

MRL 5000 REBAR SHEAR LINE

- It works with a total of 40kw electrical power, 7 bar air power.
- The total length is 19 meters, with a 12 m feeding table, 11 m chain stand, 1 m cutting unit, and 6 m measuring stand.
- The machine consists of 4 parts. Thanks to the plug-in electrical wiring system, assembly and disassembly processes are quite simple.
- Assembly and disassembly processes take a maximum of two hours while the machine is being moved to another area.
- Thanks to easily available spare parts for our machine; It has easy maintenance and repair possibilities.
- The machine can cut an average of 50 tons of rebar with two people per day.
- The machine can work outdoors, in severe climatic conditions.
- It has a stocking capacity in 6 different stock sections after cutting irons of different lengths and diameters.
