

Our firm is operated by a family who has 59 years of experience in trade and industry in Turkey and manufactures PVC and aluminium joinery, wooden composite panel doors and heat insulated double-glasses.

Dating back to the year 1956, when the firm started to manufacture wooden Windows and doors in its first workshop in Sakarya province, our firm included the production of PVC and aluminium into its operation in line with the current advanced technology.

It completed its corporate development process when the incorporation was effected in 1997. It became an integrated company in Windows and door sector in the same year through adding production system of double glass with heat insulation into its activity area.

As the consequence of 59 years of experience in woodwork, and 18 years in PVC and aluminium joinery, the last position of our firm which it has reached in 2007 in Turkey is that; it has started serial production and accomplished the creation of its trade marks, thus paving the way for its developments with the cooperation of its dealers.

Principal policy of our firm is to deliver the best, the highest quality and the fastest service in all of the products and services we provide by means of its experienced staff and knowledge which exceed half a century.

It is our primary goal to reach the excellence and to attain continues improvement and progress under fair competition, to give particular importance to honesty, business ethics and confidence, and consequently to become a reputable company in international arena. Our most important wealth is customer satisfaction.

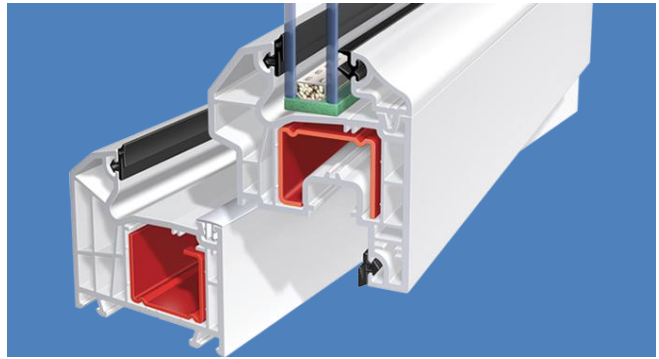

Our company has 3000 m<sup>2</sup> indoor area over 5000 m<sup>2</sup> field in Sakarya and carries out its manufacturing by means of 40 employees and 8 administrative staffs, involving computer controlled CNC machines.

## OUR BRAND NAMES:

We convert PVC and aluminium profiles, which we purchase from leading profile factories of our country, into windows and door under CE standards (EN14351-1) in line with the orders we receive from our customers. We complement these production with the required accessory components and deliver them in working conditions without any trouble.

## OUR NEW PRODUCT :

The last stage of our knowledge; windows combined with aluminium and wood. Healthy natural wood, thermal barrier and excellent combination of aluminium; a total harmony.

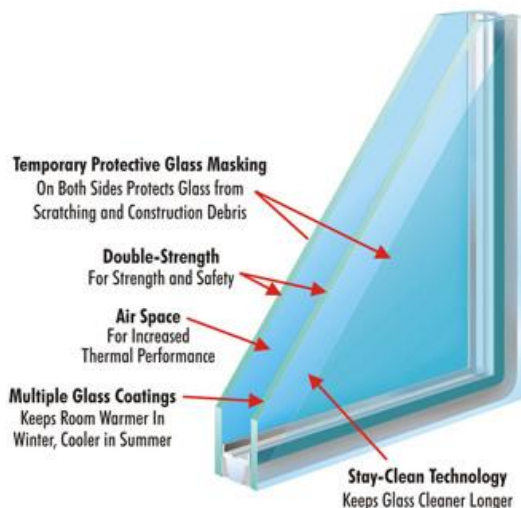

Inside , healthy natural wood ; Outside, lifetime aluminium

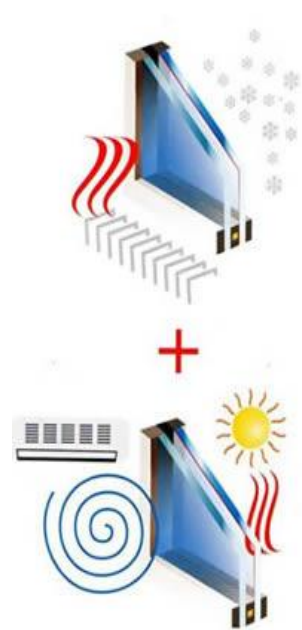

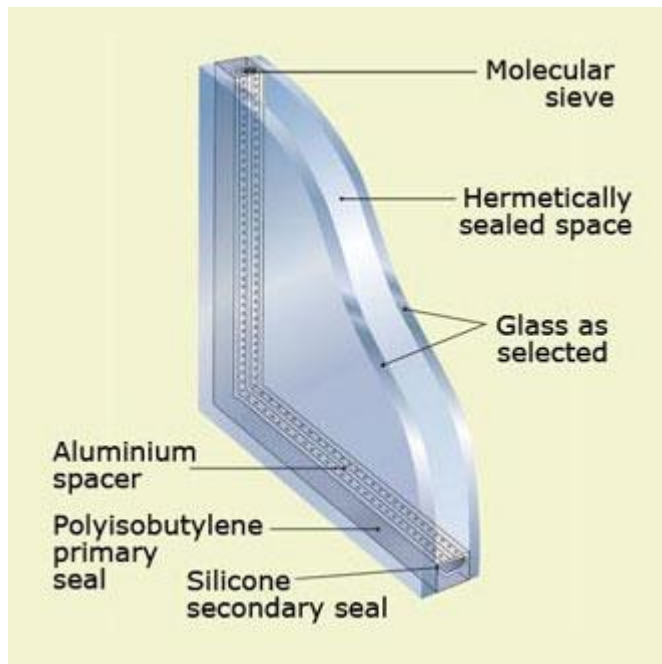

## DOUBLE GLASS:

We conclude our production through combining the glasses with the complementary accessories and make them insulated double-glass under CE standards (EN 1279-5).

If you both heat and cool your house,

## Isicamcomfort

New generation insulating glass Isicam Comfort has a sun control feature as well as heat control feature.

Reducing the heat loss and solar heat by 45% compared to double-glass, it provides economy in fuel costs in winter and air-conditioning costs in summer

Coated with special heat and sun control films, Isicam Comfort does not make any concessions of the light.

Preventing the window-fronts from being cold in winter and hot in summer, it ensures equal heat distribution throughout your room.

Costs which you will incur for Isicam Comfort shall return in 3-4 years with the investment and energy saving it will provide.

**PANEL DOOR:**

Door frameworks are produced using oven-dry timber. Production is finished after the upper covering is made as per the required colour and pattern. They are assembled with accessories so as to operate in a seamless way, and then delivered to the customers.
