About Company

NOVA Fabrication offers a wide variety of metal fabrication and machining services. We are a contractor and mainly fabricating Steel, Stainless Steel (Inox) and Aluminium materials.

For 10 years, we have been providing service to 70% Turkish and 30% international companies, mainly in welded manufacturing, gear manufacturing, metal processing and machine spare parts. Starting from its establishment NOVA's goal has been providing services for European companies. We have been working as 100% export for the last 3 years.

During this period we also provided sheet metal fabrications, non-constructural steel fabrications, machining parts and stainless steel fabrications to our clients.

In addition to our two different indoor facilities of 1100m² and 4500m², we provide services to our customers in every field thanks to our subcontractors that we have worked with for many years..

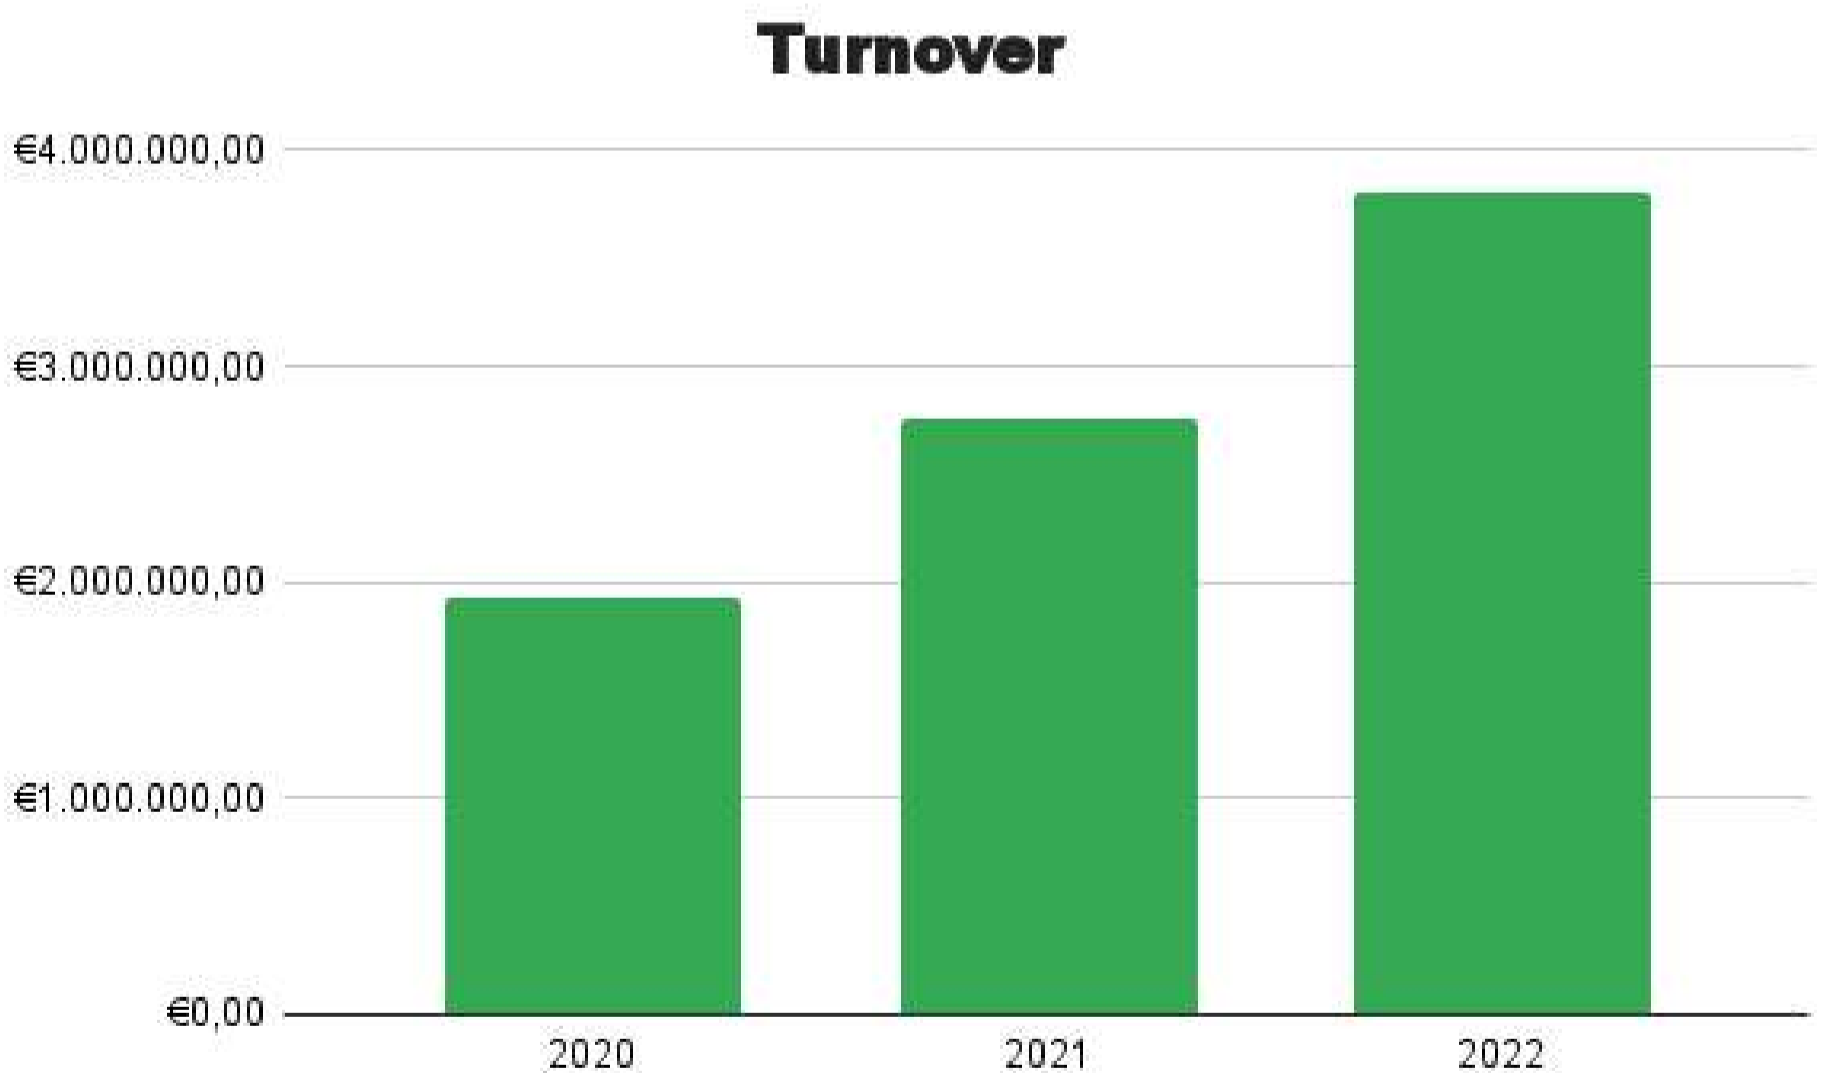

NOVA team consists of 125 people at the moment. There are 9 mechanical engineers, 1 electrical electronics engineer, 1 welding technician, 5 QC officers 3 of which are welding inspectors and 110 blue collar employee at our team. 125 of them are full-time team members, 1 consultant and 3 freelance QC officers.

We are dedicated to customer satisfaction and as a result we have long-term business relationship with our clients.

