

DOGAL AS. was established in 1994 in Istanbul, Turkey. DOGAL AS. supplies pesticides and agrochemicals to all customers and farmers with a wide range of high-quality products and professional technical support. DOGAL AS. has become a leading formulator of many kinds of pesticides, plant growth regulators, chelated micronutrients, foliar and drip irrigation fertilizers. We are specialized in manufacturing, registering, and marketing high-quality, cost-effective crop protection solutions products and agrochemicals for agriculture and horticulture.

Regional offices, and our own warehouses in agricultural active regions of Turkey are always ready to give service and technical support to customers through more than 40 agronomists.

DOGAL AS. formulation & filling plant is located in Antalya, South of Turkey with a modern quality control laboratory licensed by the Turkish Ministry of Agriculture in Antalya Organized Industrial Zone.

Our portfolio includes more than 200 registered pesticides and plant growth regulators, foliar, drip irrigation and single micronutrient fertilizers certified by The Turkish Ministry of Agriculture.

There are current and novel formulation and filling lines, such as SL, LS, EC, SC, FS, CS, OD, WP, DS, SP, EW, FF, Tablet and Powder and DF/WDG formulation units under development with collaboration of Turkish Scientific Institution.

DOGAL AS. is an ISO-certified company with certification for ISO 9001:2015 Quality Standard, ISO 14001:2015 Environmental Standard and OHSAS 18001 Occupational Health and Safety Management Standard.

Turkey is an OECD Country and an associate member of EU.
Able to issue ATR and EUR 1 certificates.

## DOGAL AS.

Quality Assurance
From seed to harvest...
Your 'Best Partner' in agriculture.

- High Quality, Cost-effective, New Generation Products
   Sustainability
  - Production strictly as per specification
     Strong Business Partnership
  - ♣ Best Service & Professional Technical Support
- Highest international quality standards (ISO accredited).

## Registered Insecticides in Turkiye

DOGAL TRADE NAME	ACTIVE INGREDIENT
AKUTAN 35 WG	Chlorantraniliprole 35% SC
APACHE 50 EC	Pirimiphos methyl 500 g/L EC
APRAUNT 400 SC	Buprofezin 400 g/L SC
BEKCHI 5 SG	Emamectin benzoate %5 SG
BERSA EW 240	Tau-fluvalinate 240 g/L EW
CORAGGIO	Acetamiprid 200 g/L SL
DEKAGARD 5 SC	Deltamethrin 50 g/L SC
DEKAGARD EC 25	Deltamethrin 25 g/L EC
DOGAL SUMMER OIL	
	Mineral oil 850 g/L SL
DOXIN 100 EC	Alpha-cypermethrin 100 g/L EC
DUMBLE 40 EC	Dimethoate 400 g/L EC
EGGMEN 200 SC	Chlorantraniliprole 200 g/L SC
FLOMICE	Metaflumizone 240 g/L SC
GRIVA 50 WG	Flonicamid 50% WG
JUDO 5 EC	Lambda cyhalothrin 50 g/L EC
JUDO EXSTRA CS	Lambda cyhalothrin 50 g/L CS
MAJESTE 20 EC	Esfenvalerate 200 g/L EC
MATADOR 250 EC	Cypermethrin 250 g/L EC
PALAMIN 50 WG	Pymetrozine %50 WG
PANZHER	Primicarb %50 WP
PUERTO SC 100	Spirotetramat 100 g/L SC
RASAT 93 SC	Indoxacarb 75 g/L + Abamectin 18 g/L SC
REA 800	Mineral oil 800 g/L SL
ROCKET 20 SP	Acetamiprid %20 SP
SAPHO	Spinosad 480 g/L SC
SATIR	Methoxyfenozide 240 g/L SC
SERVANT 150 SC	Indoxacarb 150 g/L SC
SERVANT WG	Indoxacarb %30 WG
SPIRON	Pyriproxyfen 100 g/L EC
TRELON 65 EC	Malathion 650 g/L EC

