ABOUT US

When the production and capacity were important a couple of years ago, the take place between the values which must be absolute today. Globalization, institutionalization, fertility environmentalism and satisfaction of the customer emerges in the first area.

Developing technologies are a part of companies which are not easy to give up. Expectations of a production directions which concerns with humankind take place in the centre of functionality, esthetic and design triangle. Effords of people who build the institutions are to bring up a quality productions which are worth to buy them with the high tecnologies.

Our journey started as determined and hopeful in 1970s with this understanding and enrepreneur spirit and maintains 100% native products in the fields of agricultural strife, agriculture and stock-breeding (cattle-dealing) by remaining loyal to principles and visions.

A vibrant, golden field of crops, likely corn or wheat, under a bright sun. The foreground shows detailed, sharp blades of grain, while the background is a soft, hazy expanse of the same field. A semi-transparent white diagonal band runs from the top left towards the bottom right, partially obscuring the scene. The overall color palette is warm, dominated by yellows, oranges, and reds, suggesting a sunrise or sunset.

World's rising brand
in agriculture !
