YARN and KNITTING

ALTEKS began to produce Ring yarn with ZINSER 36 machines in 2013. Our mill with 25.200 spindles can perform production between Ne 1/20 and Ne 1/50. Our goods are Compact Ring 100% cotton, 100% organic cotton, 100% viscose, 100% modal, melange and different blends of cotton/polyester and cotton/viscose yarns.

ALTEKS has been producing Open End yarn with Rieter R 40 machines since 2007. Our mill can produce from Ne 10 to Ne 40 with a capacity of 17,000 kg/day. Our goods are Open End 100 % Cotton, 100 % Organic Cotton, 100 % Viscose and melange yarns.

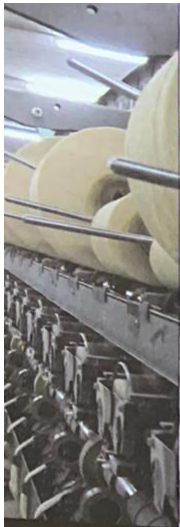

In our knitting mill, there are 76 tubular and open width circular knitting machines. It can produce all types of fabrics according to our customers requests which has the capacity of 17,500 kg/day.

ALTEKS has an important advantage to give you best service with its own Yarn, Knitting and Dyeing Mills.

PRODUCTS

ALTEKS
KNITTING DYEING FINISHING

Our company has been operating since its establishment in 1996 in Kahramanmaraş/TURKEY on knitted fabric, dyeing and finishing services. It is a leading company in its sector thanks to its wide product range, product quality and after-sales services. In this context, our company where customer satisfaction is always the primary goal, has developed its own O.E. mill, knitting facility, and also Compact Ring mill.

The machinery course holds the necessary technological renewals and is capable of providing you, our distinguished customers, the highest quality in the fastest way and in the proper price, thanks to our qualified staff and their team work.
