Makes a Difference in Your Bathroom

Quality Is The Choice

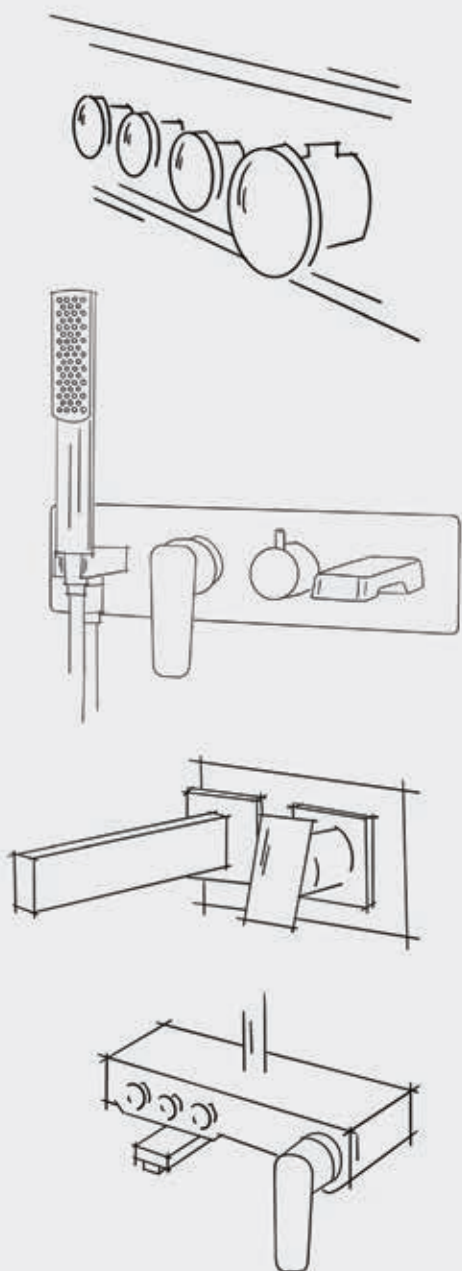

Quality is the ability of a Good or service to meet consumer expectation and requirements.

The most important criterion of determining the quality of a service and a product is the consumer.

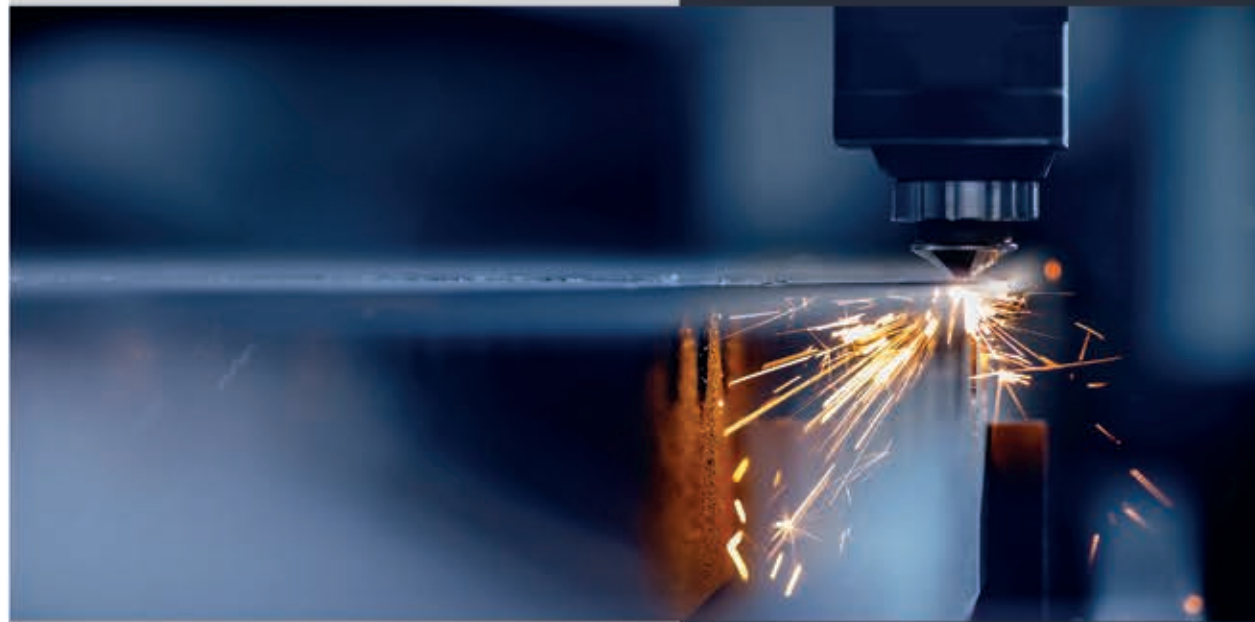

Quality, by depending on the expectations of consumers, is a concept that changes according to the different societies, the cultural development level of a society, habits and appreciations.

Our goal, as TESKA, is to better capture the consumer appreciation and needs and to produce better quality of goods / services than our competitors.

Let's not forget; to do a job faultless is always cheaper on the long term than fixing it later on...

With our innovative product designs and advanced production facility we offer you **Comfort** and **Elegance** together In your bathrooms and kitchens.

TESKA, pioneer and dynamic player in the field of bathroom, washbasin armatures and shower systems with its production experience of nearly a quarter century, started its production life in a small workshop in Adana city and moved the company headquarters to Istanbul city in 2012.

Today in its modern production facility, it develops products that will enrich the bathroom routine by working with teams, each of them are Professional in their own field.

To bring the water together with technology and design; to exist as a holistic part of functional, comfort-oriented, minimal, striking and unique spaces; to grow step by step by developing ideas and products that touch life and soul for living spaces, has always been our main priority.

Designing innovative products that value aesthetics in your bathroom continues to excite us more and more everyday with our uncompromising passion for quality and our benefit-oriented perspective.