Turnover

OUR VISION & MISSION

Vision

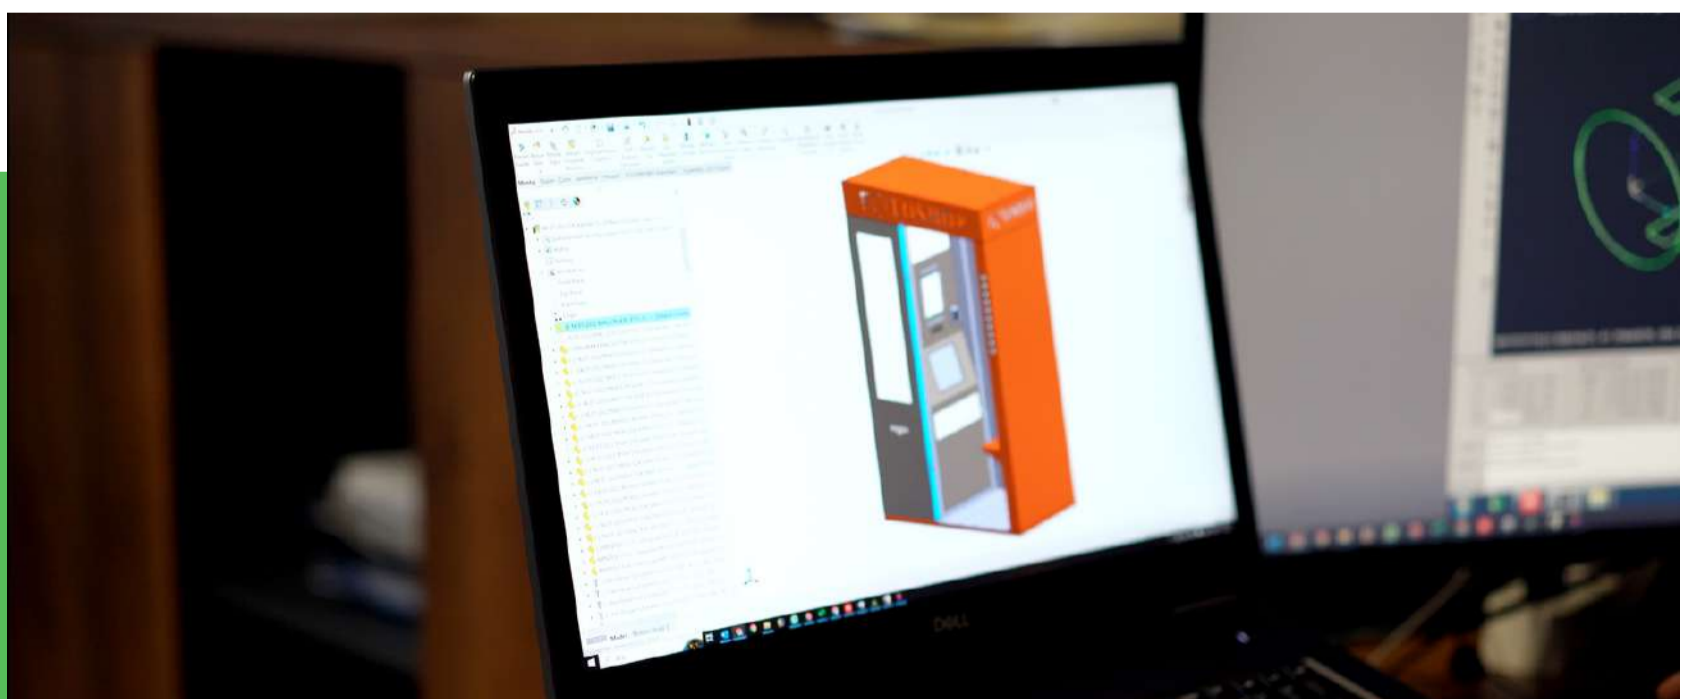

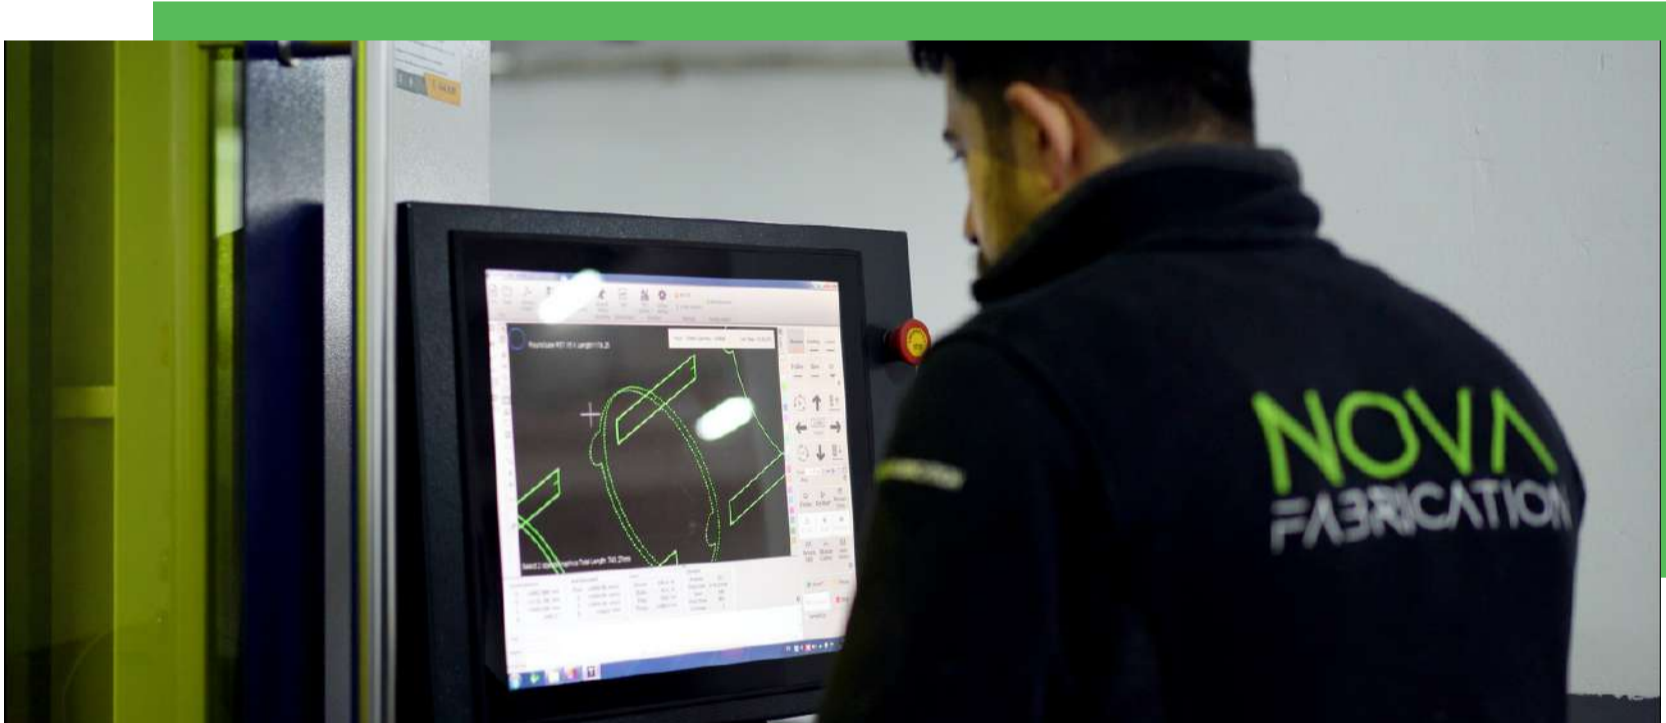

We adopt European standards and understanding of quality from the simplest projects to your most dazzling projects. We produce solutions by using the latest technologies for your special (bespoke) projects, determining the optimal production method, and delivering them on time at the highest standards within the specified budget. We are pleased to be the best supplier preferred by our customers by adopting quality and customer satisfaction in the services we provide. We do not do an average job. We offer our customers first-class solutions. We stand out not with what we do, but with how we do it.

Advantages of Turkey

- Turkish Logistics sector is highly advanced. Competitive prices compared to European forwarders. There are many options and short delivery times.
- Competitive labor prices, low engineering fees. Fabrication costs are lower compared to Europe
- Same metric system, same quality steel materials and same quality standards are used with Europe.

Advantages of Nova Fabrication

