

Punto Aluminum, with its 28 years of experience in the sector, we supply products and services to the Aluminum sector.

We cooperate in production with 15 factories across the country. In line with the demands from abroad, high capacity production and fast deliveries were achieved with the outsourcing model.

Knowing which product will be produced in which production facility, which will be supplied the fastest, and which will be produced in higher quality, with our 28 years of production-based experience, is our outstanding value.

We have been exporting to many countries for years by providing fast and high capacity production with our new production model.

With over 50,000 aluminum profile molds, we can quickly respond to product requests. Our design team can quickly respond to your special profile requests. In addition, technical support is provided on the suitability of designs for production after being examined by the quality department. In this way, support is provided for error-free product production.
