# Who we are

Artes Metal is a designing and manufacturing company that serves different kinds of organisations, and corporations in various industries.

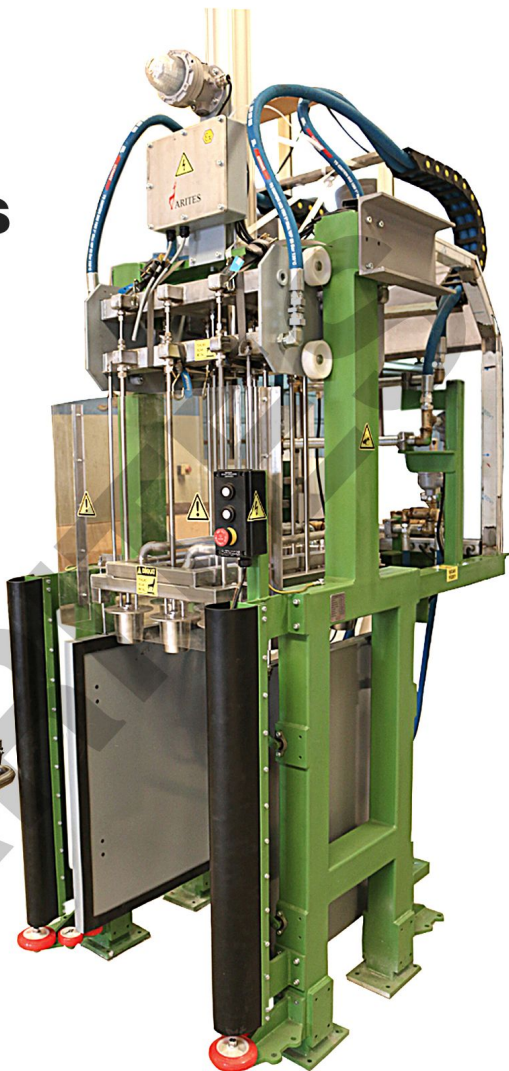

We have been working for more than 35 years as one of the most experienced and qualified companies manufacturing with stainless steel in Turkey.

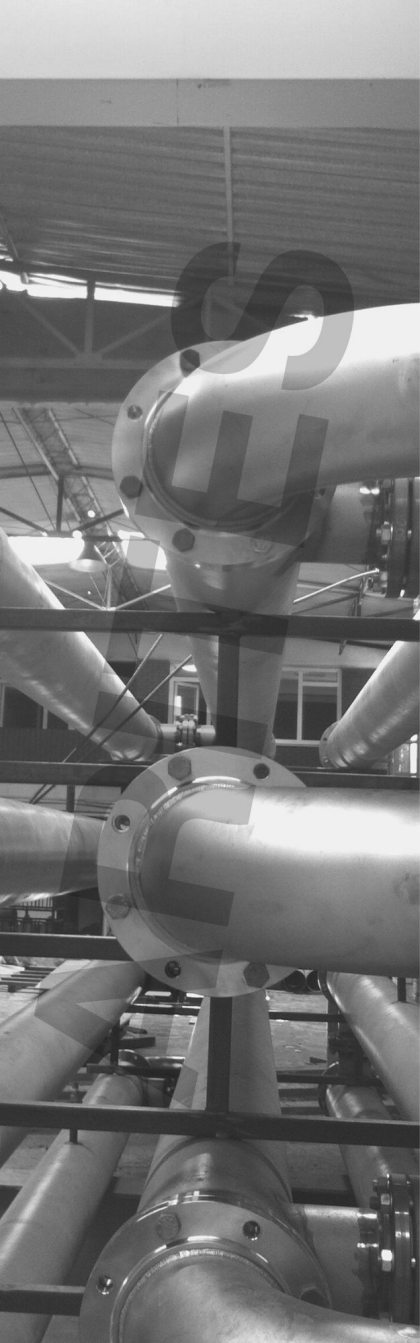

# What we do

In Artes Metal we work to provide specific solutions for your specific projects.

We manufacture and install machines and equipments for manufacturing processes as well as the manufacturing line itself. Reactors, mixers, autoclaves, test cabinets, storage and conditioning tanks are some examples.

