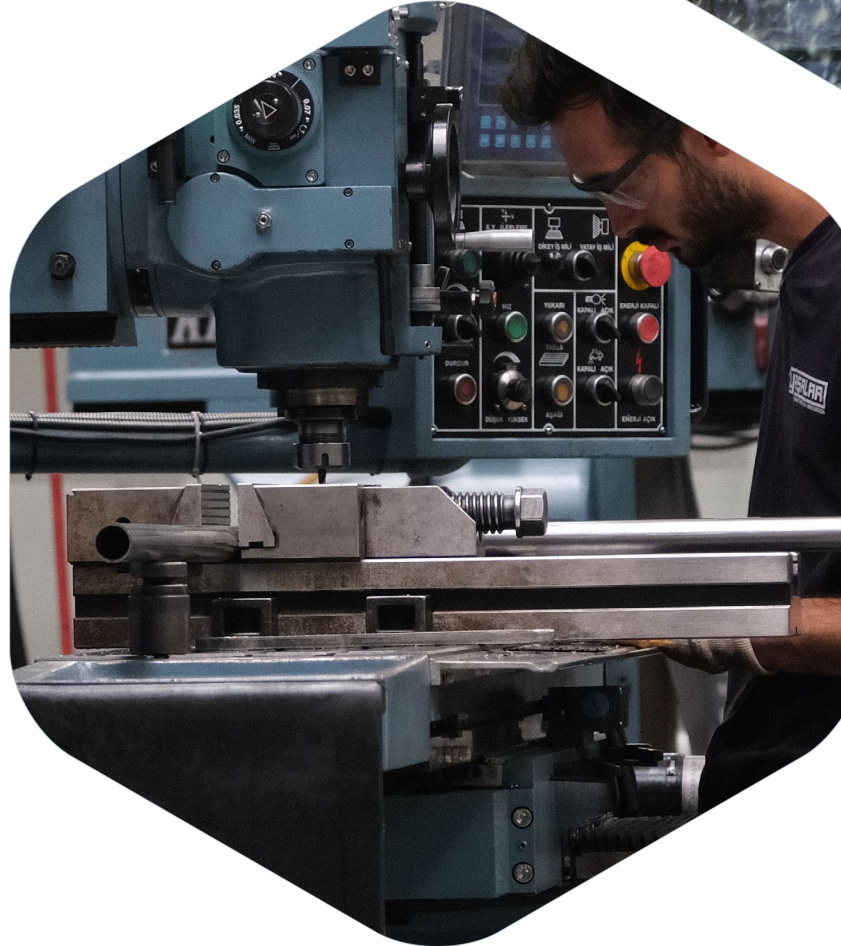

Engineering Consultancy

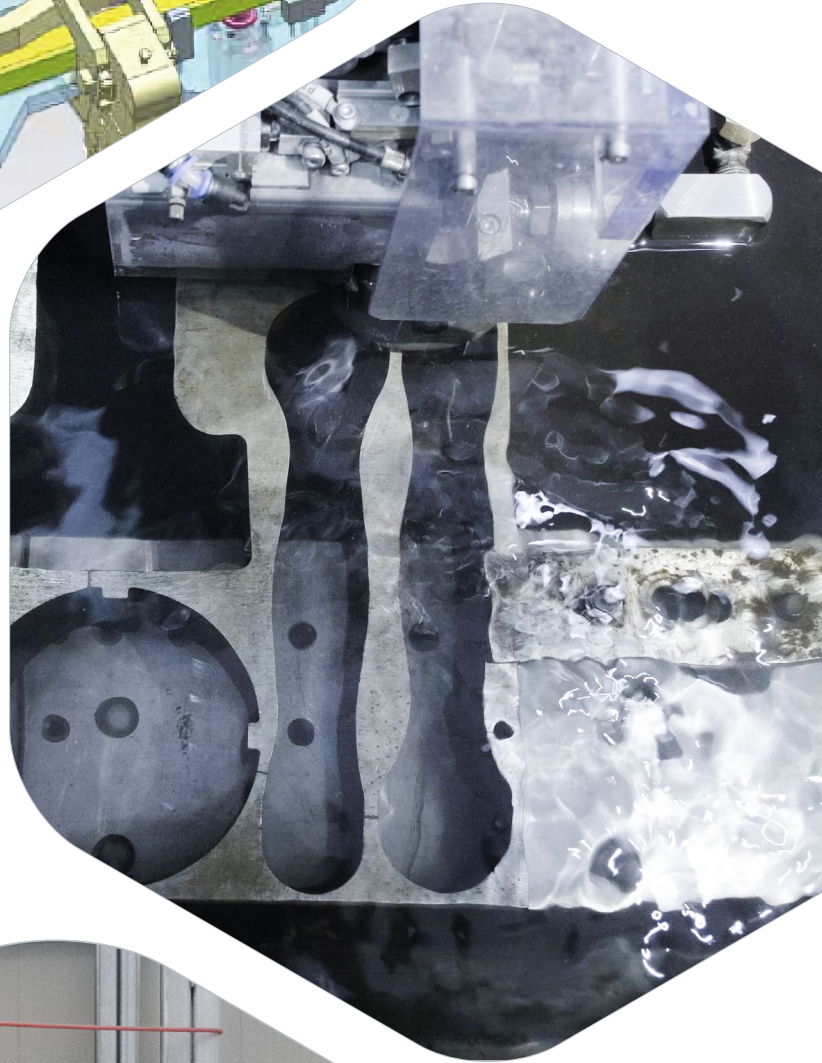

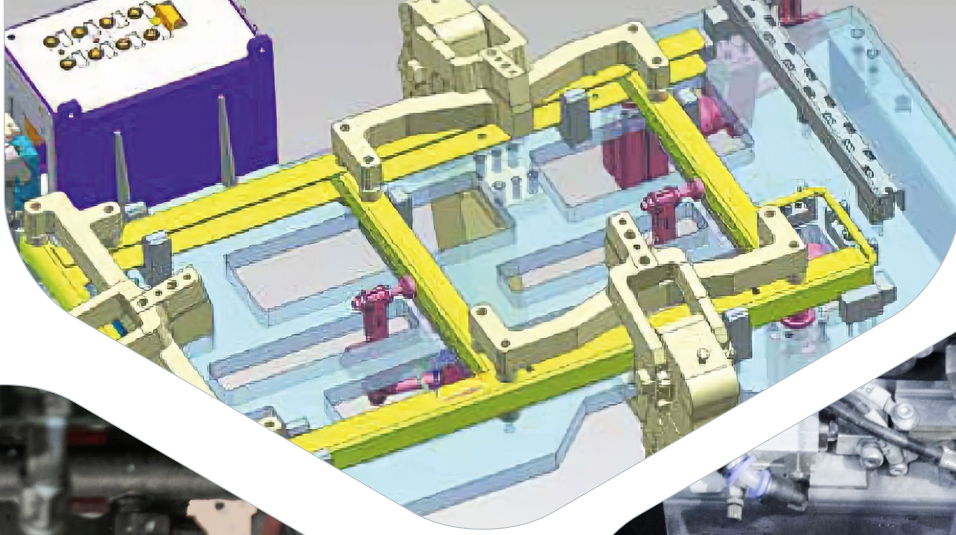

The consulting engineering is aimed to benefit the whole of customers expectation through the applications and projects of contributing processes .Yaşalar is providing services of demands in creativeness and improvements of cooperation further on any projects with our experienced and trained engineers in our team.

SERVICES

Tool-Jig&Fixture Design & Production

Since we design and manufacture the tooling-jig and fixtures both demanded by our customers and/or used in our production with our over 40 years of knowledge, we achieve significant advantages in terms of cost and deadline.