# Registered Acaricides/ Miticides

DOGAL TRADE NAME	ACTIVE INGREDIENT
CONTEST EC	Abamectin 18 g/L EC
ETON	Etofenprox 50 g/L EC
KARIA 20 WP	Tebufenpyrad 20% WP
LADON SC 240	Spiromesifen 240 g/L SC
PIRENE	Bifenazate 240 g/L SC
POLE 500 SC	Clofentezine 500 g/L SC
REFEREE 5 EC	Hexythiazox 50 g/L EC
SEZOX	Fenpyroximate 50 g/L SC
SPIDER 20 WP	Pyridaben %20 WP
TARAS SC 240	Spirodiclofen 240 g/L SC
TAZOLE	Etoxazole 110 g/L SC

**DOĞAL AS.** Was established in 1994 in Istanbul, Turkey. It supplies agrochemicals to all customers and farmers with a wide range of high-quality products and technical support.

**DOĞAL AS.** Is one of the leading formulators, producers and exporters of pesticides, agrochemicals, plant growth regulators, chelated micronutrients, and general foliar and drip irrigation fertilizers.

SUPERTONIK	Nitrophenolate mixture 6 g/L SL	
ULTIO	Ethephon 480 g/L + Cyclanilide 60 g/L SC	
U LTIO PRO SC 765	Ethephon 720 g/L + Cyclanilide 45 g/L SC	
VULCANO GOLD	Gibberellic Acid 20 g/L SL	

**OUR VISION;** To become the most reliable formulator and distributor of Agricultural Inputs in Africa, the Middle East and CIS countries with our superior formulation technology and R&D capability. To have a strong reputation for producing and exporting products with European quality and packing and prices better than Europe.

**OUR MISSION;** To provide high-quality products at competitive prices along with Marketing and Developmental Support for old as well as new formulation chemistries to our customers.

Turkey is an OECD Country and an associate member of the EU. We are able to issue ATR and EUR 1 certificate for loadings.

We are an ISO 9001, ISO 14001 and OHSAS 18001 certified company engaged in the manufacturing of pesticides, fertilizers and other agrochemicals.

