Trade with purpose

Institutional

The Executive Management of Kromevye, improving its production technology continuously in the domestic and global market since 1979, believes in the necessity of an effective Quality Management System in order to retain customer satisfaction at the top level today and hereinafter.

Kromevye Quality Management System is applied in conformity with ISO 9001:2015 CE, Quality, BSCI, Ghost, Standard and TSE to the whole Enterprise that takes active role in all production phases and takes advantage of the latest technologies. Kromevye pursues the objective of continuous and sustainable system development through extensive sector experience, complying with the legal obligations and protecting the employee rights.

In this context, our quality goals should be set, pursued and reported. Our resources should serve to our objectives.

Livinox was born as a brand name by Kromevye, for export stainless steel kitchen sinks.

Quality and Innovation

The kitchen has become the centre of modern interiors, the heart of any home, the place where family ties are woven. Kromevye, which can bring your kitchen in line with the latest trends.

When it comes to innovation, material and manufacturing quality, and constant search for new solutions to increase the comfort and functionality of our products, we make no compromises. This is why Kromevye sinks rank among the top modern design solutions, and boast quality that exceeds similar products in many respects.

kromevye sinks rank among the most durable sinks in the market since they are manufactured from 18/10 stainless steel up to 1 mm in thickness. The main advantage of thicker steel are greater impact resistance, increased stability of a sink tap and significantly reduced level of water splashing noise. In weight comparison, sinks made of thicker stainless steel are heavier.

Granite composite sinks are composed of granite parts tightly bound with high quality acrylic resin, which helps to acquire excellent mechanical properties and chemical persistence.

Some kromevye finished goods are made of tempered glass, a type of safety glass with significantly increased toughness and thermal resistance.

Material and Finish Options

Kromevye sinks are surface treated to resist the growth of mould, microorganisms and bacteria. All surfaces are easy to clean, as the sinks have no inaccessible spots for bits of food and other grime to accumulate. In addition, Kromevye sinks are environmentally friendly, containing no harmful admixtures that might be released into the environment upon decomposition.

Modern kitchen are becoming an increasingly important part of the living area, where people spend quality time, preparing food and socialising. At the same time, they tend to connect with other rooms so the boundaries between the living area and kitchen have disappeared almost completely.

Large, clean, modern surfaces require sinks that fit perfectly into the cutting-edge kitchenliving environments, while still performing up to the most demanding of gourmet tasks.

Kromevye sinks are designed for these very kitchens, as their outstanding design and functional qualities surpass the existent standards in many ways.

How to install a sink...?

Place the sink upside down in the position where it is to be installed, and trace the outline of the sink on the counter top with pencil.

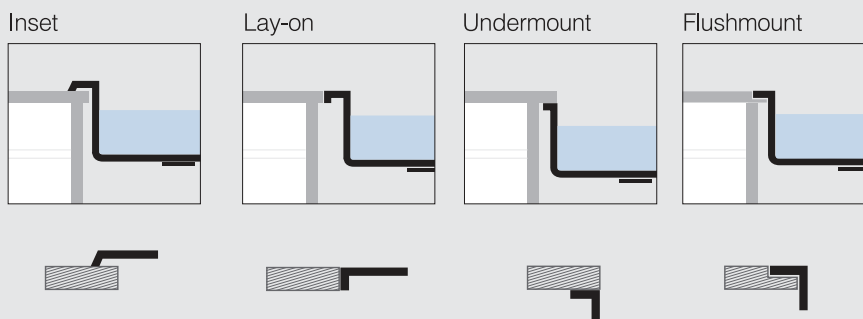

Draw another line 10 mm inside the first line. Cut a hole in the counter top following this second, inner, line. (*If a pattern is included in the package, then use it to cut the hole in the counter top.)

Adhere the sealing tape around the under side of the edge of sink, starting not at a corner, but any other random spot. Ensure that the tape is sealed smoothly at the bottom of the rim between the clip rail and the edge of the perimeter of the sink. In case that the packaging includes a spongy sealing tape, adhere the tape closer to the edge of the sink, being careful not to overhang it.

Place the fixing clips evenly space around the perimeter of the sink, and pull them up to lock into their horizontal position. To place the sink into the work top, push the metallic part of the clips inward.

These fixing clips are designed to be used in counter tops 30-40 mm. If your counter top is thinner, insert wooden wedges between the counter top and the clips so as to secure them. Use a hand screwdriver to screw partially the fixing clips by following the order that the drawing indicates. When all the clips have been relatively secured in place, repeat the procedure by tightening completely each fixing clip.

Installation Profiles

Cleaning and Caring

Cleaning and Caring for Stainless Steel

A clean kitchen is a wonderful kitchen. That's why we've specifically designed our products and systems for easy to maintenance. So you can feel comfortable and confident every time you use your kitchen. Learn the best way to keep your Kromevye products performing well and looking great.

After using the kitchen sink wipe off stains, rinse with water and scrub with dry cloth. Use Kromevye inox wax produced for steel products periodically surface polishing paste. After cleaning the surface with Kromevye inox wax applied to a soft cloth or sponge, rinse it with plenty of water and then dry the surface.

