# WHO ARE WE

We created Comspart by combining our generations of business expertise with more than 15 years of industry experience. Our company, headquartered in Istanbul, provides innovative gas and air compressors, air dryers, filters, compressor parts, sales, maintenance, repair and parts services in the global market.

If you look at our product range and the services offered on our website, you can see that we have the largest infrastructure in Turkey in terms of product sales, spare parts, delivery and repair services. Therefore, our competitors in this field are not companies in the Turkish market, but companies in the European market. This is one of the main features that distinguishes Comspart from others.

We have service networks in many cities across Turkey. Especially in the Western Black Sea region, we serve with a wide range of technical service points.

We have partner dealers in Marmara, Mediterranean, Aegean and Central Anatolia. We also have product warehouses in Istanbul, Düzce and Zonguldak.

Since the day it was founded, Comspart has expanded its product range and increased customer satisfaction with its dynamic structure without sacrificing quality. It has become one of the leading companies in the sector. Our goal is to provide high quality services for our customers in all areas in which we operate.

## MISSION

To provide customers with high quality and the latest technological products in the field of compressed air systems and equipment, adopting an innovative approach

WHO ARE WE

# VISION

- Carrying out an analysis for the sustainability needs and demands of the sector
- Ensuring that you use the right product at the right time by responding to your requests in the best way through this analysis
- Offering high quality products and ensuring customer satisfaction in our services through global and local corporate governance.
- Ensuring that you get the highest performance from our products in the most economical way with our state-of-the-art products and our well-equipped team
- Being a pioneer in sustainable innovation by offering fast and innovative solutions for the needs and problems of the sector

# OUR DIFFERENCE AS COMSPART

## 1- Innovation

Comspart takes advantage of technological advances to create systems and equipment models that can add value and lead the way in terms of quality, energy, savings, safety, and satisfaction. It supports innovation, the bridge to future.

## 2- Energy Saving

Comspart uses the latest technology in Comspart products, providing more efficiency with less energy.

## 3- Competence

To meet the needs and requirements of the sector with the best equipment, Comspart collaborates with experts with the necessary knowledge and expertise in their field.

## 4- Together for the Future

We combine technological advancements with customer needs and satisfaction. Thus, we walk into the future together with perfect customer satisfaction.

## 5- Carbon Footprint

We cannot imagine a future without the world we live in. For this reason, our suppliers ensure that their carbon footprint is as small as possible with their environmentally friendly technologies.

## 6- Sustainability

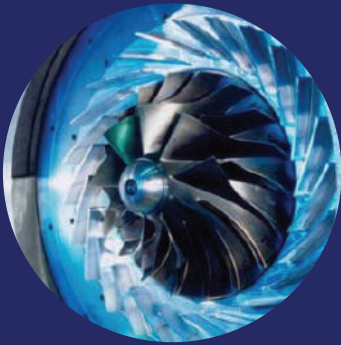

Comspart offers products and services that do not harm the resources of future generations. Therefore, our energy-efficient, cost-efficient, and useful equipment protect both our customers and nature.

## 7- Human Resources

Within the scope of the Comspart system based on trust and teamwork, our experienced engineers, service technicians, and customer coordinators ensure that you get the right service at the lowest cost.

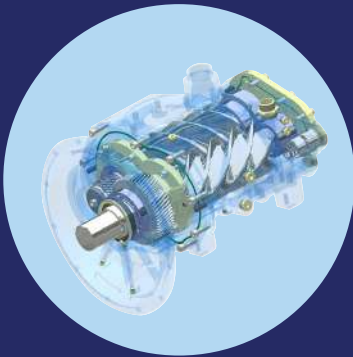

WHY CHOOSE US

## SERVICE PORTFOLIO

- Comspart is one of the companies that offer all the equipment your business needs with the largest brand network.

Spare parts and information are available on our website. In this respect, we are a Turkish company in competition with European companies. We have the largest infrastructure in Turkey and one of the leading companies in the sector.

We use software with the most advanced technology and hardware in the field to provide service follow-up and failure analysis of your compressors easily. So you get maximum efficiency from our products.

# PRODUCT PORTFOLIO

Compressed Air Systems and Spare Parts

- **Compressors**

You can find the most energy-efficient compressed air systems tailored to your needs at Comspart.

- **Compressor Filters**

Not compromising on quality, Comspart ensures sustainability in your production and revenues with filters that are compatible with every compressor model.

- **Air Dryer: Compressor**

It is an integrated solution for compressor systems. It prevents all the problems that moisture can create. Comspart quality ensures the long life of your products.

- **Lubricants:**

Comspart offers lubricants for all models of equipment, so that you can get the highest efficiency from your systems at the lowest cost.

# SPARE PARTS AND SERVICE

Also, we are a leading company with the most extensive network of quality products with a total of nearly 300 thousand spare parts such as vacuum parts, and active alumina. On a global scale, we supply spare parts for all compressed air system brands, and locally, we are at your service with suitable brand equipment and professional service for all companies, projects, and industrial organizations.
