

OUR STORY

Aler Oil Agriculture Food Incorporation is a family owned business established in Adana/ Türkiye, which is a province well known for its fertile lands, high-quality agricultural products and ancient history of olives within the Eastern Mediterranean Region which is historically known as North Mesopotamia.

During history this land has been sovaluable and beautiful over the decades. In records, it is said that the homeland of olives has been stated as North Mesopotamia and it has spreaded to Mediteranean region started from there including Anatolia, Syria, Egypt, Greece, Italy and so on. Adana, which our factory is located at, is one of the most important cities of the North Mesopotamia region that its olives grown in Adana are believed to be enchanted.

Within this ancient region, as a family, we are proud of being a unique olive oil and olives producing company which is committed to represent the products of this historical olive region as best as possible with our modern facility, experienced team and our perseverance and passion.

In Türkiye, there are 180 million olive trees on 700.000 hectares yielding 500.000 tons of table olives and 300.000 tons of olive oil. 500.000 households are employed in the olive and olive oil production. In our region, there are 40 million olive trees and we havebeen using our regions' opportunities to produce our products. All of the olives that enters to our facility are picked by great efforts of our harvesting team to who pick the olives by hand which results in a highly qualified olive and olive oil products.

Our brand, CERE, is the name of a big jar used by households or traders to preserve food such as olive oil, olive in brine, cheese in brine or pickles in the ancient times. It is made from an unique soil with the expertise of its' processing masters. The specialty of CERE is that it does not leak any liquid even though it is made of soil and it keeps the food as cool as possible to keep the food as fresh as possible. Such a storage jar was used in almost every households in the history.

EXTRA VIRGIN OLIVE OIL

Our Extra Virgin Olive Oil, which has a maximum oleic acidity of 0.8%, is produced from ripe olives harvested between October and January every year either by using harvesting machines or by hand. The olives are pressed as soon as possible. During processing the olive paste's temperature is always maintained at 30 °C. With an eye to bring you the finest olive oil to your table, we put in our greatest effort from harvest to processing and from filling to packaging, to present the olive oil to your liking. This olive oil has an ideal pleasant taste suitable for both dressing salads and preparing a wide range of meals. You will feel the olive oil's richness in polyphenols and antioxidants once you taste it. Aler strives to maintain a standard aroma, flavor and taste in each bottle.

PURE OLIVE OIL

Olive Oil is a blend of refined olive oil obtained from diligently produced olive oil, with good quality extra virgin olive oil. It is well processed, thus has a harmonious taste. Our olive oil has oleic acid, of not more than 1 gram per 100 grams and its other properties correspond to those fixed for this category in this standard. This type of olive oil offers the taste of extra virgin olive oil at an economical price. It is good for cooking and frying.

OLIVE POMACE OIL

Olive pomace oil is the oil obtained by applying advanced refining techniques olive pomace. We make sure the acidity content remains low and the taste is consistent. The oil adds flavor to the food. This olive oil is the economic alternative to the other grades of olive oils. We can also mix the olive pomace oil with extra virgin or virgin olive oil according to your desire to obtain a more preferable olive flavor taste.

SLICED OLIVES

Alerya

SLICED OLIVES

Fresh olives are harvested from the orchard either by using harvesting machines or by hand then afterwards, carefully pitted. The pitted olives are sliced into nice regular pieces using special slicing machines. The sliced olives are then packed in a way that offers optimum freshness and uniform texture. These delicious olives make an ideal ingredient for a variety of dishes or pizzas.

PITTED OLIVES

Pitted olives are produced using high-quality olives which undergo various processes before and after they are pitted. These processes result in delectable, tasty pitted olives that can be enjoyed without the danger and possible dental damage olive pits present. The taste of our pitted olives enhance flavor in meals.

GREEN WHOLE OLIVES

Green olives are picked before ripening and cured in brine while fresh. These olives have a distinct a crisp, meaty texture. Their flavor can be described as fresh, mild and buttery thus, complementing most dishes, wines and cocktails.

BLACK WHOLE OLIVES

Black olives are picked when fully grown and ripe. They are cured traditionally in brine to reduce the bitterness but still keep their distinctive flavor. These olives are a must-have for breakfast, are an excellent accompaniment to cheese boards, perfect as a snack and basically go well with any meal.
