Nazsan Makina Ltd. was founded to provide gear and spare part solutions for both Turkish domestic and worldwide customers with 30 years of experience in machining sector. With a production portfolio of CNC lathes, CNC work centres, gear grinding lathes, exacerbation, fellow teeth grinder, CNC grinding lathe, cut-off corner, half concave milling cutter and raw material cutting lathes. The production is supported by CAD design and computer aided manufacturing which gives us a production capability and flexibility for a wide range of products. The quality is controlled in each level from sourcing to pre-shipment in our measuring desks.

### QUALITY

We comply with national and international standards, developing technological conditions and customer demands.

### SUSTAINABILITY

For a sustainable and more livable world, we are shaping all our production processes on the basis of sustainability.

### TEAM SPIRIT

With our strong technical team, we work without sacrificing quality in an innovative, dynamic, productive team spirit.
