which makes our business special and
distinguishes us from the others.

COLOUR & QUALITY MASTERY

ABOUT US

Year 1997,

A birth year for IMAK Offset Printing was 1997. As a small developing printing house IMAK Offset was trying to strengthen its position in the market. From year to year the company was gradually introducing new and emerging technological processes. Having the latest technology, IMAK Offset achieved a high position in the market and received an international quality standard.

Today,

Today IMAK Offset has state of the art production base and a team of professionals. We focus on the requirements of our customers. Taking into account the conditions of modern printing market we execute orders at competitive prices without compromising quality of production and delivery terms.

ISO 9001/2000,

Our production is done under ISO Quality and Fogra colour printing Standards. Our company takes place among the top printing houses in Turkey to receive the certificates of The Best Company, International Company, EPA (European Publishing Union). The most striking example of the recognition of these certificates is the trust of our clients of Central Asia, European countries, various international organizations and the World Bank.

Professional staff,

The management of the company pays utmost attention to the professionalism of employees. Our motto is: quality work – quality product – quality profit! Therefore, we choose to employ professionals with a long experience in the field. At the same time, as new technologies emerge both the experienced and new staff go through various trainings, raising the level of skills.

The quality of print,

This catalogue is intended to help you get better acquainted with our company and demonstrate our work and the quality of our print. Design of the catalogue, as well as photographs, layout, digital readout, printing, finishing and binding was done by IMAK Offset production facilities.

Yours faithfully...

Marketing

We'll win together...

IMAK Offset has a highly experienced managerial staff. After a request from the customer is received, the specification of it is taken under careful consideration. The details and timeframe of the request are discussed with production, and only afterwards detailed quotation is prepared. After the order is received, managers are thoroughly checking the files as well as preparing a timeline for its completion. All specifications are entered into a programme that helps not only to receive the most cost-effective price, but also keep an eye on the production stages.

The staff speaks different languages that helps to create an excellent communication with the customers. IMAK Offset has also its representatives in several countries. The regular customers from Europe – United Kingdom, Ireland, Holland, Germany, Belgium, France, Romania; from Central Asia are Russia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan and Tajikistan; and from African Continent – Nigeria and USA. In addition, international organisations such as UNDP, UNESCO, UNICEF, the International Finance Corporation, and International Development Bank are satisfied customers of IMAK Offset printing.

COMPLETE PRINTS WITH TRUE COLOURS...

Colour & Quality Mastery

Pre-Press

XMF Remote Proofing System

European FOGRA colour and printing standards

The department is equipped with the most up-to-date computers and unites a team of creative and experienced designers. This is the place where your ideas materialize. Preparations for printing and colour separations done in accordance with European FOGRA colour and printing standards.

Colour Separation

IMAK Offset has also become one of the first printing houses in Turkey that has received an International Certificate of Colour and Printing Standards FOGRA. The certificate is internationally known as a certificate of quality printing and colour separation. For colour separation in prepress EIZO monitor, EPSON colour test device and IONE monitor calibration device are used. This equipment helps to achieve the FOGRA standards. The colour profiles we use in printing can be loaded in customers' computer that will allow them to see how the final print will look like.

CTP (Computer to Plate)

Imak Offset like many other advanced printing houses uses the direct computer-to-plate exposure. This technology ensures the minimum colour quality loss during the image transfer. This process involves CIP4 protocol that transfers technical values of the image to the control panel of the print machine and the machine performs all necessary colour adjustments automatically.

Press

KOMORI Lithrone S40 8 Colors

Imak Ofset has increased its production capacity by adding 8 colour offset printing machine. Komori 8 Colour printing machine can print 4+4 and 8+0 in one go.

All machines have been calibrated on the regular basis, and attention is paid to very small details.

This machine helps to reduce the printing time and shorten the production. It has a great influence to the delivery time.

Colour & Quality Mastery

KOMORI and RYOBI are fully automatic offset printing machines. The printing process is kept under the strict control by using spectrometer and densitometer and following the European colour scales. We established our own distinctive colour profiles within ICC that conform to ISO Standards.

Japanese printing machine RYOBI 5 colours is used for small formats like 58x78 cm and RYOBI 2 colours 35x50 cm. It also has a similar to CIP 4 automatic control system. There are three printing machines Heidelberg Speedmaster that are used for printing monochrome and two-colour books. These machines provide printing services for the publishing sector with black and white publications.

Bindery, Binding

Bindery is the place where printing turns into art. We are aware of your time and how precious your work is. Based on this, we are able to fulfil your requirements without sacrificing quality and timely delivery, and offer it to our esteemed customers.

Our binding department equipped with folding, automatic gathering, automatic saddle stitching, thread stitching, perfect binding, die cutting and other special effect applications that add value to your printings with our expert staff.

Types of binding

Soft cover

We offer the right solutions for all kinds of jobs with fully automatic, high performance production lines. In the past, operations requiring more processing and manual labour as well as time-consuming operations, our new high-tech machine parks allow faster and better quality production.

Lamination

İmak Offset improves the visual quality of your work which is characterized by the specifications of printed works such as matt cellophane, glossy cellophane, metalized cellophane, silk cellophane, local lacquer, embossed lacquer, sandy lacquer.

Colour & Quality Mastery

Hard Cover Line

Imak Offset that works with professional and qualified staff has always put the delivery time and the quality in the first place. The quality of all printings is under the control before, during, and after printing.