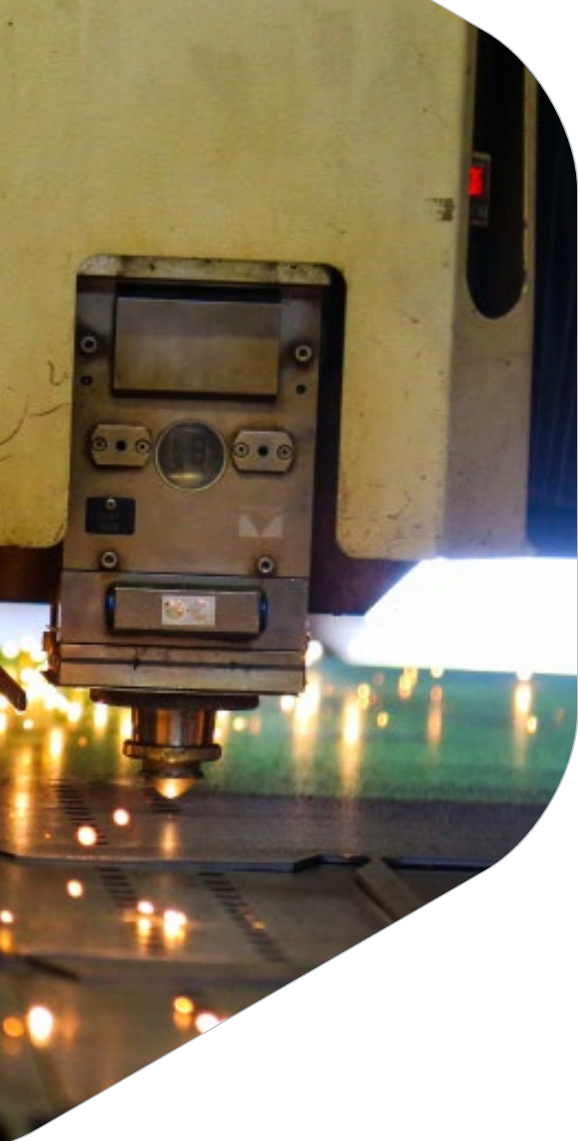

SERVICES

CNC Abkant Bending

Bending operations of products which are approved by mechanics are performed under the control of engineering team with the focus on customer's demand. We are able to bend variety of metal sheets up to 4100 mm with our 60 ton & 175 ton & 320 ton CNC Abkant machines.