- Our prior job and main focus is QC so we became expert and QC is made twice with our business model. With other fabricators QC is made only one time before goods reach you.
- We have a comprehensive and effective quality control system which we will present you in detail during our meeting.
- We are continuously having educational meetings every Wednesday for our technical staff.

Services

As Nova Fabrication

As NOVA Fabrication, we offer a wide range of custom (bespoke) metal services.

Laser Cutting

- Profile & Pipe CNC Laser Cutting

Laser Cutting

- Metal Plate CNC Laser Cutting

Bending

- Press Brake Bending
- Plate Roll Bending

Services

As Nova Fabrication

As NOVA Fabrication, we offer a wide range of custom (bespoke) metal services.

Machining

- CNC Turning
- CNC Milling
- CNC Grinding

Roll Forming for Shelves

- Steel Shelf
- Steel Support

Welding

- MIG/MAG Welding
- TIG Welding
- Robotic Welding

Services

As Nova Fabrication

As NOVA Fabrication, we offer a wide range of custom (bespoke) metal services.

Coating

- Electrostatic Powder Coating
- Hot Dip Galvanization
- Electroplated
- All type Chrome Coating

Quality Control

- Dimension Controls
- NDT Services
- Surface Treatment Controls
- CMM Services

Assembly & Packaging

- Assembly
- Packaging
- Loading
