EASY INSTALLATION

DIY with screwing or gluing

Installation

AcousticMOD slat wood acoustic panels are easy to install on your wall

Fast and simple installation allows you to transform any space quickly. It is easy to install yourself, instantly enhancing your bedroom, living room, kitchen or office, even in music studio into a refined and modern space.

Method 1

Glueing straight on the panel

Mounting the panel on the wall with glue

A construction glue or grab adhesive is recommended for this

Method 2

Screwing directly into the wall

The panels can be screwed directly into the wall through the acoustic felt. Considering the material of the wall, it would be difficult to screw the panel directly on the wall if the wall is concrete or brick. It needs to add a layer for solidity.

Method 3

Screwing the panels on to wooden racks

First, install an underlying wooden rack on the wall. Then, screwing the panels on to the wooden racks. *(our recommendation)*

Packaging Process

AcousticMod slat wood acoustic panels are produced with the best quality materials. It has a vision to serve you in the best way from the material to the production, packaging and labeling of the products.
