

NEW AND GOOD

energy!

HUNDRED YEARS OF EXPERIENCE

Haver Farma's Foundation Story;

Haver Farma İlaç had started its journey under the name "Tıbbi Müstahzarlar Laboratuvarı" (Medical Preparations Laboratory) in a small room of a manor at number 58 in Çengelköy Kuleli Hastane street in the year 1917. This laboratory founded by Brigadier Mehmet Zekai Bey for his son, Ömer Hikmet Bey who was studying in Istanbul University Faculty of Chemistry, was the first "Parenteral Solution" manufacturer of Türkiye. After Osman Rasin Güneyman, son of Ömer Hikmet Bey who had an entrepreneurial spirit, had taken over the business in 1949, four more units were added to the laboratory and it was formed into a modern pharmaceutical factory.

In 1950, through a decision by the family, the laboratory was given the name of the wife of Ömer Hikmet Bey -"Haver" and the business had acquired the title "Haver Laboratories". For long years the enterprise had continued its business at its location in Çengelköy, then due to expansion of the product range, required a larger space, and when it was taken over by Camcı Family in 1982 it was moved to its current location in Beykoz with an indoors area of 32 thousand meter squares and outdoors area of 22 thousand meter squares under the title of "Haver İlaç San. ve Tic. A.Ş."

Based on its rooted past, its qualified human resource and its investments based on high added value technology, our institution aims to increase its capacity utilization and employment rate.