A book which is produced with high quality will make people to read itself. We produce the best quality books with the highest technological machines, fast and faultless.

Packaging and Delivery

The final stage of the process is packaging. At this stage quality of each unit is checked and then packed under terms and conditions of agreement. Then the products are passed to logistics company.

Logistics

Finished products are checked in the production line and grouped in parcels according to requirement, and packed on pallets with stretch film to protect the goods during transport. We ship the goods with our dedicated partners and deliver goods according to the shipping instructions.

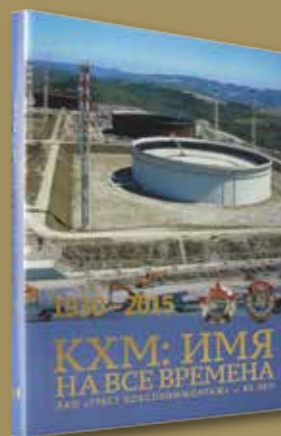

Box Making Workshop

Imak Offset answers its customers' needs in its own facility by establishing lux and fancy box making workshop.

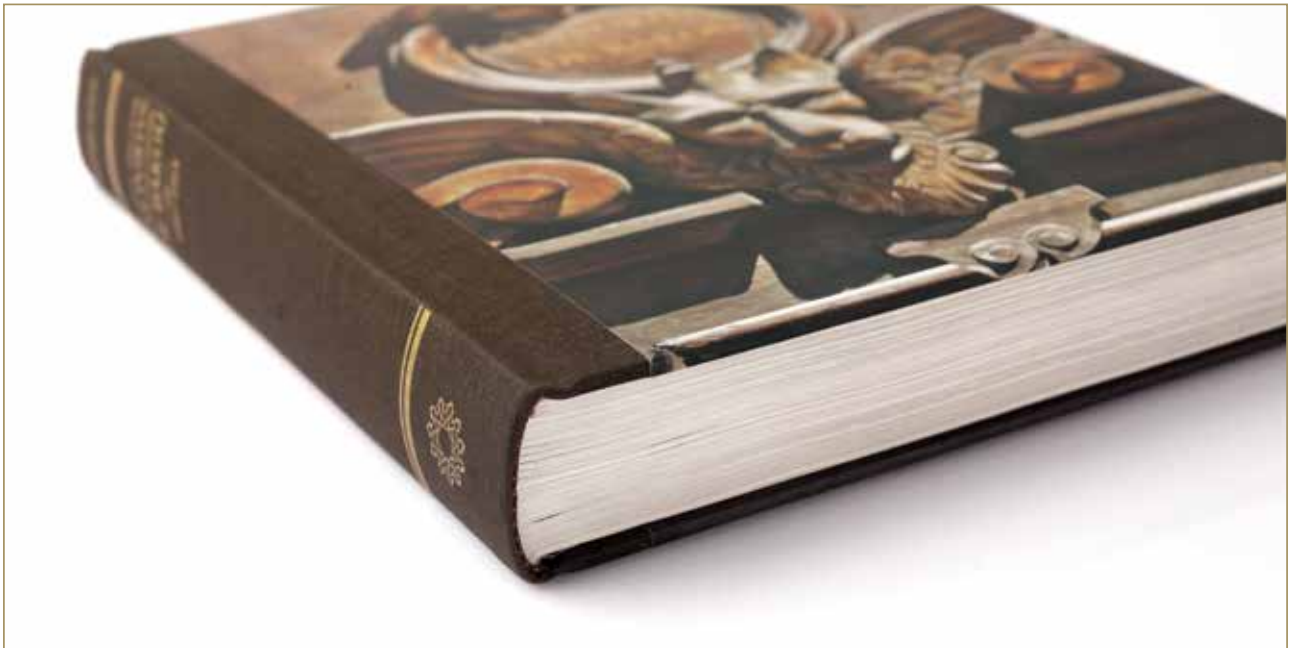

All kinds of lux genuine and artificial leather boxes, or hard copy binding covers can be done in the workshop.

Box Making Workshop serves with Hörauf Case Maker, Glitter Leaf Hot Printing Machine, Cutting Machine with Special Pedal, Sewing Machine for leather Covers, and etc.

Various handmade fancy boxes and covers can be produced in the workshop.

LUXURY BINDINGS

Quality starts with the thought and continues throughout the design and production until the delivery is completed.

With this, IMAK OFFSET realizes the importance of service and production with total quality management.

“

Our production starts with a harmonious dance of colours, every step including design, mold plates, lamination, cutting, binding, packaging and shipment carried out with great care. The secret of our success lies in our principle that is based on the customer satisfaction by producing all forms of print on time and at the highest

More colorful,

More vibrant

The Final Point in Printing quality

No success is accidental. IMAK Offset is founded and run by professionals with long years of experience in the printing industry. Only due to this fact the company has made such significant achievements in such a short period of time, growing from a modest print shop to a full range printing provider ranking high among competitors. We always use quality materials in order to achieve the best result. We wish you further successful cooperation with printing house IMAK Offset!

We respect nature with FSC Certificate.

In order to leave behind a green environment for future generations, we use ethical production methods. The main aim of FSC Certificate is to establish and manage standards for the correct use of forest products in the mainstream world and to ensure that they are independently controlled throughout the process.

Within the scope of social responsibility in IMAK OFFSET, we choose the best quality producers in our material choices, and act ethically in our choice of papers by allowing you to contribute to nature with an FSC certificate.
