

AKSUViTAL

AksuVital is Natural...

About Us

AksuVital's brand journey began in 1989. This journey, which started with the production of bee milk, honey and pollen, has become the success story of a brand that has spread all over Turkey over the years. AksuVital, which continues with the production of apitherapy, phytotherapy and aromatherapy products after honey production, has become the leading brand in the field of "Food Supplement and Bee Products".

AksuVital, which has become the brand of the first in its field with 400 kinds of products, produces in its modern facilities with international qualifications in accordance with GMP, ISO 22000:2005 and ISO 9001: 2015 standards within the framework of the relevant legislation.

AksuVital, Shiffa Home, Softem and Natural Hekimce offer high quality products to its consumers through Avicenna brands and transfer, pharmacy and market channels. AksuVital, which exports not only to our country but also to 5 continents, especially the Middle East, is rapidly advancing towards becoming a world brand.

AksuVital aims to be a symbol of trust and quality in its sector by complying with product safety principles and has been working with its brands that have achieved this goal for more than 30 years.

Our Vision

Our vision is to improve the quality of life by aiming at preventive medicine and producing apitherapy, phytotherapy and aromatherapy products. To realize 3 new projects and obtain 1 patent each year. To be a world brand in 10 years with a growth rate that doubles every three years and a virtuous business example.

Our Mission

By prioritizing the satisfaction of the producer and the consumer; to produce and present the most natural, world-class, without compromising its naturalness and quality. Based on the philosophy of Avicenna, always being innovative and the R&D center of its field. Being a sharing entity starting from our closest in our earnings...

Our Main
Mission is
Commitment
to Nature...

Our Story

A man who has been ill for many years seeks a good physician. Finally, he consults a sage man. He says, "I know a physician who knows the cure for your illness."

He points to the mountain ahead with his finger.

"He lives behind that mountain,"

he says, describing the type of the physician.

"First he examines you, diagnoses you, then treats you."

The patient asks

"Isn't there anything better than that?"

The sage

replies, "Yes, there is."

He points further away with his finger

"You need to go through another mountain again to find him"

Patient

"What makes this this physician special?" he asks.

The sage

says, "As soon as this physician sees you, he knows about your illness."

The patient asks again

"Isn't there anything better in him?"

The sage

"Of course there is?" and adds,

"This physician will make sure that you never get sick"

Here, your physician two mountains away...

AksuVital

Our Quality Understanding

AksuVital produces approximately 400 kinds of products in the fields of food, food supplements and dermocosmetics with more than 30 years of experience. Every product produced is carefully and meticulously studied until it reaches the consumer from nature. The most natural and quality raw material is provided and tested in the R&D laboratory and it enters into production according to hygiene and quality standards. Every product that will reach the consumer must have natural and first-class quality. For this reason, the whole process is developed by expert staff management.

AksuVital, which produces natural products that are rapidly increasing in use in all developed countries with International Gold Quality Award, GMP, ISO22000 and ISO9001 standards, has succeeded in becoming a reliable natural brand.

The Most Important Reward for Us is Your Health...

We work like bees to increase your quality of life...

Our Quality Certificates

We crown our success and quality in the natural products sector with national and international documents we have received so far. Documents that we have been entitled to receive as a result of many audits carried out over many years:

- Eurasian Quality Award Certificate
- European Union Quality Award Certificate
- GMP Certificate Food
- GMP Certificate Cosmetics
- Halal Certificate
- MUSIAD (Independent Industrialists and Businessmen's Association) Sector Boards Business Development Certificate
- ISO 22000:2005
- ISO 9001: 2008
- TSE

We love nature,
we protect nature...

Corporate Social Responsibility

For more than 30 years, we have been supporting activities aimed at principles that will benefit people, society, environment, nature consciousness and humanity, and we work with sensitivity on these issues. As AksuVital, we strive to fulfill our responsibilities in many areas, especially environment, education and sustainability. We constantly remind the importance of nature and natural life for the healthy human generation and create social awareness in this regard.

Sustainability

Since the day we were founded, we have been carrying out our works by putting the principle of sustainability at the center of all our business stages. We process halal food production and the best product and deliver it to people in its most natural form. We always adopt and implement an environmentally friendly process of doing business in order to ensure that a natural and healthy life is sustainable and to leave a livable world for new generations.

We take all our products from the essence of nature and pass them through the filter of science...

Research & Development

Nature is our first and main R&D center. Nature, which is the source of inspiration for every product we produce and the work we do, offers us very important clues in research and development. Of course, as the leading organization in the sector, we carry out our R&D activities with our advanced medical devices and expert staff, but we start everything in nature.

Speaking of the technical infrastructure of our R&D center; AksuVital serves with its modern laboratories that are open to everyone in the sector in order to give the right to our leading role and responsibility in the sector. With this service, we are trying to protect the reputation of naturalness not only for our own company but also for all companies working in the natural product sector like us.

AksuVital R&D center carries out its works with a qualified laboratory staff

consisting of doctors, food and chemical engineers, chemists, medical and aromatic oils experts. Its laboratory with an area of 600 m² has the necessary technical equipment such as HPLC, GC-MS, atomic absorption etc. to perform all raw material and final product analyses required in the process. Our R&D department produces successful projects together with universities and institutions such as TÜBİTAK, Istanbul University, Ege University, Bezmialem Foundation University and Düzce University, which are among the pioneers of science in Turkey.

