ABOUT SÜTAŞ

Sütaş, founded in 1975 in Bursa, Turkey is a dairy company, focuses only on dairy and the dairy value chain. With the mission of contributing to the health, quality of life and happiness of people, we produce natural and delicious dairy products and work with our 7,500 employees to share the goodness and abundance of milk. Today, we process 1.3 billion liters of milk per year in our 4 integrated production facilities located in Turkey as well as plants in Northern Macedonia and Romania and offer 91 different products to our consumers. In 2021, we have doubled our export compared to the previous year and increased our reach to 41 countries, including China, Egypt, The Netherlands, Germany, Azerbaijan, USA, Japan, UAE, Qatar, Libya, Iraq and Kuwait.

While we specialized and deepened in dairy, we developed the strategy of "Farm to Table". With our integrated business model, we manage and control the process from the feed of the cow to the consumer's table. Thus, we ensure the naturalness, taste and nutritional values of our products.

In line with this unique business model, in addition to factories of milk and dairy products, we also establish breeding farms, concentrate feed plants, training centers, application farms, dairy products factories, energy and fertilizer production plants in each of our facilities.

We combine our craftsmanship and expertise in our production approach and new product development strategy. We established the first R&D Center of our sector in the region; besides developing dairy products, we also carry out R&D and application projects for increasing efficiency, Industry 4.0 and digital transformation.

Thanks to our unique "Farm to Table" business model;

- We guarantee continuous food supply with our established system and capacity for our consumer.
- We ensure food safety by controlling and standardizing every step of the value chain.

OUR MISSION

In order to provide natural and delicious dairy products that improve people's quality of life and bring them health and happiness, we manage and develop the dairy value chain "from Farm to Table" and the resources entrusted to us in the most efficient way, with the passion of sharing the goodness and abundance of milk.

OUR VISION

To become the most loved brand, the most trusted corporation and the leading company in dairy sector.

FARM TO TABLE BUSINESS MODEL

We ensure the naturalness, taste and nutritional value of our products with our unique "Farm to Table" integrated business model.

We integrate, monitor and audit the whole dairy value chain from the feed of our cows to the farms they live on; from the milk they give to the products that come to your table.

Our farmers produce forage crops on a contractual basis for our cows. We support and train our farmers, from the selection of forage plants suitable for the soil, to the application of efficient irrigation systems and to the supply of organic fertilizers.

We have been providing free training and consultancy services to producers, students and entrepreneurs since 1998 in our Training Centers in order to make dairy farming in our country healthier and more efficient.

We produce hundreds of different dairy products, preserving their naturalness and intrinsic values, from milk whose hygiene, protein, mineral and fat ratios are in compliance with our quality standards.

We deliver our products to sales points by maintaining the cold chain with our vehicles whose route and temperature level are constantly monitored.

CRAFTSMANSHIP AND EXPERTISE

Dairy business requires both craftsmanship and expertise. Producing naturally tasty dairy products is a mastery, however delivering these natural products to millions of tables in a healthy and fresh manner, requires expertise. At Süttaş, we use international quality management standards at every stage, from procurement and production to packaging and delivery to ensure the food safety of our products. We monitor each and every stage of the production both in real-time and retrospectively. Our expertise in milk provides the competency to produce new dairy products pleasing the palate of young generations and suitable to the conditions of modern life. We have been an innovative force in the milk and dairy products sector since the day we started. Süttaş has pioneered the production of packaged ayran, churned butter, baby yogurt, tubed fruit yogurt for children, UF white cheese and many other products in Turkey. One of our objectives is to offer new tastes so that people can benefit more from dairy products.

CORPORATE GOVERNANCE

Corporate Governance Principles form the basis for our values and priority-setting, our processes and procedures, the powers and responsibilities of managers and the rights of our stakeholders.

We stand by the principles of fairness, transparency, accountability, and responsibility. We cooperate with regulating and auditing bodies to integrate our Corporate Governance Principles to our business conduct.

We develop and strengthen our corporate structure in the light of our values and in line with universal corporate governance principles.

SÜTTAŞ IN NUMBERS

Dairy Business has been the sole focus of our operations since our establishment

We deliver the natural tastes of Süttaş, produced at our

4 integrated facilities, located in Aksaray, Karacabey, Tire and Bingöl in Turkey.

We are definitely in every

8 out of 10 households.

We've been a leading dairy brand in Turkey for **17 years.**

(Nielsen)

We were granted the corporate governance award in the last **6 successive years.**

(Corporate Governance Association of Turkey, "The non-public family-owned enterprise with the highest corporate governance score" award)

We are the most reputable dairy company, **57th** largest industrial enterprise in Turkey

(SIA Insight, Corporate Reputation Survey Istanbul Chamber of Industry, Turkey's Top 500 Industrial Enterprise Survey)

We are Turkey's most loved dairy products brand.

(LoveMark survey, IPSOS)

OUR QUALITY POLICY

Quality at Süttaş is not only managed during the production process, but in the whole of the supply and distribution chain, as required by a valuable food that needs to be well preserved like milk. We continuously provide free trainings for students and for dairy farmers in order to obtain efficient production of higher quality milk. Our perspective is to process the milk in the most hygienic conditions while maintaining its nature as it is, to produce naturally tasty dairy products and to deliver them to tables in the most healthy and convenient packaging, without breaking the cold chain.

