

  
**Marwood**  
better office mood

We know that working in an inspiring environment is important for all of us. We are aware that having a comfortable working environment will create positive impacts. Setting exactly from this point off, we combine the forms and materials grasping the spirit of the time. We design flexible and sustainable offices from home-offices to co-working spaces, from private rooms to open meeting halls, responding the hybrid office needs of the era. We present a better office mode for you, your team or institution through tailored solutions to your needs.

# Working Culture

FROM  
NATURE TO  
NATURE

# Sustainable Products

All the wooden materials used in our products are FSC® C114358 certified. We are happy to state our environmentally friendly preferences by keeping loyal to our notion of “Nature to Nature”. We use waterborne coatings made of plant resins and keep the use of chemical compounds minimum.

# Renewable Energy

We supply % 100 of power needs with solar energy. Thus, we have prevented 1.781.273 kg of carbon emission so far. As an organization aware of the limited resources of our planet, we use techniques to prevent waste and increase energy efficiency in our production processes.
