Continued daily use will result in slower growth of hair as hair grows back thinner, finer and softer prior to the treatment; eventually a great number of hair reduction is achieved.

NATURAL HAIR REDUCING CREAM FACE & BODY

EPISIVA Hair Reducing Cream is a botanical skin care solution that when applied immediately after hair removal, saturates the exposed base of the hair follicle and begins the process of slowing down hair growth.

Contains bio-enzymatic plant compounds that inhibit hair growth at the follicle. These plant extracts weaken the hair bulb, thin the hair shaft and reduce the amount of hair.

It is totally effective and safe.