# Specific Solutions For Your Specific Projects

# Practice areas

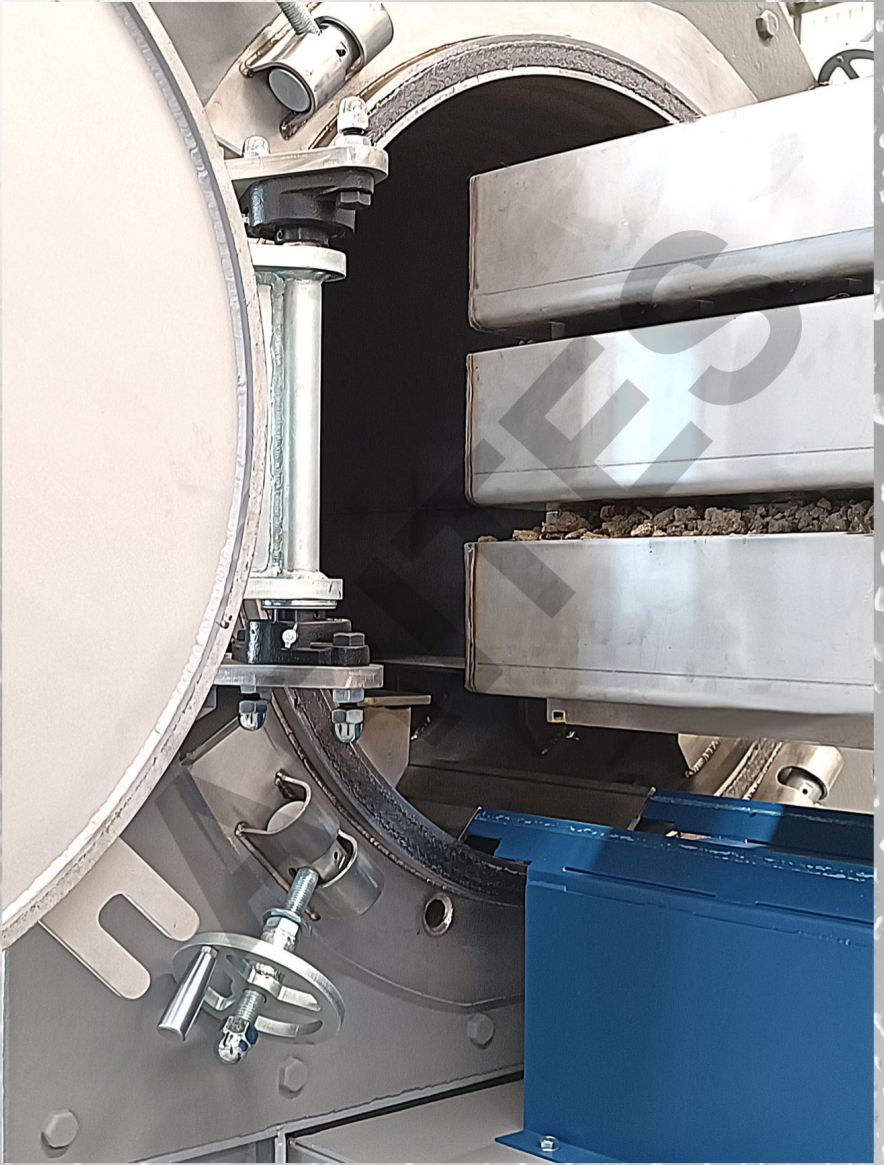

Our company which was founded in 1986, had participated in many projects in the areas of nuclear energy, defence, chemicals and petrochemicals production and processing industries, since 1991. After 2006 by including design process to our capabilities, system and sub-system solutions are added to service range.

Our capabilities on production are

- \* Project based production
- \* Mass production
- \* Manufacturing line
- \* On-site installation
- \* Services after installation

Our capabilities on R&D are

- \* R&D – P&D
- \* Design
- \* Product Development
- \* Prototype Development

# Pressure equipments

We carry out the production of pressure equipments meticulously owing to our experience of many years on welding.

We design and manufacture machines and equipments specific and special to each customer. As ARITES Metal, we come forward with our highly durable manufactures compatible to standards, technical solutions specific to projects and designs that meet the customer needs.

Some examples are;

Reactors, Autoclaves, Propellant Fuel Preparation Units, Heat Exchangers.

