COUNTRY

Since 1981, Yaşalar has led Türkiye's metal forming industry with top quality and timely delivery. From a 400m² workshop, we now operate an 8000m² facility in Bursa and will expand to a 20,000m² factory in Yalova in 2024.

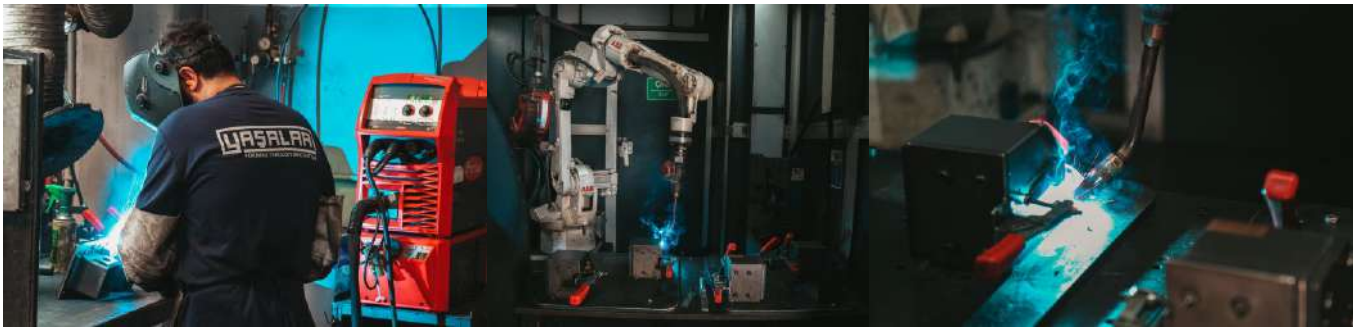

Since our start, we've served the automotive sector and began exporting in 1992. Today, exports make up 90% of our turnover, reaching 150+ locations in 13 countries across four continents. Our diverse expertise and flexibility set us apart. At Yaşalar, we're proud of our past and excited for the future. Join us in our growth journey.

TOOL - JIG & FIXTURE DESIGN & PRODUCT

We agree on CAD data and analyze tolerances. At Yaşalar, we use advanced CNC machines for production and assembly. After preparing the tools, we ensure quality and customer approval before mass production.

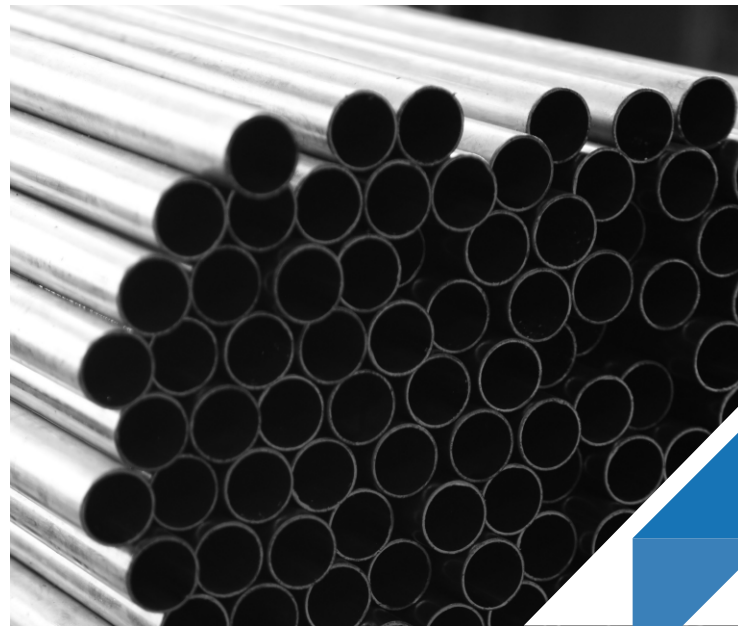

WELDING

We use advanced techniques for TIG, MIG/MAG, gas arc, spot, and robot welding, including aluminum. Our MIG/MAG and spot welding machines, along with robotic welders with CMT technology, ensure precise, high-quality results.

