LAMINATE

Parquet

Laminate flooring is a very special product because of its innovative surface structures, wooden or stone floors-like appearances and the feel it gives in offices, shops or hotels as well as in homes and homes. You can express your personal furniture style in an impressive way by using laminate flooring with a wide variety of classic and trend-setting decors.

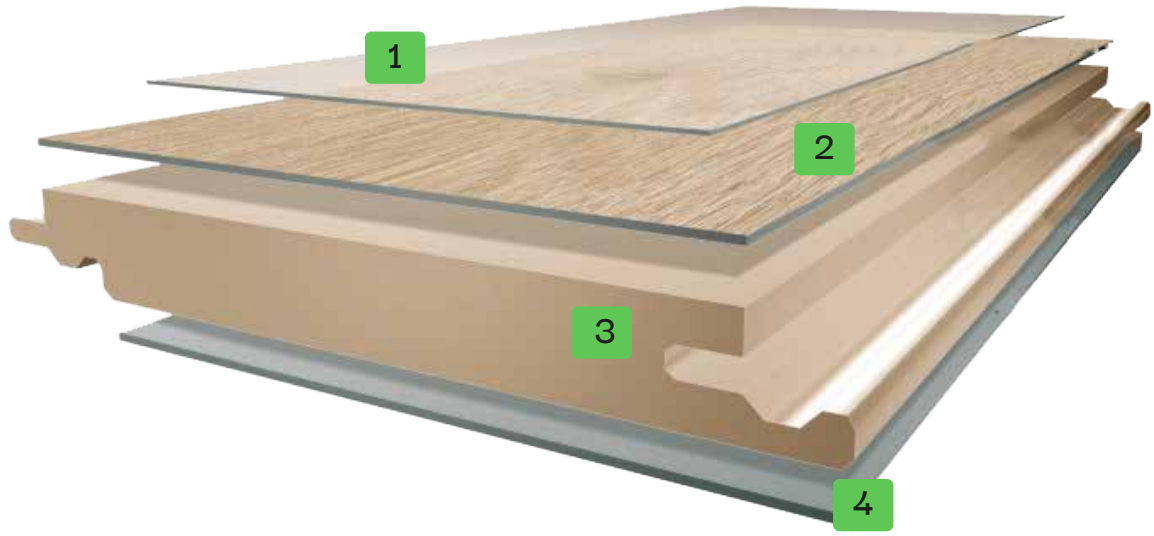

- Timeless elegant bladder decor ,
- Contemporary wood look,
- Surprisingly realistic textures of different types of wood or stone,
- Fashionable adaptations,
- Glossy or matte,

Laminate Flooring is durable. It is very easy to clean and install.

Features

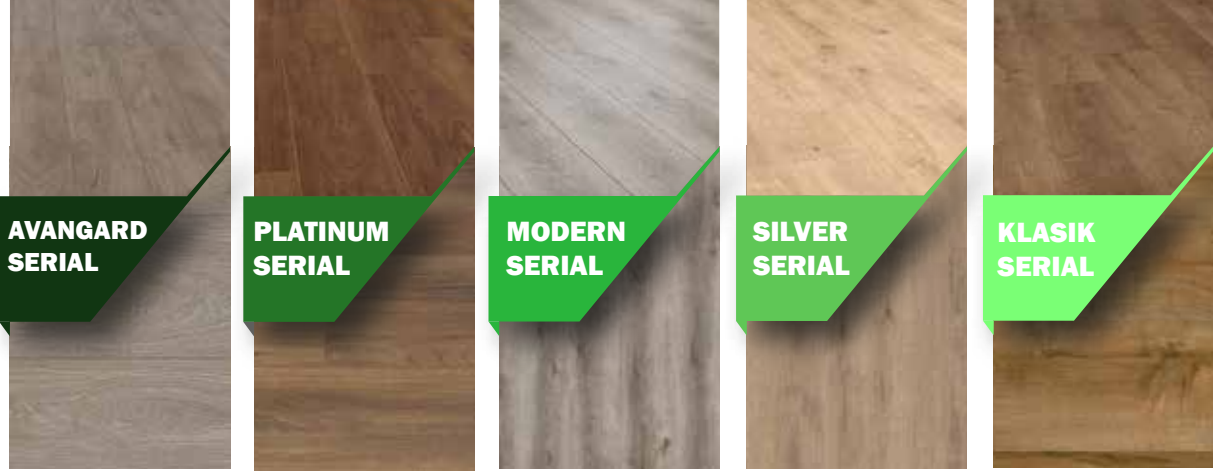

- Hygienic
- It maintains its superior form for many years.
- It can be easily disassembled and reassembled as it is locked.
- Easy to clean.
- Scratch resistant.
- It is resistant to UV rays.
- Resistant to household chemicals.
- It complies with E1 norms. It is healthy.
- It saves heat.
- It does not stain.

TECHNICAL STRUCTURE *Of Laminate Flooring*

- 1 Overlay:** The top surface of the parquet is covered with a very special and robust film layer that increases protection. This layer is mixed with a nice-looking decorative film layer to obtain a hard wear-resistant surface.
- 2 Pattern Paper:** It is a layer of paper film printed with advanced technology, which can be made from quality wood raw material in infinite color and patterns.
- 3 HDF:** A water-resistant fiber plate that does not contain carcinogenic substances at high intensity. It should not contain carcinogenic substances according to ISO and DIN norms
- 4 Balancing Paper:** The cellulosic paper film layer that provides stabilization.
