

## Introduction:

---

**MORFI**, a privately owned company, operates primarily in three domains: trading API (Active Pharmaceutical Ingredients), supplying industrial equipment for Oil, Gas, and Petrochemical plants, and facilitating technology transfers. One of the major challenges in trading industrial products lies in the absence of engineering expertise. However, **MORFI** overcomes this hurdle by maintaining a well-structured engineering team comprising professionals from diverse fields and disciplines. This enables **MORFI** to offer its customers exceptional services, ensuring access to high-quality products at competitive prices, and timely delivery.

---

---

## Our Vision

---

To be the best performing global trading company in the defined fields by using a perfect engineering platform, where our people deliver innovative and sustainable solutions for our customers in a connected world.

---

---

## Our Mission

---

To Make the World a Better Place & More Productive!

---

---

## Our Values

---

**Integrity** – At all times, our unwavering commitment is to pursue our objectives in an ethical manner, upholding the utmost integrity. We anticipate transparent and courteous exchanges among our management, employees, and business customers, aligning with our steadfast principles of Business Integrity.

**Community** – We hold a deep commitment to enhancing the communities in which we reside and operate. Through our charitable contributions and active employee involvement, we strive to champion initiatives that make meaningful and enduring contributions to our world.

**Accountability** – We uphold a strong sense of accountability for our performance, both as individuals and as a collective. Our focus extends beyond mere accomplishments, encompassing the manner in which we achieve them. We remain steadfast in our commitment to fulfilling both personal and organizational objectives.

---

---

## Our Purpose

---

At **MORFI**, our primary objective is to engage in the exchange of API, Industrial Equipment, and technologies and solutions that contribute to a more efficient and sustainable world. We are dedicated to trading in quality products and efficient solutions. While it is widely acknowledged that partnering with renowned and trustworthy companies is the optimal approach to achieve our goals, we also recognize the need for ongoing investment in innovation and collaboration. The shared passion of everyone at **MORFI** is to assist individuals in attaining their objectives by embodying the company's core values.

---

---

## Supply Chain Crisis

---

**MORFI** has established an integrated framework of processes and tools to ensure complete transparency and understanding of our procurement activities and the associated risks and opportunities within our supply chain. Our focus is not limited to implementing isolated procedures for specific risk areas but rather on developing a comprehensive system that encompasses all Code of Conduct obligations. However, we acknowledge that this is an ongoing and iterative process that involves the gradual incorporation of new elements. We are dedicated to continuously enhancing our Sustainability in the Supply Chain processes, taking into account the intricate and varied requirements imposed by laws and our customers.

Field of Activities:

## API ( Active Pharmaceutical Ingredients) Supply for Pharmaceutical Plants:

- Metronidazole
- Acetaminophen
- Mycophenolate Mofetil
- Cyclosporine
- Mupirocin
- Teicoplanin
- Vancomycin
- Tacrolimus
- Sirolimus
- Progesterone
- Benztropine Mesylate
- Abaloparatide
- Apixaban
- Apremilast (Form B)
- Abiraterone Acetate
- Bempedoic Acid
- Cabazitaxel
- Carfilzomib
- Candesartan Cilexetil
- Cinacalcet Hydrochloride
- Decitabine

Field of Activities:

## **Industrial Equipment Supply for Oil, Gas and Petrochemical Plants**

- i. Standard and ATEX Certified Gear Boxes
- ii. Gear Boxes API 613
- iii. Centrifugal Pumps According to ISO Standard
- iv. Centrifugal Pumps API 610
- v. Centrifugal Sealless Pumps API 685
- vi. Metering Pumps API 675
- vii. Reciprocating Pumps API 674
- viii. Centrifugal Compressors API 617
- ix. Reciprocating Compressors API 618
- x. Screw Compressors API 619
- xi. Vacuum Packages
- xii. Scrubbers
- xiii. Absorbers
- xiv. Standard Electric Motors
- xv. Explosion Proof Electric Motors
- xvi. Drum Production Machines
- xvii. Rubber Grinder Machines
- xviii. Standard and ATEX Certified Mechanical Seals
- xix. Mechanical Seals API 682
- xx. Air Separation Units
- xxi. Bagging/De-bagging Machines
- xxii. Palletizing/Shrink Wrapping Machines
- xxiii. Chemical Injection Packages
- xxiv. Pneumatic Conveying Packages

Field of Activities:

## Technology Transferring

- ✚ Production of Progesterone from Biznoralcohol based on Bio-Tech method (Active Pharmaceutical Ingredient)
- ✚ Production of Cyclosporine based on conventional method (Active Pharmaceutical Ingredient)
- ✚ Production of Teicoplanin based on Bio-Tech method (Active Pharmaceutical Ingredient)
- ✚ Production of Mycophenolate Mofetil ( Active Pharmaceutical Ingredient)
- ✚ Production of Acetaminophen from Para-AminoPhenol ( Active Pharmaceutical Ingredient)
- ✚ Production of Para-AminoPhenol from PNCB based on Conventional Method ( Active Pharmaceutical Ingredient)
- ✚ Production of Purified Glycerine (Chemical and Pharmaceutical Grade)
- ✚ Production of Solphonation Products (Chemical and Pharmaceutical Grade)
- ✚ Production of KOH from KCl by Chlor-Alkali Plant ( Agricultural Grade)
- ✚ Water Recovery and Production of High Value Salts by ZLD ( Zero Liquid Discharge) Method
