Professional team of 240 people

journey of yarn

Starting to industrialize with the production of fancy yarn and hand knitting yarn in 1974, our company gained the institutional identity as Ipeks Textile in 1986. Ipeks is an integrated establishment which gives direction to the textile sector with its work team consisting of 240 people in a closed area of 17.500 m² and jacquard and dobby weaving, bedspread, fancy yarn, chenille production and yarn dyeing plant departments.

At every stage of production, following the technology closely by using the latest system machines and giving our customers the best service are the priorities of our company.

Having succeeded in becoming one of the leading companies in the sector in a short period of time, Ipeks has taken the "Stars of Export Special Award" given by Uludag Exporters' Association every year for three years successively and continues to contribute to the economy of the country with its proud position.

Our company, which has successfully carried out the ISO 9001 management system since 2011, has thus documented its quality and production discipline.

Our showrooms, where our most up-to-date collections are presented to our visitors' taste, also include our extensive brand archive.

The negotiations are conducted in the "yarn and bedspread showroom" and the "upholstery fabric showroom" by our specialist sales team in the sector.

dyeing plant

In 2000, Ipeks dyeing plant that commenced production with a capacity of 200 tons per month today, increased its monthly production to 750 tons with 16 dyeing boilers capable of dyeing from 2 kg to 2.000 kg and 1.500 cells SSM transfer machine.

Ipeks dyeing plant perform service as a dyeing plant operating full-automation after investment in chemical automation in 2002 and finally investment in dyeing automation. Every stage of production is followed up with computer aided production program and it is shared with our customers up to date.

Having started dyeing plant on 3.000 m² closed area, our company has started to be one of the pioneer dyeing plants on 9.000 m² closed area with its recent investment. The objective of Ipeks dyeing plant, of which the results in customer satisfaction surveys over 90% each year, is 100% customer satisfaction.

weaving

6.500 m² closed area
5.000.000 m production capacity
11-person R & D department

Ipeks weaving, which started production in 2001, now production capacity is about 5.000.000 meters on a 6.500 m² closed area per year.

Silk weaving can produce upholstery, drapery, bedspread in every report length (1-300 cm.) with the latest technology 2400-4800-9600 jacquard and dobby machines. 70% of this production is exported, 20% is marketed to contract projects and 10% is marketed to domestic market.

Ipeks weaving, which very well knows the role of being innovative in today's textile, has become a decisive company in every fabric it produces with the advantage of having a wide R&D department and an integrated facility.

fancy yarn

Started its operating in 1974 with fantasy yarn and hand-knitting yarns, Ipeks yarn today serves to the hand-knitting, drapery, upholstery fabrics and dress companies of the textile industry with the production of 700 tons of chenille yarns and 250 tons of fancy yarns per year on its 2.000 m² closed area with its high technology machine park.
