

A step towards creating value all across.
Together, we are co-creators,
co-developers of the future.

HOME TEXTILE
a u s

We are here to change
the dynamics of the textile
industry fundamentally.

Service oriented

Dynamic

Sustainable

We provide stunning home textile products with touch of our design department and product development team.

AUS was established in 2020 under the umbrella of Süzer Textile Group, which has over 50 years of experience in textiles and 15 years of know-how in the home textile industry.

With our experienced engineers, designers, and sales team, we present exquisite fabric collections and tailor-made solutions to our customers.

We believe in the power of collaboration as we are building long-term partnerships in the textile supply chain.

We provide sustainable product range made from carefully selected raw materials with contemporary design approach.

SHAPE THE EXPERIENCES

Our mission is to provide the highest quality home textile products, crafted with passion and attention to detail, while fostering sustainable practices and delivering exceptional customer service, ensuring that every home we touch becomes a sanctuary of beauty and comfort.

OUR
VISION

SHAPE THE FUTURE

Transforming homes into havens of comfort and style, enhancing the living experience by creating exceptional, innovative and sustainable products that inspire warmth, elegance, and a sense of belonging.

Be the part of development
Discover with us

PRODUCTION

Tradition & Innovation combine in production

The umbrella company Süzer Textile Group was founded in 1975 in Denizli , Türkiye. Süzer Textile embraces an innovative approach to fabric weaving and provides flexible production and engineered solutions.

With 45.000 m² of indoor space on a 75.000 m² total production area, Süzer Textile Group produces 4,5 million meters monthly.

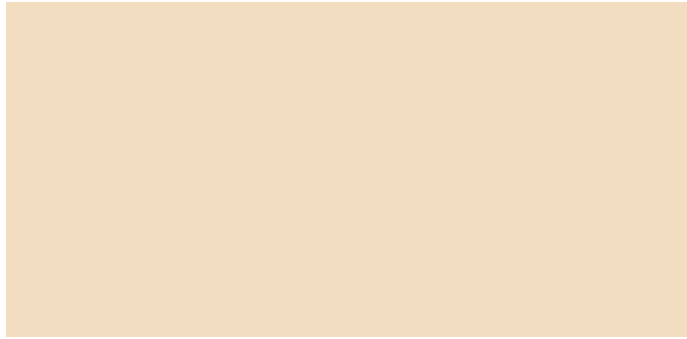

Excellence in production

Quality Materials: We source only the finest materials for our home textile production, handpicking fabrics that are soft, durable, and sustainably sourced, ensuring exceptional quality in every product.

Expert Workmanship: Our home textile production combines the expertise of skilled artisans with advanced manufacturing techniques, ensuring each piece is meticulously crafted to perfection.

Customization Capabilities: Our production offers extensive customization options, allowing us to tailor products to our customers' specific needs, including size, color, patterns, and personalized details.

Solution oriented production

Sustainable Focus: We are committed to sustainable home textile production, implementing eco-friendly processes, reducing waste, and exploring innovative ways to minimize our environmental footprint.

Quality Control Measures: Rigorous quality control measures are an integral part of our home textile production, ensuring that every product that leaves our facility meets the highest standards of craftsmanship and durability.

Inflight Textile

Airlines,
Flight Service Companies

We provide inflight textile products to airlines and flight service companies that ensure seamless travel experiences, offering a combination of safety, comfort, and exceptional customer journey.

A CONSCIOUS PRODUCTION APPROACH

We focus on sustainable, environmentally conscious production with our zero-waste target and strengthen our abilities with innovation, research and development.

We respect to
MOTHER
NATURE

Sustainable Compositions

We develop and produce our fabrics with sustainable cores, including recycled polyester and cotton, linen, lyocell, and bamboo.

Conscious Production

Our production facility and long-term supply chain partners are equipped with sustainable technologies that enable energy and water efficiency, lower chemical consumption, and environmental footprint.

Social Responsibility

We support and create awareness in our region for an ethical and healthy work environment and future.

WATER EFFICIENCY

Rainwater Harvesting System

We collect, store and purify rainwater to reuse during our production.

Efficient Filtering Technology

We equipped our machinery with a new filtering technology that allows us to consume less water.

Closed System

We reuse %100 cooling water with the closed system in the dyehouse.

Wastewater Management

We embrace wastewater management practices that allow us to save water during mercerizing, bleaching, and softening processes.

ENERGY EFFICIENCY

Solar Energy System

We aim to use solar power to generate electricity for our weaving facility.

LED Lighting

We utilize LED lighting to consume less energy and lower the CO2 emissions that come with electricity production.

Insulation

We have heat insulation that allows us to reduce heat loss and reduce our energy consumption.

Daylight

We utilize transparent panels during the finishing process to optimally benefit from daylight.
