

**Omar Suliman Al-Ajaji
Medical Company**

Welcome Message

Chairman

Dr. Omar Al-Ajaji

On behalf of Omar Al-Ajaji Medical Company, I extend a warm welcome to you. We hope that our medical services will meet your expectations and provide you with exceptional service and care.

For almost three decades, our vision has been to establish a comprehensive and integrated medical complex that prioritizes the health of individuals and society, including citizens, residents, and visitors. Our approach is rooted in the principle of care based on quality and experience, ensuring the highest level of health care. Aligned with the "Kingdom's Vision 2030", which emphasizes the role of the private sector in the health sector, we aim to create a health system based on a new model of health care that incorporates essential principles and concepts for success. This approach places partnership with the private sector as the most critical axis within the health transformation. Health care is a vital element in the "Saudi Vision 2030," as it aims to make the Kingdom a world leader in the field. This vision offers an unprecedented opportunity to develop the health sector and provide distinguished health services through advanced business models that promote sustainability and efficiency. Our firm belief in this vision, coupled with our unwavering commitment to excellence, drives us to adhere to the highest quality standards, latest health, safety and security practices to provide the best medical services. As global health systems continue to evolve, we are in the process of implementing our future plan, which involves multiple axes, including a focus on digital health services, as we seek to improve the quality and efficiency of our health services.

Thank you for your trust in choosing Omar Al-Ajaji Medical Company for your care and the care of your loved ones, and we look forward to reaching more than your expectations.

About The Company

Omar Al-Ajahi Medical Company is a comprehensive medical complex that provides health care and medical services. Specialty Clinics

Specialty Clinics

A specialist ambulance and emergency unit that provides emergency aid for accidents, injuries, and burns, as well as first aid for heart and chest emergencies, in addition to an ambulance outfitted with the most advanced technologies and equipment.

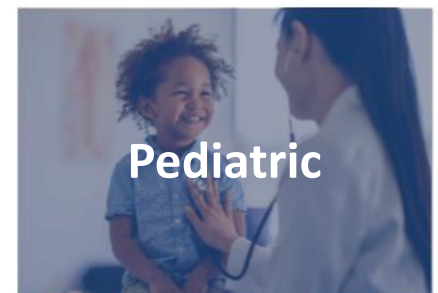

A specialized clinic for inspecting, diagnosing, and treating ear, nose, and throat disorders and surgeries, as well as the availability of an advanced and isolated unit for conducting audiograms and monitoring middle ear pressure.

A comprehensive general surgery clinic with the ability to administer first aid, do minor surgeries, and treat burns and varicose veins. Major surgeries are carried out by our specialized doctors in collaboration with the best hospitals in the Kingdom.

A clinic specializing in the diagnosis and treatment of acute and chronic illnesses in children from infancy to age twelve. This clinic provides close follow-up for newborns, administers all basic immunizations, treats most medical disorders, such as bronchial asthma, using steam, cures bedwetting, and administers a thorough medical checkup to schoolchildren.

Specialty Clinics

A specialized clinic that uses ultrasound imaging to monitor pregnancy, fetal development, and birthing. This clinic offers all essential medical testing for pregnancy monitoring, as well as treatment for all gynecological illnesses and early diagnosis of cervical and breast malignancies. Major surgeries are carried out by our specialized doctors in collaboration with the best hospitals in the Kingdom.

A specialized clinic for the treatment of various types of dermatological and venereal illnesses. This clinic offers a range of procedures, including the removal of warts, skin growths, acne scars, hair loss, tinea, and skin discoloration caused by ultraviolet rays, as well as the diagnosis and treatment of male infertility and impotence.

A specialized clinic for the treatment of digestive disorders, liver diseases and infections, cirrhosis, treatment of chest diseases, acute and chronic bronchial asthma, as well as blood sugar regulation, renal disease therapy, and kidney failure follow-up. This clinic offers medical care for heart disorders, first aid, treatment of heart attacks, valvular heart diseases, and follow-up care for patients with excessive blood pressure.

Specialty Clinics

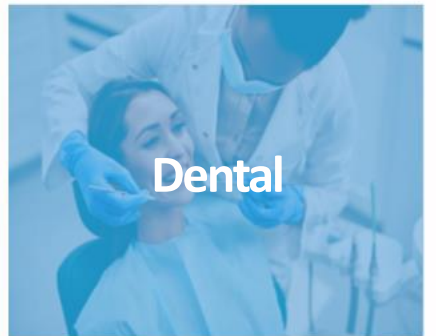

A clinic specializing in orthopedic surgery and the treatment of all injuries and fractures, as well as rheumatic disorders and all forms of arthritis.

A specialized clinic that detects vision, measures intraocular pressure, examines the fundus of the eye, treats various eye disorders and vision impairments, and performs small procedures.

Specialized clinics for males and females equipped with the latest equipment to treat teeth comprehensively, including cosmetic fillings, cosmetic porcelain fixtures, orthodontics, dental surgery, root canal treatment, and gum disease. These clinics have the most up-to-date tools for diagnosing and cleaning teeth, and they also have an in-house dental laboratory.

Laboratory Analysis

Laboratory Analysis Unit

The laboratory analysis unit offers a comprehensive range of medical analyses using state-of-the-art equipment in chemical analyses. Our highly trained team ensures accurate and reliable results for all types of necessary medical tests. The types of analyses provided by our laboratory analysis unit include:

- Blood disease analysis.
- Blood component count.
- Chemical analyses.
- Acquired immunodeficiency virus (AIDS) tests.
- Hormone and tumor marker analysis.
- Hepatitis virus analysis.
- Germ analysis and cultivation.
- Allergy and immunoassays.

