The Company founders have years of experience in the fields of production and marketing have been engaged in commercial activities in the national and international markets in several OEM/OES brands and distributor channels, they are become a reliable Global solution partner by meeting to the objectives and expectations of the customers in all of their activities.

ABOUT US

Today Addent Otomotiv continues to meet customer needs and expectations with the dedicated skilled employes in the 2,000 m² closed and 6,000 m² total area of production plant; Plastic injection, Textile Bag Production and Packaging units are the main departments.

Mission

With the knowledge, engaged employees we always invest into innovative ideas, focus on produce and low cost structure to meet our customers' expectation with the international quality standards and fast service over the expectations of all times. Bring Turkey 's production power into the future in the global area and to have a full committment in order to sustain this contribution.

Vision

To be the number one leading producer of Europe in the Road Safety Products Market, by the same investing values that will be for technology and people at all times.

Warning Triangle

- E Mark Approved
- Essential for Motorists
- Protect yourself during roadside emergencies
- Highly Reflective Triangle warns other Drivers of Hazards on the Road
- By Day a Flame-Orange Fluorescence at night a powerful reflector
- Sturdy Construction, folds away into a protective case
- Quick to set up
- ABS and PMMA material
- Made in Turkey by AddentAuto

Important to remember:

Warning triangles must conform to ECE Regulation R27. Among other things, this regulation stipulates exact minimum values for the brightness of reflectors and daytime visibility. However, visibility is not the only criterion. An ECE-R27 warning triangle must be able to withstand windspeeds of 60 km/h for 3 minutes so that it does not get blown over by a strong wind.