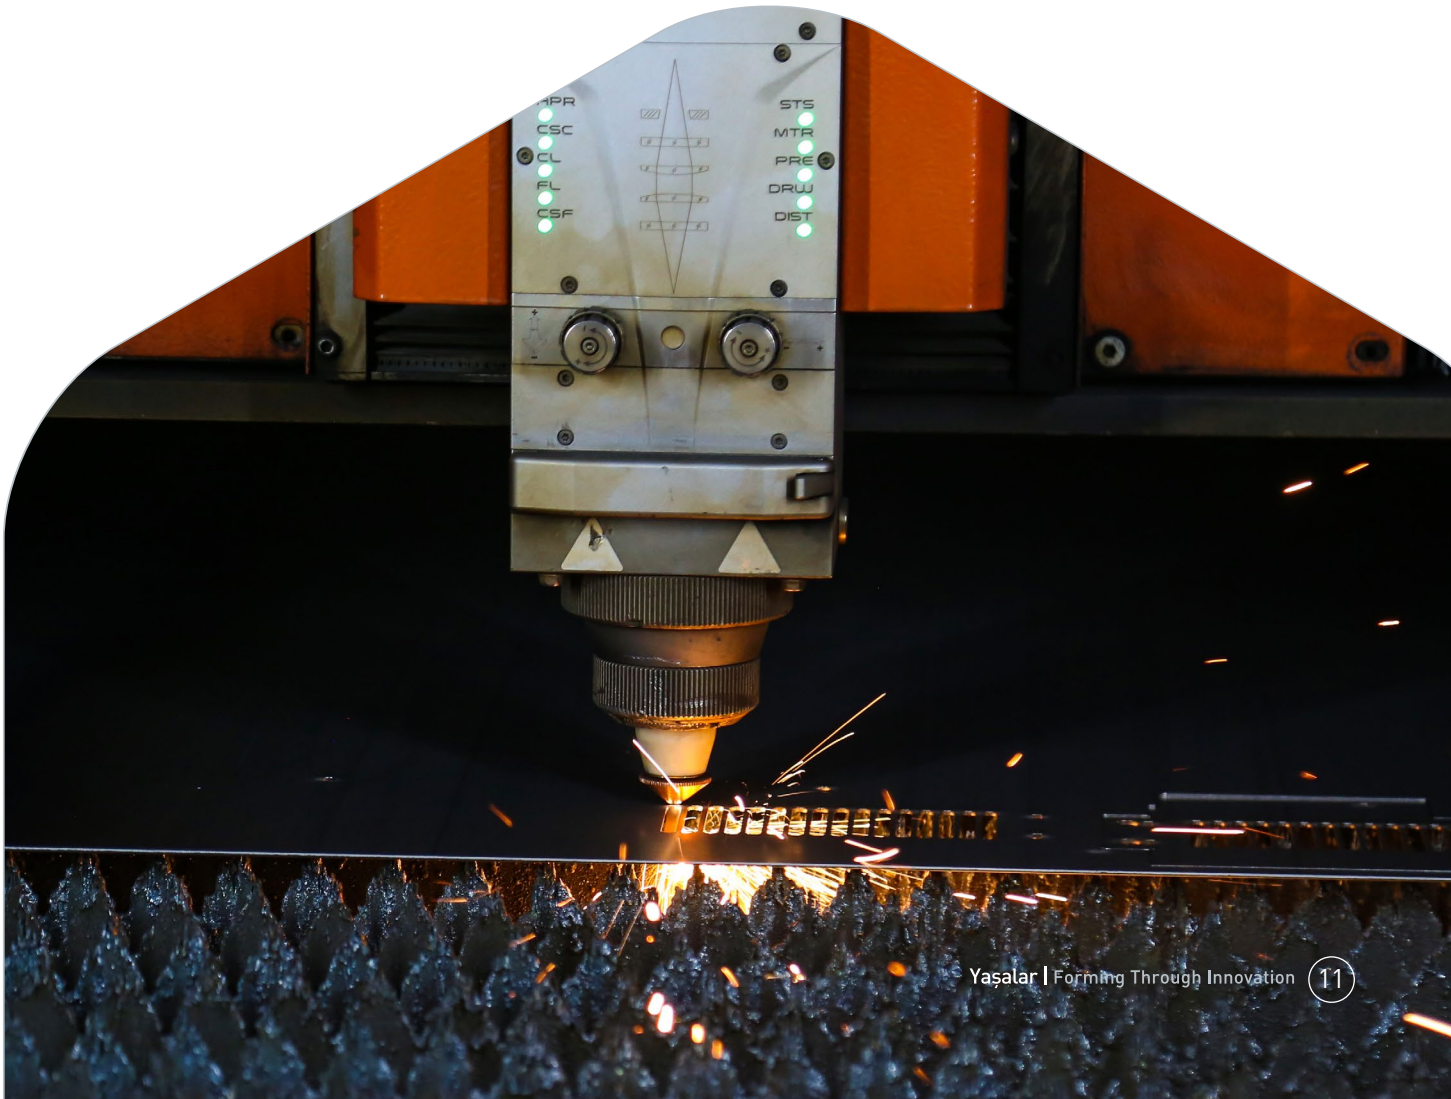

SERVICES

CNC Laser Cutting

Our laser cutting line is experienced on the tight tolerances, speed and accuracy required of VVdemands. We are able to do the precise and economic cutting of steel sheets with 2KW, 4KW, 6KW fiber optic CNC laser cutting machines.

SERVICES

Press Line

In our line we have eccentric and hydraulic presses from 10 tons up to 315 tons. We produce with high quality parts for variety industries supported with our experienced staff and precision press machines.

SERVICES

Welding

We work with absolutely precision with our high experience and knowledge. We weld high quality products that was demanded by costumers and specifications. We provide TIG and MIG/MAG welding services that we apply variety of materials, including stainless steels&aluminum.

Robot Weld

Spot Welding

SERVICES

Tube Forming

As Yaşalar, we perform on tube and profile forming processes in various materials such as steel and stainless steel with our expert staff and high-tech machinery and equipment. We provide formed tubes to our customers in many different sectors.

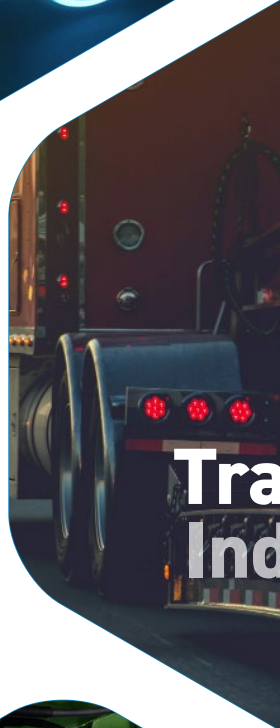

SERVICES

Mounting

At Yaşalar, aluminum and steel parts are mounted by our experienced staff on our mounting lines. We complete all mounting processes accordance with Project as demanded by costumers and final products get prepared through the packaged to delivery for customer's satisfaction.