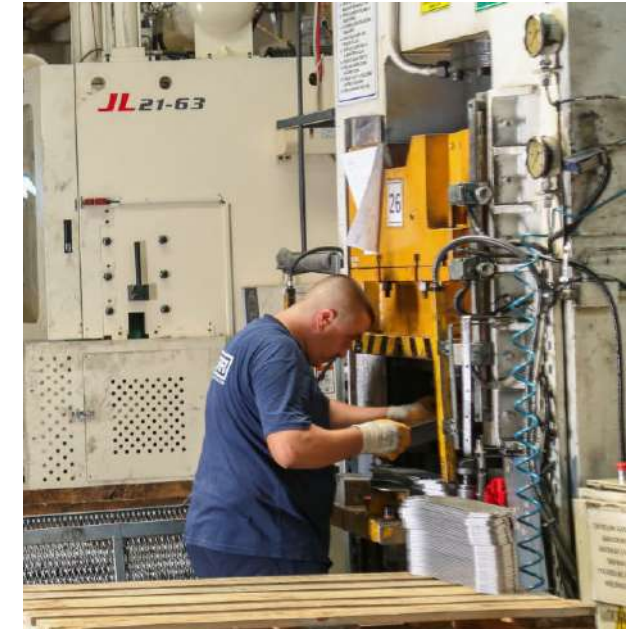

TUBE FORMING

We ensure customer satisfaction with expert cutting, bending, and forming for pipe and profile parts up to Ø51, using advanced equipment for precise, high-quality results.

PRESS LINE

At Yaşalar, our press line features C-type, H-type eccentric, and hydraulic presses with capacities from 10 to 315 tons. We also provide cutting, drilling, deburring, and shaping, ensuring precision and efficiency with advanced machinery and skilled technicians.

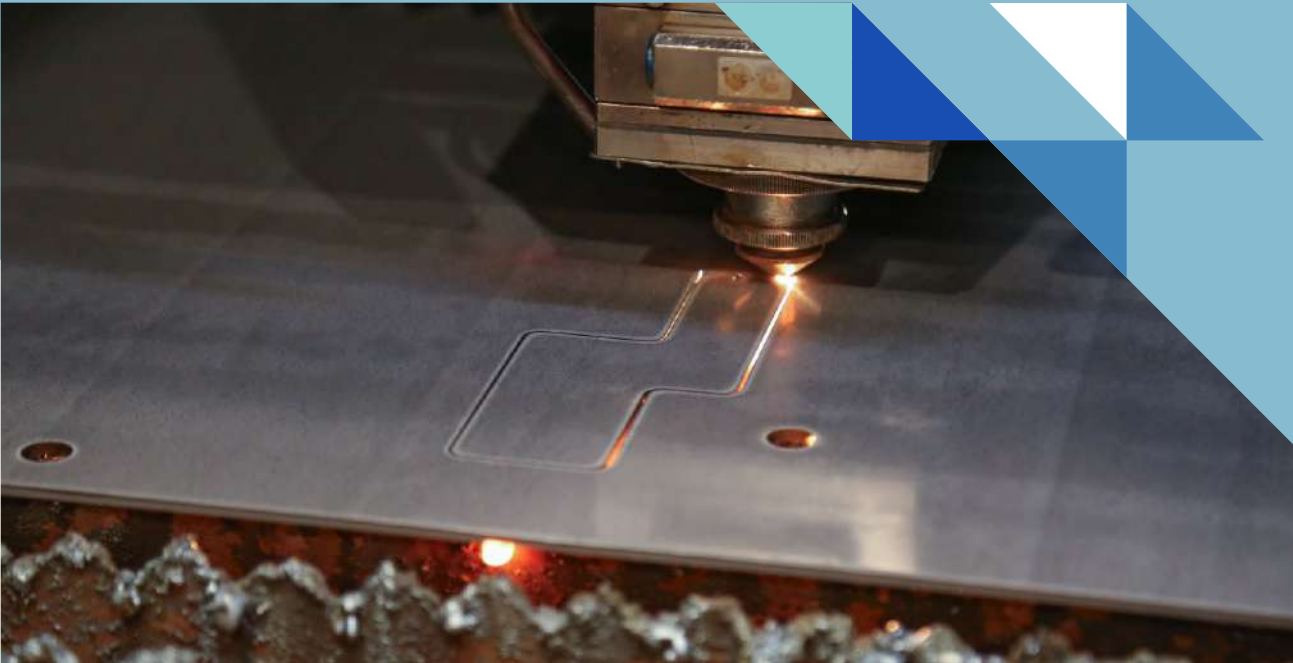

CNC ABKANT BENDING

We use CNC machines to bend sheets of various sizes and thicknesses with precision. Our 60-ton, 175-ton, and 320-ton press brakes handle complex tasks quickly and accurately, ensuring high standards with our skilled staff.