We strive to provide the highest level of service to our patients, ensuring accurate and timely test results to aid in the diagnosis and treatment of medical conditions.

Diagnostic Radiology

Diagnostic Radiology Unit

The Diagnostic Radiology Unit offers a range of essential diagnostic services utilizing advanced medical equipment for simple and color-coded radiological examinations, as well as ultrasound examinations. Our highly trained staff provides comprehensive diagnostic services in the following areas:

- Digestive, urinary, and reproductive systems
- Heart function and related studies
- Abdominal imaging, urology, and venereal diseases
- Fetal follow-up and monitoring.

We are committed to providing accurate and timely diagnostic services to help ensure the health and well-being of our patients.

Medical Certificates

Medical Certificates Unit

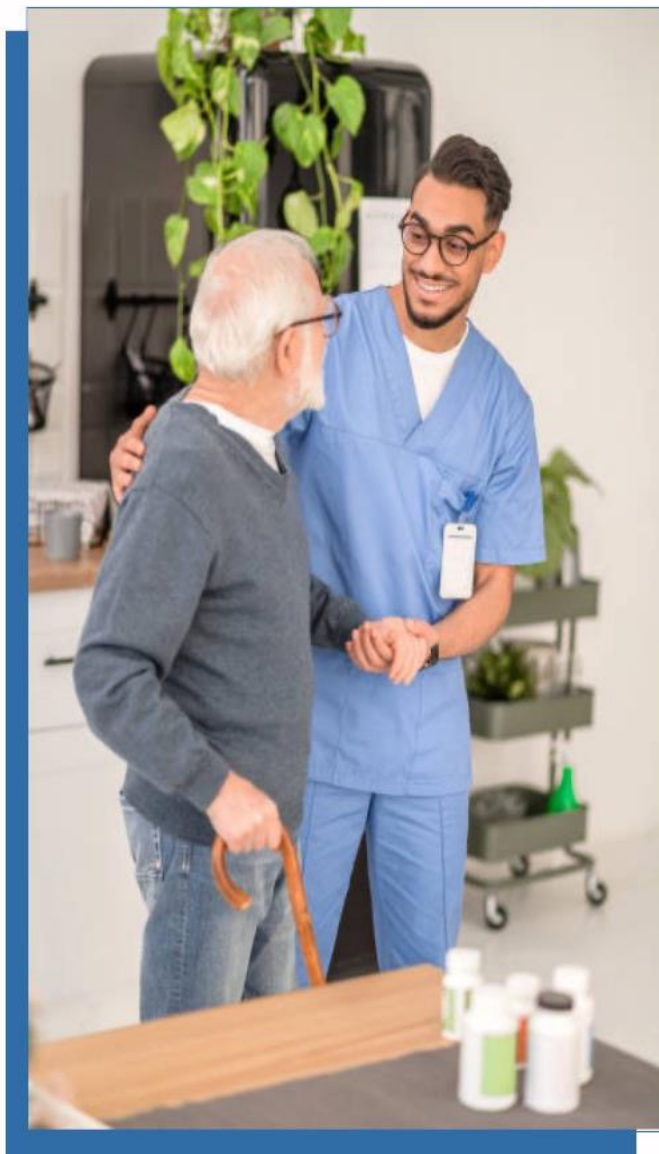

The Medical Certificates Unit provides a variety of medical certificates necessary for individuals in various government and private sectors. The certificates offered by this unit include, but are not limited to:

- Residency Test.
- Municipal Test.
- Employment Test.
- Eye Test (For driving license).

Our team of qualified and experienced medical professionals ensure that these certificates are issued in compliance with the highest standards of accuracy and confidentiality.

Home Health Care

Home Health Care Unit

The Home Health Care Unit provides an intensive care and continuous, comprehensive follow-up to patients who are unable to access health facilities in their residences. Our team of trained health professionals works in close coordination with the attending physician to ensure the highest quality of care is delivered.

The unit offers a wide range of home health care services, including:

- Home nursing.
- Home checkup.
- Physiotherapy and Rehabilitation.
- Critical care services for patients at home.
- Elderly care and follow-up services.

Our goal is to provide patients with quality care and support, while ensuring their comfort and well-being in their homes.

Pharmacies

Pharmacy Unit

Considering the rapid developments that the world is witnessing in the health sector, particularly in the pharmaceutical field and the services provided in pharmacies, our medical company aims to achieve excellence and quality in pharmacy services. Our pharmacies are not only dispensing stations for medicines, but rather provide integrated and comprehensive health care.

We strive to offer the best pharmaceutical advice through our highly qualified staff and to guide our clients towards a healthier life. Our pharmacies are located in three branches, and we are committed to providing exceptional service and care to our valued clients.

Healthcare Operation

Healthcare Operation Unit

The Healthcare Operation Unit aims to operate and manage health centers, hospitals, and health complexes to provide the highest levels of medical care that align with best practices and international quality standards. We offer an extensive range of medical operating services, including:

- Management and operation of healthcare facilities, as well as related advisory services.
- Consulting services in the field of healthcare to provide expert guidance and support to our clients.
- Management of health projects and health transformation projects to ensure the successful implementation of new initiatives.

Our experienced team is committed to providing efficient, effective, and innovative solutions to our clients in the healthcare industry. We work closely with our clients to understand their unique needs and tailor our services to meet those needs, ensuring that they receive the best possible care and service.
