ÖZGÜN GRUP

— DOKUMA VE BOYAEVİ —

Production

World-class product quality...

Subtle

manufacturing since 1996

Özgün Grup continues manufacturing activities by using the latest technological opportunities and considering fashion world trends.

36,000,000+ per year fabric weaving capacity on **5.000 m²** full-integrated closed area manufacturing facility.

In addition to our expert team and wide range of product portfolio, we are working hard to manufacture new quality piece as well as different weaving and printed patterns.

Research Development

Özgün Grup undertake R&D work with a high level of seriousness for the sustainability of preserving quality standards. We are offering products to match changing global trends after conducting regular researches with expert and dynamic team. Özgün Grup adopted innovation and development as the core principle and with these principles, it has become one of the leader firms in the sector.

Winding Process

Due to our sensitivity on quality, we are completing thread winding in our facilities to preserve our quality standards. Our firm has 600 ton per year thread winding capacity.

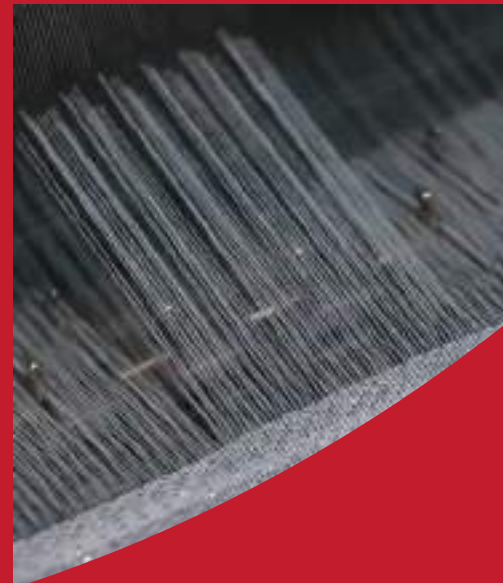

Wrap Tambouring

We are carefully monitoring the entire process from accepting the thread to our firm until manufacturing the end product without compromising our quality approach. Our expert team is aware that wrap tambouring process which is the first stage to turn the thread into the product is important for our quality and our team completes 12,000,000 meters per year wrap tambouring process.

Weaving

Özgün Grup that has become one of the leader firms in the sector with the experience gained since 1996 manufactures glittered, viscose, pashmina, taffeta, satin, cotton and flamed fabric in jacquard loom and dobby weave equipped with the latest technology. Özgün Grup has 36,000,000 meters per year fabric weaving capacity and this capacity is increasing every day with its growing structure.

Fringe Process

As Özgün Grup, long fringes in manufactured shawls are processed in our fringing machines. We have 5,400,000 per year-long fringe shawl manufacturing capacity.

Dyeing Facility

Our dyeing facility equipped with advanced technology can manufacture 4000 ton per year with washing, chemical finish, plain dye and double dye functions.

Digital Printing

As the design is emphasised in this period with the advancement of the fashion sector, we are offering our services to our customers as Özgün Grup to manufacture the newest trends in our facilities. In addition to our wide range of pattern portfolio, we can manufacture special pattern design and variant based on customer demands and needs. With our customer satisfaction oriented approach, we can manufacture 1,200,000 pieces of digital printed shawl and scarfs per year.

Confection

In our confection section which is the last stop before the customers, we are meticulously doing the last control of dyed and/or printed end-products. Our products inspected with "control from the eyes of our customers" are prepared for our customers by our confection team. Our confection section has 12,000,000 per year capacity and our capacity is increasing gradually.

High Level Pashmina Scarf Manufacturer

Corporate

Mrm Group Textile

With our experience in the sector, our importance to quality and keeping customer satisfaction above everything else enabled Mrm Textile to be one of the leading firms in the sector.

BEST EFFECT - BEST RESULT

High-Quality
Manufacturing

World Standard Manufacturing Philosophy

We are emphasizing our R&D work to realise our targets to take a step further. In addition to our expert team and wide range of product portfolio, we are working hard to manufacture new quality piece as well as different weaving and printed patterns.

SIMPLICITY ONLY

**We are unifying
elegance and
quality with fabric.**

With our technologic investments, we have reached **36,000,000+ meter** per year shawl, scarf and textile fabric capacity in our **5,000 m²** fully integrated closed area manufacturing facility.

Adopting innovation and development as a principle has become the most important factor for our rapid development from yesterday up to this day; with our flexible structure that can match the changing world, we managed to make the connection with our customers permanent.

Mrm Textile formed a gentlemanlike relationship based on mutual trust with business partners as well as the competitors in a competitive commerce sector and contributed to this sector with a quality service-oriented approach. Service quality is settled as a natural reflects due to uncompromising customer satisfaction.

HIGH QUALITY IN MANUFACTURING

MRM Textile is proud of its international reputation to be the best fabric and fabric-related product manufacturer.

Production

World-class
product quality...

**Discover Our
Manufacturing Power**

Subtle manufacturing since 1996

Mrm Textile continues manufacturing activities by using the latest technological opportunities and considering fashion world trends.

36,000,000+ per year fabric weaving capacity on **5.000 m²** full-integrated closed area manufacturing facility

In addition to our expert team and wide range of product portfolio, we are working hard to manufacture new quality piece as well as different weaving and printed patterns.
