Group of Companies

Representation and distribution of steel, coal, railway and marine machinery and equipment

Production of metal and plastic parts for the automotive, household appliance and power connection industries

The engineering office of Hatko Electronics in Pforzheim, Germany, for design and research and development of connectors and plug connectors

Aquaculture for sea bass and sea bream

Production for the solar industry started with junction boxes (JB) and connectors for photovoltaic modules.

Tourism Activities - BoutiqueTours, Blue Travel and Cruising Reservations

Design, engineering and manufacture of Main Power Units (MPU) and Auxiliary Power Units (APU) for traction systems.

hatko®

HATKO offers representation and consultancy services to leading European companies in the defence industry and shipbuilding sector, supporting their activities in Turkey. Blohm + Voss GmbH (ThyssenKrupp Marine Systems), based in Germany, is one such company and has the following areas of expertise:

The Blohm + Voss shipyard is an industrial company with a history spanning 144 years. It has maintained its current position in the world market through the application of innovative technologies, enabling the production of high-quality products for the global market.

Blohm + Voss spearheaded the introduction of military vessels, while upholding the traditional shipyard concept in the high-tech navy. In the 1970s, they played a pivotal role in developing the MEKO® design concept.

HATKO engages in the international trade of a range of steel products, including long/flat steel, semi-finished and processed steel, and steel scrap, with a diverse portfolio of countries.

Turkey is the eighth largest steel producer in the world, with an annual production capacity of 52 million tonnes.

We supply a range of scrap products, including grades A3, HMS 1/2, shredded and bonus, sourced from the USA, Ukraine, Russia and the CIS states, as well as from European countries such as France and Greece, and North African countries like Tunisia.

Following the importation of our first industrial coal in the 1970s, we have continued to supply iron and steel companies with our coking and industrial coal products.

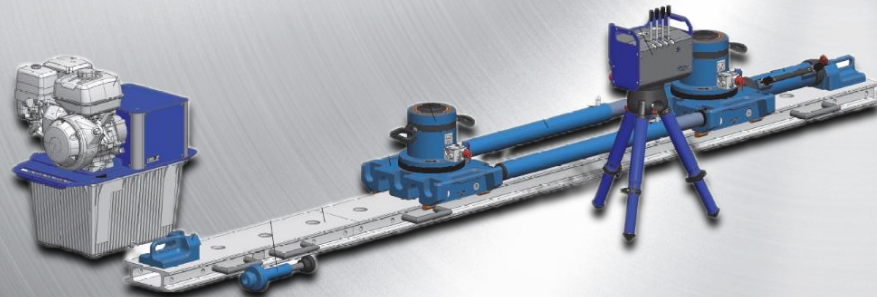

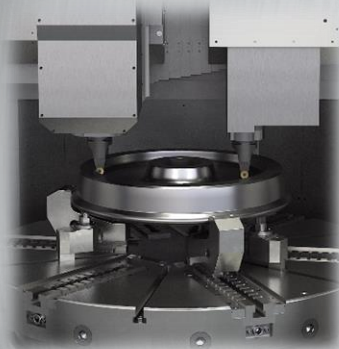

hatko®

HATKO A.S. has been the exclusive representative of HEGENSCHIEDT-MFD GmbH for many years. We are proud to be a solution partner for national tram and metro lines, especially for municipalities and TCDD (Turkish Railway Company).

With over 50 years of experience and expertise, HATKO Electronics is part of the HATKO Group of Companies and has been the leading manufacturer of terminals and plastic enclosures in Turkey ever since.

In addition to its standard product range, which includes in-house product and mould design capabilities, mould manufacturing and electrolytic coating, HATKO Electronics provides a comprehensive solution for all terminal and plastic enclosure requirements. HATKO Electronics has an excellent reputation with original equipment manufacturers (OEMs) and their suppliers in the white goods, automotive and power distribution sectors, both at home and abroad.

We have all the necessary quality management systems and product certifications required by our customers, including ISO 9001 and ISO/TS 16949 certificates as well as VDE UL certified products.

HATKO Aquaculture is a leading producer of sea bream and sea bass in the Mugla region, with a significant export presence in European countries.

HATKO was the first company to establish an offshore fish farm in the Mugla region, in Bodrum. The current capacity of the facilities is 4,000 tonnes per year, with investments increasing on a regular basis.

Hatayli hatchery: The Milas-Oren facility has an annual capacity of 19,500,000 pieces and is dedicated to the breeding of sea bass and sea bream fingerlings.

Our production facilities are ASC and Global GAP certified, enabling us to cultivate high-quality fish in accordance with European standards.

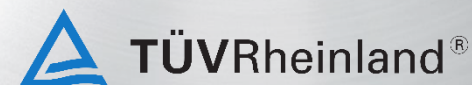

HATSUN

HATKO has established HATSUN in Elazig (eastern Turkey) with an environmentally conscious and innovative approach.

HATSUN is a joint venture with a Chinese company specializing in the manufacture of junction boxes for solar modules, utilizing the latest technology.

HATSUN has a total area of 19000 m², comprising a closed area of 4000 m² and an open area of 15000 m². All production lines are fully automated, covering all stages from plastic injection to final packaging.

Our ultra-compact design is compatible with current international standards and certifications, including IEC, UL, TÜV, CSA, as well as the cutting-edge technology of PV modules.

Since 1994, HATKO Group has continued its tourism activities with HATSAIL Turizm ve Ticaret A.Ş. and has become one of the leading companies in the sector by specialising in yacht tourism. Our Services:

- International Tours
- Hotel Reservations
- Flight Reservations
- Weekend Holidays
- Congress or seminar bookings
- Product launches
- Car rental
- Blue voyage cruises with our own yachts
