KITCHENS FINISH RANGE

Lacquered materials are available in hundreds of color options, you can even customize your own dream color. This magic finish offer a reflective surface with attractive depth of color that increases your design versatility.

VINYL PVC Thermofoil

Thermofoil kitchen cabinet doors are a low maintenance and affordable type of cabinetry that provides the look of painted cabinets and laminated cabinets. They're made out of medium density fiber board (MDF) covered in a thin layer of heat-fused vinyl or laminate that creates a uniform and smooth surface with no color variations or streaks. With wide range of colors and textures available for choice, a thermofoil cover offers a durable and less-expensive alternative to wood cabinets. The thin layer of vinyl or laminate creates a seamless non-porous surface that doesn't hold dirt which makes these types of kitchen cabinet doors very easy to clean.

MELAMINE

A cost-effective option, our woodgrain melamine laminate kitchen range optimises the high-quality associations of a wood kitchen whilst minimising the price.

This finish closely resembles the natural appearance of wood for a warm, stylish and enjoyable living space. Available in various colors, our melamine laminate kitchen doors make a fantastic addition for the home.

These doors also have a highly versatile quality, ensuring a perfect fit when combined with other finishes and styles.

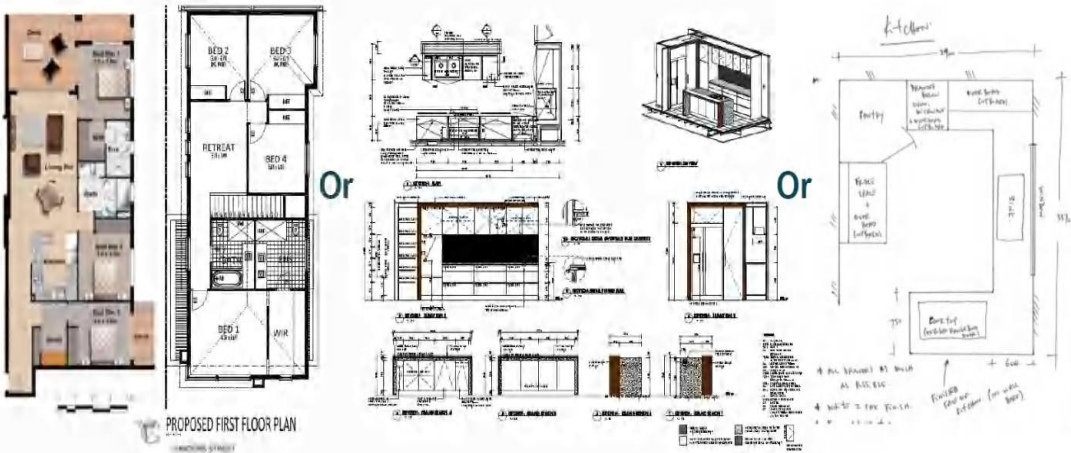

HOW WE WORK

Getting to know the process from sending us your enquiry to getting your dream kitchen and wardrobes.....

Collect information

Collect necessary information about project to have a thorough understanding of every detail of customer's purchasing requirements for better design and solution.