OUR FOOD SAFETY POLICY

At Süttaş, we stay up to date with scientific and technological developments and follow the latest trends. We monitor and review new and changing legislation. Our purpose is to offer "safe food" to our customers and consumers through the implementation of an efficient food safety management in all stages of product realization process and ensure its sustainability with continuous improvement. We procure the highest quality milk, produce in compliance with the highest hygienic standards and use the most advanced production technology to produce the most natural and tasty products. In full compliance with the Veterinary Services, Plant Health, Food and Feed Law No. 5996, Süttaş monitors and audits all the steps with its unique, integrated business model "Farm to Table."

OUR CERTIFICATIONS

ISO 9001 Quality Management System: This system helps to continually monitor and manage quality across all operations, and outlines ways to achieve, as well as benchmark, consistent performance and service. It provides a framework and set of principles that ensure a common-sense approach to the management of the organization to consistently satisfy customers and other stakeholders.

FSSC 22000 Food Safety Management System: The FSSC System is designed to provide with an ISO based FSMS certification that is recognized by the Global Food Safety Initiative (GFSI). The FSSC 22000 system uses a management systems approach to food safety, employing ISO 22000 for the management system requirements and ISO Technical Standards for program prerequisites.

ISO 14001 Environment Management System: ISO 14001 is a standard designed to help businesses remain commercially successful without overlooking environmental responsibilities and impacts. It also helps to grow sustainably while reducing the environmental impact of this growth.

ISO 50001 Energy Management System: The main objective of the standard is to improve energy-related performance and energy efficiency continuously and to identify energy reduction opportunities.

OHSAS 18001 Operational Health and Safety System: This standard helps to put in place the policies, procedures and controls needed for the organization to achieve the best possible working conditions, aligned to internationally recognize best practice. It exists to help put in place demonstrably sound occupational health and safety performance.

SÜTTAŞ IN NUMBERS

We improve the fertility of
50,000
decarees of soil every year.

We produced
45,000
tons of organic
fertilizer from the
outputs of our
energy plants.

400,000
tons of concentrate
feed per year in
feed plants,

Production of forage
and fodder crops on
34,000
decare field

We compensate
84%
of our electricity needs with
renewable energy
which we generate from the fertilizers of
our farms and the organic wastes of our factories.

With our energy efficiency
actions, we have saved
26 million
kWh of energy in the last five years.
This savings are equal to the
annual electricity consumption of
9,400 households.

We hold the
responsibility of
sustainable
management
and efficient use of natural resources,
and of circulating the resources back
into the system.

Greenhouse gas reduction
through our sustainability operations
since 2013 equivalent to the
amount absorbed by

31.3 million
trees.

We are getting closer to our
zerowaste target every year.

We used
439
tons
less packaging
materials.

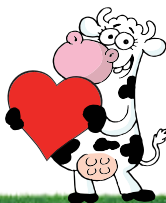

First R&D center of
our industry with
34 engineers.

With the highest number of patent applications,
we are in the first place in the Milk and Dairy products
sector and in the third place in the food and
beverage sector.

The Farm of Happy Cows

All our farms are disease
free and EU-certified
Dairy Farms.
The welfare of our cows is a top
priority. We manage our farms,
observing "The Five Freedoms"
adopted by the World
Organisation for Animal Health.

Our integrated business model
"Farm to Table"
guarantees the naturalness
and the quality of our products

Milk Requires Dedication, Dairy Business Requires Training

We have delivered training to
19,382
milk producers; and offered
training and consultancy to more than

34,000
persons and entrepreneurs at
Süttaş Dairy Farming Applied
Training Centers, being one of
best examples of Public-University-
Industry cooperation initiatives.

Turkish Labaneh

**Legendary taste
and lightness!**

Sütaş combines the taste of cheese and the lightness of yoghurt in Sütaş Labaneh. With its unique taste and soft texture, it brings joyfull snacking moments any time, anywhere.

qaymaq | Kaymak

We add delicious flavor to your breakfast tables with Süttaş qaymaq / Kaymak, one of the most natural and delicious form of fresh milk produced in Süttaş Farm.

Cream

Süttaş Cream, produced from the fresh milk of Süttaş farm, consists of %100 milk fat. It helps you to create new recipes in a practical way by covering all professional needs (cooking and whipping), increases the flavor and consistency of every meal / dessert it enters into, balances its taste and makes its appearance appetizing.

Baby Mix
benim ilk yoğurdum

Büyümix

Mini Mix

Hüptrik

Products specially designed for babies and children!

Milk and dairy products are indispensable sources of nutrition for the healthy development of children. They are especially important to meet the increasing calcium requirements of the body in growing children. They help the formation of strong bones and teeth, healthy muscles and tissues. They provide our children with protein and various vitamins. Süttaş delivers the necessary support to the health of future generations starting from today, with products specially designed for babies and children.

KAF KEFİR

Caucasus Yeast Sütaş Naturality

Kefir was discovered in the Caucasus 5000 years ago by nomads and has been a part of their lives ever since. Each generation transferred kefir grains to the next one and this miraculous drink has come to our day. Yeast gathered from motherly kefir grains obtained from Caucasus Mountains and freshest milk from Sütaş Farm come together in Kaf Kefir. Kaf Kefir's B12 vitamin and calcium content help to lower exhaustion and fatigue, increases vitality and energy, a great support for muscle, bones and teeth, regulates digestive enzymes and boosts energy.