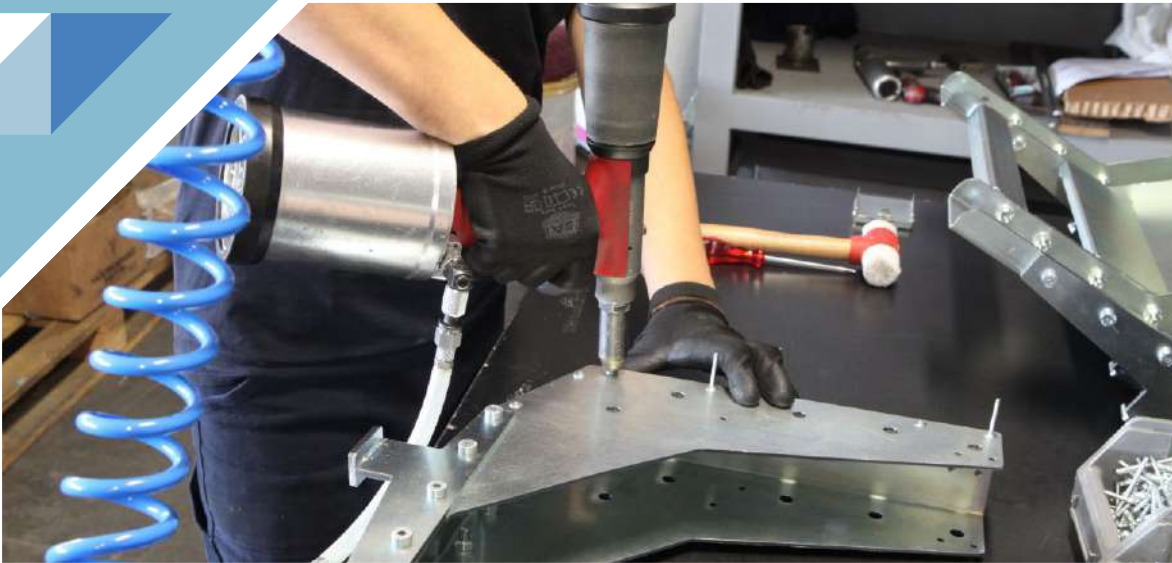

CNC LASER CUTTING

We use 4kW, 6kW, and 12kW fiber lasers for precise CNC cutting of steel, stainless steel (up to 30mm thick), and aluminum (up to 10mm thick). Choose Yaşalar for your CNC laser cutting needs.

ENGINEERING CONSULTANCY

We provide expert engineering services for product design, innovation, and improvement, covering production, development, and analysis. At Yaşalar, we drive innovation and ensure success.

MOUNTING PROCESS

Post-coating, we use advanced equipment for assembly and shipment, ensuring high quality and functionality. At Yaşalar, we enhance your products value and performance.

*In Every Rising Value,
We Have a Contribution*

AUTOMOTIVE

Since 1983, we've expanded from TOFAŞ-FIAT tools to spare parts, commercial vehicle components, and specialized tools.

SCHOOL BOARDS SYSTEMS

We produce steel, stainless steel, and aluminum components for metal frames used in school board systems, essential tools in education.

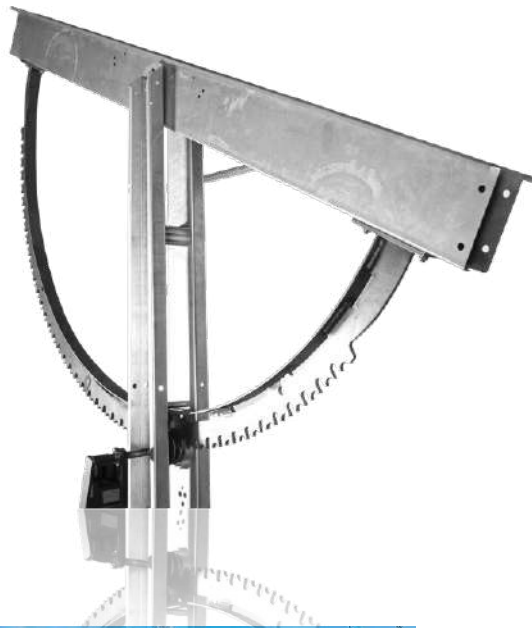

AUTOMOTIVE ROOF & BIKE CARRIER SYSTEMS

We produce metal components for ski carriers, roof racks, and bicycle carriers, serving top global brands and all vehicle types.