Acids, silver cleaning material, salty solutions and wall paper adhesives usually leave stains within couple of hours of their use. If this type material ever touches the kitchen sink after cleaning them immediately, rinse with plenty of water and dry the surface with cloth.

Do not leave wet metal products made of iron or similar material that can easily get rusted on the kitchen sink for long periods of time. The rusts of those leave stains on the surface of kitchen sink.

DO NOT USE THESE; Cleaning / scrubbing powder, hard cleaning sponges and brushes that scratch the surface of the kitchen sink.

Sometimes scratches may appear on surface during normal use, but they do not lower the quality of kitchen sink. A very thin layer of oxidation appears on the surface of stainless steel which provides protection against corrosion and erosion.

Cleaning and Caring For Granite

Everyday tips

Kromevye Granite Sinks are extremely durable and non-porous making them long-lasting and very hygienic. This also means cleaning them is quite simple too. Using a soapy nylon brush and scrubbing in circular motions will usually do the trick. Just remember to thoroughly wash away any extra soap left behind after cleaning.

Stubborn stains

For stubborn stains on granite, we recommend using any of these products: dishwasher soap, white vinegar (best for limescale) or a mild bleach solution. For rust stains, we recommend using cleaning agents that contain oxalic acid. And always make sure you thoroughly rinse away any cleaning agents once you've finished.

What to avoid

Strong alkalis like ammonia and caustic soda solution
Drain unblocking chemicals that involve filling the sink with water should not be used

Kromevye uses the best quality toughened glass of 8 mm thickness, which gives it a typical glossy appearance and which at the same time withstands temperatures of up to 200 C. The glass tempering process that the sink's drainer goes through, makes it highly impact resistant. Consequently, it will not crack unless it is hit aggressively with a hard and sharp object. Please avoid dropping sharp and/or heavy objects onto the glass surface of the sink and in particular hitting the edges of the glass.

Cleaning and Caring For Glass

The toughened glass is not completely scratch-resistant, so it should not be used for cutting. Any abrasive or sharp utensils or objects should not be dragged along its surface, as this may leave minor marks on the glass surface. Using a stainless steel roll mat in the draining area of the sink might be a good method of preventing potential mishaps.

Although glass as a material is generally very easy to clean, we do recommend that you take proper care of your glass sink, i.e. clean both glass drainer and stainless steel bowls regularly. The glass should be cleaned with liquid soap and non-abrasive cloth. Don't forget to completely rinse off the soap or detergent, if your food gets into direct contact with the glass. The glass surface should be dried regularly to avoid build up of limestone. You should never use aggressive cleaners or abrasive cleaning sponges.

Details That Make The Difference

ACCESSORIES

With suitable accessories, such as strainer bowls, chopping boards, detergent dispenser, trays and covers Kromevye sinks turn practically into complete small kitchens, furnished for the most delicious activities. The majority of sinks have the most important and most interesting accessories included in the basic package, which is clearly marked in this catalogue. The rest of the accessories are available to order.

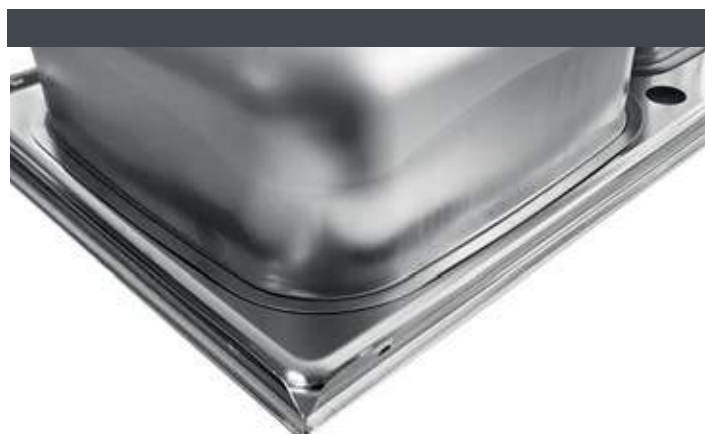

WASTE KITS AND POP-UP SYSTEM

Most sinks come with suitable waste system traps in order to facilitate the installation process. Certain sinks are supplied with pop-up system, which allows remote operation of the drain stopper. This is very practical for the when we wish to close a waste or empty the water out of a full sink without getting our hands wet.

SEALS

Most of the sinks are fitted with top-quality seals already attached to the undersides of their outer rims. This is permanent fixation that enables faster and easier installation, and prevents water leakage under the sink rim to kitchen worktop and cabinet.

SOUND-DEADENING UNDERCOATING

As a contrast to some competing products, all Kromevye stainless sinks are serially fitted with special sound-deadening undercoating. This undercoating mitigates the noise from water splashing upon hitting the sink surface, and thus successfully increases the comfort of working and living.

MOUNTING ACCESSORIES

The type of fastening accessories depends on installation type of sinks and kitchen worktop material. Fastening clips enclosed with each sink, suitable for mounting into worktops of 30 to 40 mm thickness. For worktops of non-standard thickness up to 65 mm, specially designed clips can be supplied.

