

THE NEW NAME OF THE DRIED FRUIT

DRIED FRUIT IS NOT ONLY A FRUIT BUT A SOURCE OF ENERGY WITH THE VITAMINS AND MINERALS IT CONTAINS. THROUGH THIS PERSPECTIVE, AT THE ROAD WE SET OFF SINCE 2014, BY NAMING AS NATURAL VITAMIN SOURCE "DOVIDO", WE'VE RENAMED THE DRIED FRUIT AND WE'VE BROUGHT THIS FLAVOR TO YOU.

# SULTANAS

Lowers the blood sugar levels

Increases bowel movement

Includes the natural sugars named "fructose and glucose".

Those sugars maintain the increase of energy by getting into the bloodstream directly and suppress appetite by preventing the lowering of the blood sugar level.

For this reason, sultanas are a good alternative to be used for satisfying the need for your sugar cravings.

The iron and vitamin B complex in sultanas helps sanguification. Sultanas that are rich in calcium, are important for strong bones and teeth. Sultanas include catechin, which has a protective effect against cancer. The "potassium" found in sultanas is effective in lowering the hypertension in the body. The "diet fiber" in sultanas increase bowel movement, eases digestion, provides burning of calories and fat loss.

# SEEDED ANTEP RAISIN

Anti-oxidant and  
anti-carcinogen  
effect

Rich in  
minerals

The anti-oxidant, anti-aging, blood-forming and anti-carcinogen effects of Raisins are well-known.

“Resveratrol” substance that is found in the skin of the red raisin has anti-carcinogen and anti-oxidant characteristics and protects the brain cells. And the “Quersetin” which is another substance in the skin of the helps forming of the blood. Through this way it also effects the vessel health positively.

# RAISIN

**Seedless red raisin is beneficial for our health in lots of ways through the rich minerals it includes.**

While it increases the brain activity with its minerals in very high amounts, it regulates the nervous system and the cardiac rhythm with potassium. Also magnesium, which regulates the bone and nerve tissues, muscle activity and cardiac rhythm, is found in raisin in high amounts. Inositol has a cholesterol lowering effect. It includes the iron mineral, which has a blood-forming quality.

# DRIED APRICOT

Includes vitamins  
A, B, C and P

Good for immunity  
and the teeth

**Apricot; is rich in A, B, C and P vitamins,  
iron, magnesium, calcium, phosphorus, sulphur, copper,  
chrome and manganese minerals.**

Apricot, undertakes the mission of being a shield against many illnesses. It is possible to consume jelly, compost, dried state, juice, seed and fresh state of Apricots. This miraculous fruit is also good against development disorders. The fruit, which is directly effective for the headaches, can end the migraine pains.

It helps the teeth to be healthier and protects against cavities. It is good against the cardiac diseases and the diabetes.

# SUN DRIED APRICOT

*Rich in potassium*

*Regulates blood pressure*

**Sun dried apricot strengthens the immune system through the A, B3 vitamins, calcium, magnesium, potassium and phosphorus.**

It is protective against the flu and cold. It is also good for anemia, helps formation of blood and eases the nerves. Through the calcium and magnesium that it includes, it is also significant in bone health. Sun dried apricot is a very rich fruit in terms of fiber. As it is a fibrous fruit it protects the intestines and helps digestion. And the beta-carotene found in the sun dried apricot especially helps the prevention of lung cancer, cardiac diseases and cataract.

# DRIED FIG

*Protects  
against bacteria*

*Includes calcium  
and phosphorus*

**Figs are nutrients that provide the renewal of the cells with the protein, vitamin and minerals that they contain in high amounts.**

Figs procure the cholesterol that enter into the body to be removed out without getting into the bloodstream with the fiber that they contain in high levels. Figs, which ease digestion, have also protective effects for the body against bacteria. With the high amount of calcium and phosphorus that figs have, they guarantee the bone and teeth formation and their overall health. The calcium figs contain are more easily digested compared to the other foods. With the substance named "Benzaldehyde", figs prevent the growth of the cancer cells and they are effective against cancer.

# FRUIT MIX