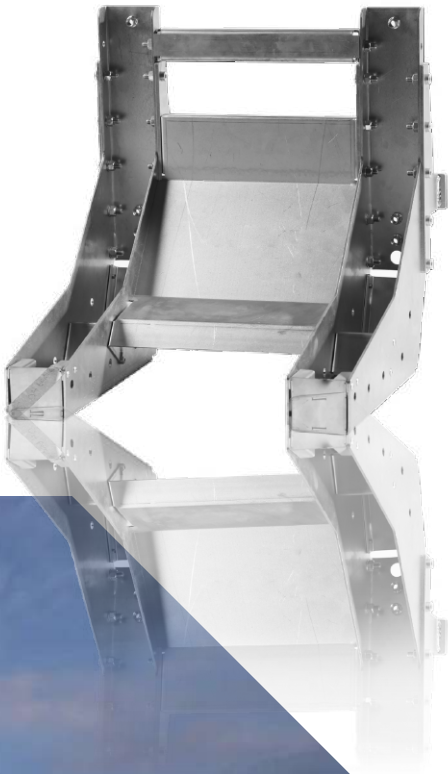

SOLAR ENERGY MOUNTING AND TRACKING SYSTEMS

Yaşalar produces components for solar systems from steel, stainless steel, and aluminum, with global shipping. We support sustainability and successful partnerships.

DEFENCE INDUSTRY

Yaşalar produces spare parts for tanks, armored, and tactical vehicles, leveraging our experience in defense for national security.

TRAILER & COMMERCIAL VEHICLES

We conduct R&D and mass production of components for vans, trailers, and semi-trailers, specializing in sheet metal, profile, and aluminum parts.

STADIUM SEATS

We've produced over a million metal parts for stadiums and auditoriums, including durable seating for global venues and major football clubs.

CONSTRUCTION

Yaşalar enhances project safety and efficiency with high-quality, durable metal solutions. They offer innovative and sustainable construction elements like containers, cranes, scaffolding, lifting systems, and formwork through their experienced team and modern facilities.

AGRICULTURE

Yaşalar aims to increase the productivity of farmers and agricultural enterprises by offering innovative and durable solutions in the agricultural machinery sector. Yaşalar manufactures metal parts for tractors, cranes, drilling machines, lawn mowers, feed carts, combine harvesters, baler vehicles, crane hook bucket vehicles and dump vehicles. Yaşalar expands its product and service range by participating in both various coating projects and projects including assembly.

OUR POWER

Our People, Our Success

At the core of our company lies a driving force that fuels innovation, guarantees quality, and upholds our commitment to excellence: Our Team. This collective strength derives from a diverse group of individuals who contribute

unique skills, steadfast dedication, and a unified vision. Their expertise and efforts are integral to every product we produce and every new innovation we introduce.

Investing in people

90% of products exported to 150 locations in 13 countries.

250+ passionate employees

250+ employees drive innovation and quality.

YAŞALAR Academy

Training for university students and graduates.

CONNECTED WORLDWIDE

*We are available
wherever our customers
want to work*

We export 90% of al products produced.

In today's global marketplace, cross-border connections are essential. At YAŞALAR, exporting 90% of our products highlights our global reach and the exceptional quality and efficiency of our offerings.

We reach countries around Europe talso beyond continents

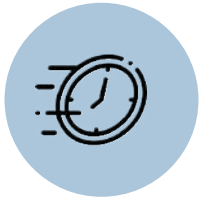

YAŞALAR's strategic location serves as a gateway to the world, allowing us to quickly serve both global and national clients. Our logistical expertise minimizes geographical challenges, ensuring swift and seamless product delivery.

WHY YAŞALAR

We excel with high quality, fast response, and competitive pricing. Our in-house design and manufacturing ensure top standards. Expertise in metal forming and advanced technology positions us as a market leader.

PRODUCTION / R&D

Innovation at the Core - Powering Yaşalar's Future with R&D

Yaşalar' R&D Center drives innovation, using advanced technology to design and test molds and fixtures. Our process covers analysis, design, prototyping, and mass production, ensuring we exceed industry standards.

PRODUCTION / TECHNOLOGY

Shaping the Future With Technology: Yaşalar's Drive to Industry 4.0

At Yaşalar, we prioritize digital transformation to reduce human error and enhance efficiency. We use robotic automation, SAP-ERP for real-time tracking, and an EDI system for streamlined order management. Embracing Industry 4.0, we lead in operational excellence and customer service.

PRODUCTION / QUALITY

Quality Comes First for Us

Quality is our priority, ensuring excellence in products, services, and customer satisfaction. We continuously improve, use advanced technology, and adhere to international standards to maintain industry leadership.

SUSTAINABILITY

We Invest in the Sustainable Future by Protecting Nature

At Yaşalar, we focus on sustainability with solar power, recyclable materials, and carbon monitoring. Our eco-friendly practices align with UN goals and support reducing environmental impact.

VISION FOR THE FUTURE

“Looking Towards the Future with Confidence”

At Yaşalar, our experience and innovation ensure we lead now and into the future. We anticipate evolving needs and create solutions for a sustainable future. Join us in shaping what's next.