UNDERMOUNT SINK FITTINGS

The undermount sinks can be supplied with special fastening accessories, designed to suit installation method as well as type of worktop material.

FACTORY-MADE CUT-OUTS

Assembly of additional elements of Kromevye is very simple, as the orifices for kitchen fittings and eventual other equipment (pop-up waste or detergent dispenser) are mostly prepared already in production. Thus, there is no need to bother with the risky business of cutting out the precisely located holes yourself.

History

1979

Kromeveye Company has been established in 1979 to produce stainless steel kitchen sinks located at Istanbul. At the beginning, Kromeveye had 140 sq. m. Area for production.

1996

The Company moves to 7,000 sqm. with 50,000 stainless steel sinks production capacity per month.

2000

Investments of latest technologic machines from Europe automated equipment. Stage year. Exports increase by 85%

2004

Production line for double bowl mono block sinks installed.

1986

Kromeveye moves to 1,000 sq.m. area with more workers for more capacity.

1990

First Exhibition was in Romania and first Export to Romania.

2001

Having had customers needed Kromeveye supplies stainless steel material for domestic and export markets. Meanwhile to address international demand we established three additional factories, Egypt (2001), Ukraine (2005), Morocco (2006)

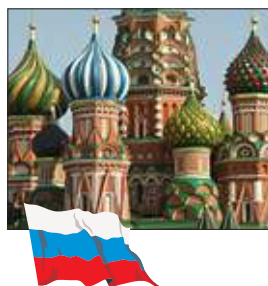

2007

Kromeveye moves to current address with 21,000 sqm closed area with more than 150 employees. Kromeveye produces 100,000 pieces of stainless steel kitchen sinks per month and exports 90% of the capacity to all over the world.

2008

Livinox was born as a brand name by Kromeveye, for export stainless steel kitchen sinks.

2010

We established a factory in Russia to supply for domestic needs.

2022

We are celebrating 43 years of experience

2009

We are very proud of 30 successful years in business life.

2011

We established a new production line in new factory area for economic series of Stainless Steel Kitchen sinks.

S600

Special water saving perlator (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment- With swivel spout, Length of outlet 190 mm, Height of outlet 295 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal operation pressure is 3 - 4 Bar

S607

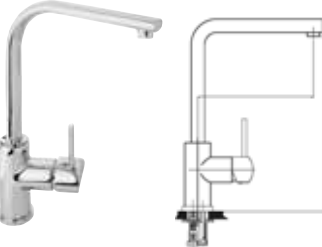

Special perlator with water saving (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment, With swivel spout, Length of outlet is 195 mm, Height of outlet 275 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar

S614

Special water saving perlator (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with flow rate adjustment - With swivel spout, Length of outlet is 190 mm - Height of outlet is 255 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal operation pressure is 3 - 4 Bar

S615

Special water saving perlator (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment- With swivel spout, Length of outlet 190 mm, Height of outlet 295 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal operation pressure is 3 - 4 Bar

S616

Special water saving perlator (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment- With swivel spout, Length of outlet 190 mm, Height of outlet 295 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal operation pressure is 3 - 4 Bar

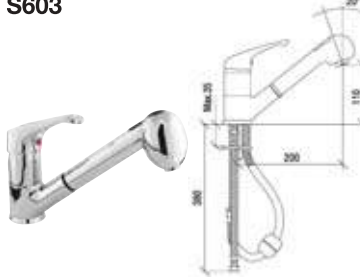

Classic line

S601

Special perlator with water saving (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment - With swivel spout, Length of outlet is 200 mm, Height of outlet 150 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar

S603

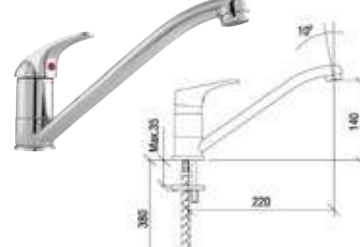

Special perlator with water saving, Special cartridge with heat and flow rate adjustment, With swivel spout, Removable hand shower head with 2 functions (Rain, Straight flow), Length of outlet is 225 mm - 125 cm helical hose (brass) - Height of outlet is 140 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar

S605

Special perlator with water saving (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment - With swivel spout, Length of outlet is 170 mm - Height of outlet 215 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar

S608

Special perlator with water saving (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment - With swivel spout, Length of outlet is 200 mm, Height of outlet 150 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar

S610

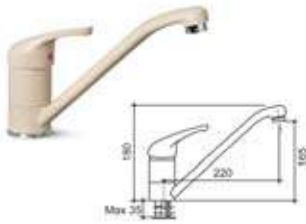

Special perlator with water saving (Bubble flow, with Lime breaker, Flow rate: 8 l/min), Special cartridge with heat and flow rate adjustment - With swivel spout, Length of outlet is 200 mm, Height of outlet 150 mm, Measurements of Hot & Cold water flex hose connection are M10x1- 3/8"40 cm, Ideal working pressure is 3-4 bar
