K Ö Y L Ü M

Since 1938

Ali Yalçındağ (Yetim Ali) established the small creamery that can be considered the origin of today's Köylüm in 1938. This was an enterprise that produced regional cheese from sheep and goat milk in the spring. The firm was run by his sons after him. In 1977, the three separate creameries working seasonally in three different villages were united in the same place (Alaşehir, Manisa) and this became a factory that worked throughout the year. Köylüm has continued its production without interruption since then and enhanced its technologic infrastructure and product quality continually in accordance with the demands of the market. Köylüm developed products to meet the needs and to solve the problems of the clients especially in the non-domestic consumer market and it sustains its presence as a brand focusing on quality rather than quantity.

Köylüm, which is among the big firms of the region in terms of capacity and product variety, is also among the strong providers of many national and international brands. Köylüm also carries out considerable practices in the field in terms of milk quality. Köylüm that procures raw milk from big milk farms under control instead of using collected milk, is among the distinguished firms of the sector also in this subject

KASHKAVAL AND PROCESSED CHEESES

Koylum Kashkaval Cheese 400 g

Unit in Box	22
Average box weight (kg)	8.8

Unit barkod