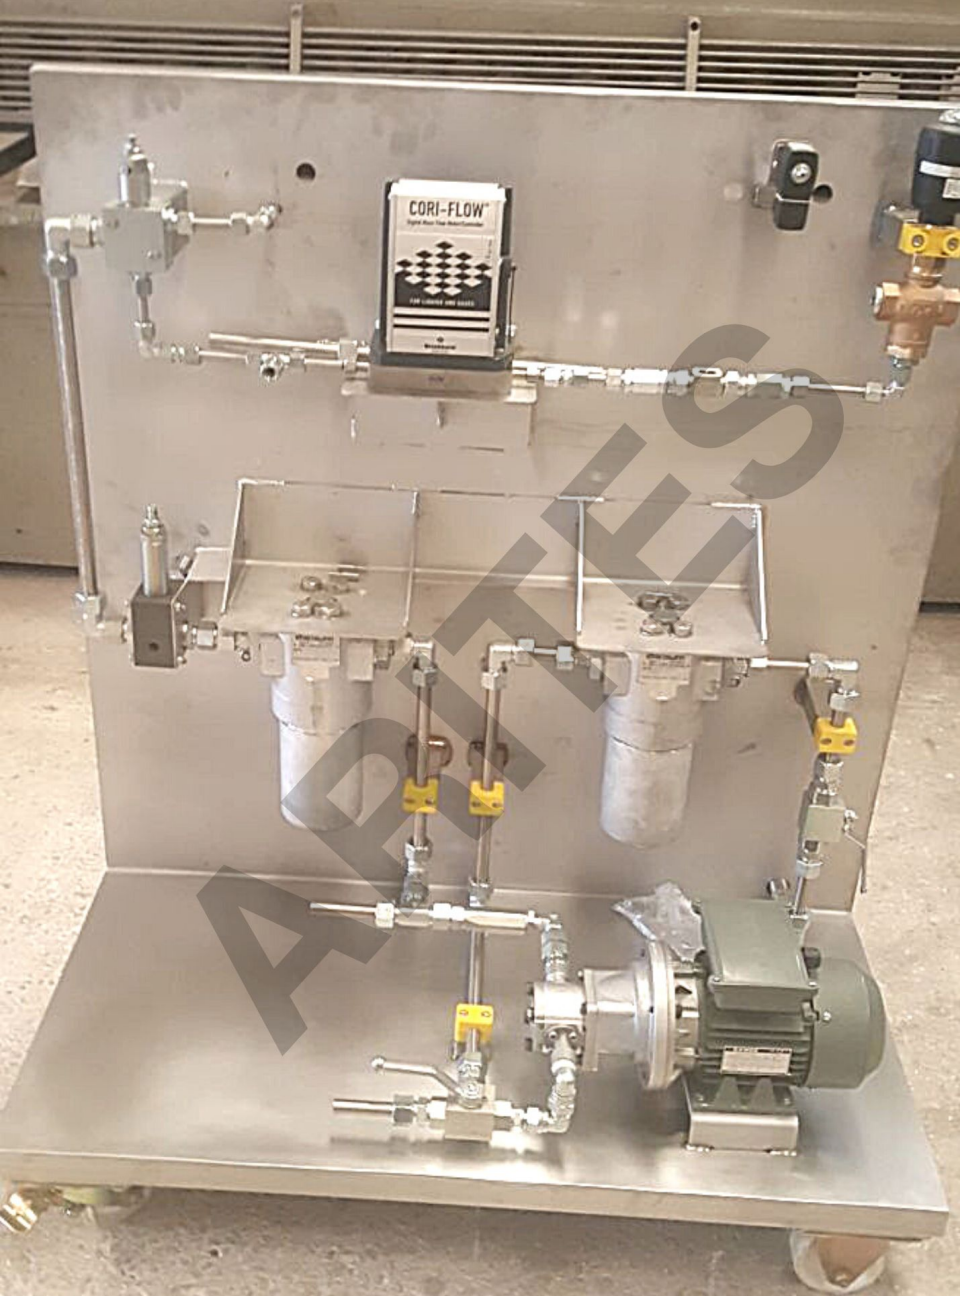

# Specific design machine and equipments

For specific equipment design, customer needs and technical specifications are studied together and the resulting designs are certainly submitted to the approval of customer in order to guarantee the answers to the needs of the project.

In many manufactures, our customers provide their own design. we guarantee the confidentiality of these designs.

# Standards

In Artes Metal, we provide manufacture traceability under the ISO 9001:2015 and EN 3834-2 standards.

We control our design and production for conveniency to ASME, AD MERKBLATT and ATEX regulations. We work with unbiased certification bodies for product certificates, CE and ATEX ZONE.

# Values

- \* Keeping customer satisfaction at high levels
- \* Using the standard requirements at non-standard projects
- \* Attaching importance to human health, environment and nature
- \* Accurate and on-time delivery
- \* Following up to date know-how and technology