## **OUR SPECIAL FERTILIZERS**

DOGAL' Trade Mark	Picture	Content and technical summary	
SUPEROZYME Liquid (Special liquid seaweed with nitrogen)	SIG SALTE	Seaweed Extract Added Liquid Nitrogen Organomineral Fertilizer Liquid seaweed is an organometal special fertilizer supplemented with nitrogen. It also contains natural and organic components. It contributes directly to plant development, makes other fertilizers work better, affects and increases yield, strengthens roots, and increases flower quality.	
Zn COMMANDER 5.5	Disputices S	5.5% Zinc Fertilizer – (100% EDTA Chelated) It is used in all areas with zinc deficiency, it increases the development of green parts and the resistance of the plant, its formulation is special, it is not easily washed off by rains, and it is the best zinc liquid fertilizer with 100% chelate that is beneficial for the plant.	
B COMMANDER	COMMENCE	9% Boron Ethanolamine Liquid Fertilizer It is used in all areas with boron deficiency. Helps zinc work more effectively, It is necessary for seed formation, fruit set, pollen health and fertilization. It aids in the formation of hormones (especially auxins). It affects cell division.	
Ca COMMANDER	COMMANDER ALCOSTOTIS Williams	14.2% Calcium Nitrate Liquid Fertilizer Calcium is essential for plant health, root and leaf growth and strong fruiting. It is located between cells. It strengthens the cell wall. It is necessary for normal flowering and root development. It helps in the uptake of nitrates. It increases the plant's resistance to diseases, drought and stress.	
Cu COMMANDER	CONSTRUCTION TO THE PARTY OF TH	6% Copper Fertilizer - (100% EDTA Chelated) It is necessary for the formation of chlorophyll. It regulates carbon dioxide uptake and is effective in photosynthesis. It is found in the structure of many enzymes. It is important for protein production. It is a catalyst for respiration. It provides balancing of water movement in the plant. It takes part in the formation of the cell wall. It is necessary for normal flower formation and seed production.	
COMMANDER NP+Zn	COMMODIFICATION OF THE PROPERTY OF THE PROPERT	5% Nitrogen + 25% Phosphorus + 5% Zinc Liquid Fertilizer  It is a special liquid fertilizer containing 5% Nitrogen + 25% Phosphorus + 5% Zinc. It can be applied to leaves and soil. It is very important for root development. It directly contributes to fruit development and yield. It should be used in the first developmental stage of the plant. It can be applied foliar, with a drip irrigation system and root. Due to its special content, there is no need to use a spreading adhesive. One of our plant growth regulators, Megafill tablets can be used in the early-first grown period, and the later growth periods, after flowering, by mixing with Super Artiran.	
COMMANDER NP+Zn+B	COMMANDER Light and the command of	5% Nitrogen + 20% Phosphorus + 1.2% Zinc + 0.9% Boron Liquid Fertilizer  It is a special liquid fertilizer containing 5% Nitrogen + 20% Phosphorus + 1.2% Zinc + 0.9% Boron Liquid Fertilizer, it can be applied from leaves and soil. It is very important for root development. It directly contributes to fruit development and yield. It must be used in the first developmental stage of the plant. It can be applied foliar, with a drip irrigation system and root. Due to its special content, there is no need to use a spreading adhesive. One of our plant growth regulators, Megafill Tablet can be used in the early period-first growth period, and after the flower, it can be used by mixing with Super Plus.	
HUMISUPER PLUS (Liquid form special soil conditioner)	Description of the second of t	<ul> <li>15% Humic-Fulvic Acid + 7.5% Potassium + 15% Organic Matter</li> <li>HUMISUPER PLUS is a preparation containing humic and fulvic acids, together with phosphorus and organic matter, and is a specially synthesized natural soil conditioner produced from a Leonardite coal source.</li> <li>Increases plant development and yield.</li> <li>With its regular use, it dissolves the hardening in the soil and enables the plant to root more easily.</li> <li>It regulates the movement of water and air in the soil and makes it available to the plant.</li> <li>Increases tolerance against excessive sodium in the soil.</li> <li>It chelates the nutrients available in the soil and ensures that they are taken up by the plants. It releases iron ions and other nutrients.</li> <li>By increasing ion exchange in the soil, it liberates phosphorus, calcium and trace elements held by clay minerals and enables them to be used by plants.</li> <li>Increases the microorganism activities in the soil. It helps the seeds to germinate in a short time. It regulates the physical, chemical and biological properties of the soil and enables plants to develop healthier and stronger. Thus, it increases quality and efficiency. It also ensures longer storage after harvest</li> </ul>	

# GEL FORM, NEW TECHNOLOGY, NPK BASED COMPLEX, SPECIAL DRIP IRRIGATION, SOIL & FOLIAR FERTILIZERS

### **MEGATRON**

NPK Series Class A Liquid-Gel Special Fertilizers

NPK 25-0-0	15 Kg
NPK 17-5-5 + 2MgO + Trace Elements	15 Kg
NPK 9-7-7 + 2MgO + Trace Elements	15 Kg
NPK 7-17-5 + Trace Elements	15 Kg
NPK 5-0-20 / Potassium Master + Trace Elements	15 Kg

Class A - Fertilizers in the form of a liquid gel, specially produced by DOĞAL AŞ, which contain nitrogen, phosphorus, potassium, valuable enzymes, amino acids and trace elements for plants by European standards. In this group, there are special mixtures to meet the needs for nitrogen - phosphorus - potassium, both separately and in a balanced way. It can be safely used for all plant groups in soil application, drip irrigation and foliar application. It has a direct impact on the yield, health and quality of plants.

### DRAGON

NPK Series Class B Liquid-Gel Special Fert.

Balanced 6-6-6+ 2MgO	15 Kg
With Phosphorus 3-9-3	15 Kg
With Potassium 3-0-13	15 Kg
With Nitrogen 9-3-3+ 2MgO	15 Kg

Class B - Liquid gel fertilizers specially produced by DOĞAL AŞ, which contain valuable enzymes, amino acids and trace elements for plants, together with a high level of nitrogen phosphorus potassium. In this group, there are special mixtures to meet the needs for nitrogen - phosphorus - potassium, both separately and in a balanced way. It can be safely used for all plant groups in soil application, drip irrigation and foliar application. It has a direct impact on the yield, health and quality of plants.

Your 'Best Partner' in Agriculture.

Quality assurance...

From seed to harvest.
