

Akbaşlar Tekstil, who makes unique and permanent contributions to the textile world where success is achieved by combining the dreams with colors and teamwork, currently sustains its production in her high technology facilities in Bursa and Tokat cities of Turkey. Being among the 500 greatest industrial corporations of Turkey for the last 30 years, Akbaşlar Tekstil's products are delivered to the world by her sales-marketing offices in Istanbul, London, and Barcelona.

Establishment **1962**

AKBAS Holding is a family owned private company who are in the textiles, energy, tourism, food and employee over 1500 people.

Investments in renewable energy: Eren hydro power plant and Bergama wind farm produces 250 Mw/year.

At Akbař Farm, high-quality milk and dairy products are produced with the latest technology milking units and breeds.

In GES İplik, who has a production capacity of 2.000 tons per month, the world standard textured yarns are produced with Barmag machines having low energy consumption.

All products are subject to 100% product quality control by an experienced and expert technical team. It serves domestic and export customers with new and modern technology machinery investments made in 2023. The quality of the products is statistically monitored with the test machines in our laboratories. GES İplik can produce texturized yarn, elastane poliester, nylon texturized yarn and elastane nylon in DTY form.

A remarkable part of the quality and innovation expectations of the textile sector, which gains a new dimension every day and where competition prevails in a dynamic way, are met in GES Weaving facilities of Akbaşlar Tekstil. In the facilities where the fabric production is supported with R&D and P&D studies, quality values are prioritized while the customer satisfaction is unconditionally satisfied. In GES Weaving, with high technology weaving machines of Picanol, Vamatex, and Iteima brands, 2.000.000 meters of fabric per month can be submitted to the textile industry.

A wide range collection of fabric types consisting of constructions obtained from cotton, cotton elastane, linen, viscose, viscose rayon, nylon, nylon elastane, poliester, oliester elastane, monofilament, micro, CIF, ITY, and GRS fibres can be provided to the customers. Having a dynamic and innovative structure, Akbaşlar Tekstil meets the raw weaving fabric need of the Painting-Dyeing and Ready-made Garment Group in every sense.

In the facility, single jersey, interlock, ribbed and polar fabric types are produced using natural, regenerated and synthetic yarns.

Akbaşlar Knitting, who successfully welcomes the demands of the sector with its gradually expanding range of products, performs the production with a capacity of 250 tons in her latest technology machine park .

Innovative Lines:

Thanks to its regular dye machine park, jet dyeing, and foulard dyeing Akbaşlar Tekstil Dyeing and Printing Group is among the leading units of the company, both for dye sub and regular dye fabric production. The regular dyeing department consumes 50% less water for production by increasing the flotter ratio from 1/12 to 1/5 upon the renovations in the machine park.

In Akbaşlar Tekstil Dyeing and Printing Group facilities, printing preliminary preparation group and experienced pattern and variant team form the basis of the printing group with innovative lines that follow the world fashion. The creation of high quality is supported by jigging and automatic printing-dyeing preparation facility.

Special Effect Fabrics:

The fact that Akbaşlar Tekstil Dyeing and Printing Group includes the digital printing systems into the process besides the rotation printing techniques, exhibits her difference in the sector. Being among the companies with the largest digital printing capacity in the world, Akbaşlar Tekstil is among the giants of the sector with a production capacity of 3.500.000 meters of fabric per month, thanks to its 1 x MS Lario, 2 x MS JP7, 1 x JPK Evo, and 2 x mini Lario digital printing machine. The enterprises that follow the innovations in any stage of production add value to the fabrics they produce by finishing processes. Fabrics with special effects are produced in the facilities.

For sector's leaders...

Akbaşlar Tekstil ready-made garment enterprise combines high quality, reasonable price, high technology machine park, quick production, high capacity, and qualified work force. Thanks to the designing team which closely observes the fashion trends, the facilities address to the international companies who lead the sector.

Wide collection

By making use of her professional staff and being an integrated facility, Akbaşlar Tekstil ready-made garment enterprise outscores the opponents with her wide collection of knitting and weaving fabrics, while quickly responding to her customers. Being on the top among the producers that the sector prefers, Akbaşlar Tekstil's Bursa and Tokat factories make a production of 1.100.000 pieces of woman clothing per month.

Industry 4.0 technology

Akbaşlar ready-made garment enterprise, who act with a quality, quick, and innovative working approach, shows her difference as a digitalized facility in the production processes with her technologic investments. Our ready-made garment enterprise is among the leading corporations in the sector as a facility which adopts Industry 4.0 activities.
