“THE TALE OF FLAVOUR,
STRETCHING FROM FERTILE
LANDS TO YOUR KITCHEN”

COTANAK OIL

Altaş Yağ Sanayi A.Ş.
Çotanak

ABOUT US

Adventure of the Altaş Group of Companies which started in 1957 extends to Çotanak, which is one of the most respectable and most preferred oil brands of Turkey. In a self-confident approach on healthy life and quality products, customer satisfaction has been kept in the forefront at all times.

The company carries on all its operations in accordance with nationally and internationally accepted standards. It places utmost importance on food safety, quality control and hygiene in the production process.

Having a production approach with a focus on future customer requirements, Çotanak targets development and innovation at all times. It aims at offering different options to consumers through innovative products and packaging. In addition, using environmentally friendly production and packaging methods, it works for a sustainable future as well.

Our facility is a fully integrated oilseed processing plant built on 101 decares of land. Oilseeds are stored in our horizontal and vertical warehouses.

The process of pressing oil seeds by mechanical pressing and obtaining crude oil by solvent extraction takes place in our crude oil unit.

The crude oil obtained is refined by physical or chemical refining processes and made edible. Filling and packaging processes of vegetable oils produced as edible oils are carried out in closed systems and automatic machines without touching hands.

"Our export market extends to more than a hundred countries across the world."

Our company takes immense pride in having an export market that extends to over a hundred countries across the globe. This achievement is a testament to our product quality, our strong supply chain network, and our dedication to meeting diverse customer needs.

Our products have managed to cross borders and have been well-received, gaining popularity from North America to Europe, from Asia to Africa, and reaching even as far as the remote corners of Australia and South America. Our extensive network is a result of the persistent efforts of our hardworking team, coupled with our relentless pursuit of reaching out to every potential market.

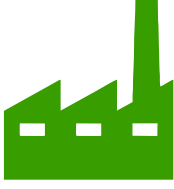

Moreover, we have not only achieved a broad geographical spread, but also a rich diversity in the types of markets we serve. From bustling metropolises to quaint towns, from large-scale industrial sectors to small, local businesses, our products have found their place in various settings, fulfilling unique demands.

In this vast network, we've learned to understand the specific requirements of different markets and have developed a level of versatility in our product range. We've created products that cater to different climates, varying regional regulations, and specific cultural preferences, allowing us to adapt and succeed in numerous markets.

Our global reach has also enabled us to forge important partnerships and collaborations, fostering a sense of global community and mutual growth. As we move forward, we're committed to further expanding our international footprint and striving to continuously improve our offerings, ensuring that we remain competitive and relevant in the ever-changing global market.

PRODUCTION CAPACITIES

Crush
7.500 tons/month

QUALITY CERTIFICATES

We conduct all our business processes in accordance with the highest standards within the scope of integrated quality management systems. "Food safety" and "occupational safety" are always among our priorities. Our basic principles are to control activities that may adversely affect the environment, minimize risks related to occupational health and safety and ensure customer satisfaction. The care we give to all these areas is demonstrated by our national and international quality certificates.