AksuVital R&D Center became Turkey's first R&D center in the natural products sector with the approval of the Ministry of Science, Industry and Technology. An average of 15-20,000 analyzes are carried out annually in our R&D center.

We are leading
the way in many
International and
National Areas...

Production

Based on the idea that quality products will be obtained from quality raw materials and will provide maximum benefit, we combine our ability to use advanced technology with raw materials selected from the best regions of Turkey and the world. We take the products that are subjected to the necessary examinations in our laboratories to the production line under scientific and hygienic conditions. We produce by blending the philosophy and goodness of traditional medicine with a modern and technological approach.

As AksuVital, we work in our modern facilities with international standards; we work in GMP (Good Manufacturing Process) quality standards with our expert staff. We apply Halal, ISO 2200 and ISO 9001 quality standards in our facilities.

Leading Brand of Healthy Growth...

Sales Network

Our brand journey started with Yunus Aksu, Chairman of the Board of Directors, carrying honey production into a small workplace. Natural and vegetable products were added to the production that started with bee products. Both product diversity and sales network continued to grow every year. AksuVital, who made Turkey's first in its field, has created a wide sales network at home and abroad by showing a "healthy" growth.

While bringing its products together with its consumers in herbalists, pharmacies, chain markets, cosmetics stores and online sales sites, AksuVital also contributes to the country's economy with its exports to 80 countries.

AksuVital

Traditional Products:

AksuVital is inspired by Avicenna's prescriptions applied for thousands of years and produces traditional products from pure and quality raw materials. The products subjected to quality control tests are on the production line in hygienic and modern facilities. AksuVital improves the quality of life of its consumers with more than 30 years of experience and natural products.

Honey:

AksuVital analyzes the samples collected from high altitude mountains and springs where plant diversity is rich in our country in its high-tech laboratories. As a result of the analysis, honey whose naturalness is finalized is selected and Turkey's most distinguished honey is put into production with this method. AksuVital offers floral honey, pine honey, chestnut honey, vital honey and raw honey that are not subjected to any heat treatment with high standard and quality principle in honey.

*For a natural
and quality life...*

ShiffaHome

We are exposed to traffic, polluted air, turmoil and stress in urban life... We believe that everyone should live a healthy life by eating healthy foods that are intertwined with nature. Although we can't go to nature every day, we know that it is possible to live a natural life with ShiffaHome.

ShiffaHome takes the best raw material in its most natural form and tests it in high-tech laboratories. With its expert staff, it produces under high hygiene conditions and world class. Based on the philosophy that we should include nature and naturalness in our lives for a quality life, ShiffaHome produces tablets, capsules, softjel, syrup, liquid extract, natural oils and herbal teas.

Softem

Softem, which contains many beauties of nature, combines traditional formulas with its innovative understanding. Factors such as stressful city life, air pollution, malnutrition cause the natural appearance of the skin and hair to deteriorate. Softem provides the bright, clean and vibrant appearance you are looking for with its natural content products. For those who want to feel the beauty of nature in their hair and skin, Softem produces natural soap, shampoo, conditioner, hair serum, skin and body oils.

Natural Hekimce

Natural Hekimce delivers the goodness and beauty of nature to the consumer in the closest way to the original. Natural raw materials are taken from their source and tested in the R&D center. It combines the accumulation of the past with today's technology and produces at high quality standards. With Natural Hekimce products, it offers natural solution alternatives for a fit, balanced and conscious life.

We never
interfere with bees.

Apitherapy

Apitherapy is the therapeutic use of bee products such as honey, pollen, propolis, royal jelly and bee venom. The most commonly known method of apitherapy is bee venom therapy. This therapy involves the medical use of bee stings. Melittin and apamine, which are found in bee venom, have a strong anti-inflammatory effect. Apitherapy products contain a large number of pharmacological substances. AksuVital, which started production with bee products, is the first brand to bring many products together with the consumer in this field.

*Believe in the
power of plants...*

Phytotherapy

Phytotherapy is a natural treatment method that means treatment with plants. Phytotherapy based on clinical and scientific research is a branch of pharmacology. It helps in the treatment of diseases and protection from diseases by using the contents and different forms of medicinal plants. AksuVital, the leading brand of natural products, produces phytotherapy products in the light of science.

Aromatherapy

Aromatherapy is the use of essential oils obtained from leaves, flowers, roots and seeds of plants for treatment and beauty. Aromatherapy has a history of thousands of years. Avicenna has included the diagram of the distillation device in his book and explained the characteristics of aromatic plants. Inspired by Avicenna philosophy, AksuVital offers aromatherapy products to the consumer in their most natural form.

Dermo- cosmetic

This is the production of products that help to eliminate and repair skin, hair and body problems with a dermatological approach. The primary goal of dermocosmetic products is to reduce the skin problem. They focus on troubleshooting the area that is desired to look beautiful. It is followed by providing skin care and beautification. AksuVital produces dermocosmetic products with formulas that bring skin health and beauty together.
